Baltimore Fire Insurance COMPANY.

The President and Directors of this Company, with a Capital of 500,000 Dollars, continue to make insurance against loss, or damage by Fire on Houses, and Buildings of every description; on Goods, Wares and Merchandize, Furniture, Silver Plate, &c. contained therein; on ships and their Cargoes while lying in port; Insurance on the Indland Transportation of Goods; and all kinds of Insurance on Lives. The terms of Insurance are so very moderate, as to bear the most inconsiderable proportion to the amount to be paid in case of accident or loss. This being the dangerous season, it becomes every person of prudence to guard against misfortune, at at a very trifling expense secure for himself the means of indemnity, in case of loss to his property by Fire.

Regular attendance will be given at the office, No. 12, South st. from 9 o'clock A. M. untill half past 1 P. M. and in the afternoon from half past three until half past 4 o'clock.

NEWSPAPER.

The citizens will be waited upon for their signatures to establish "*The Baltimore Correspondent*," proposed to be published in this city. Those gentlemen who have made up their minds upon the subject, will please signify it to their families, in order to prevent frequent calls.

TO THE
CITIZENS OF FELL'S POINT.

The paper proposed will be very desirable, as the early hour at which it is intended to be issued, will enable them to anticipate the news of the day at least four hours sooner than they can obtain it through any other medium.

PROPOSALS,

For publishing in this city, a News paper,
TO BE ENTITLED THE
BALTIMORE CORRESPONDENT,
AND
Merchants', Manufacturers' and Mechanics' Daily Advertiser,
BY THOMAS HOWARD HILL, *Printer.*

The proposed paper will be published daily (at noon) in order to circulate the earliest intelligence which may be received by the mail.

It is proper that the intended editor should declare his intentions as to the manner in which he means to conduct the publication of "The Baltimore Correspondent." He pledges himself that it shall be held abstract from all party, and be conducted upon the most impartial principles—that it shall comprize the following articles, viz: All foreign and domestic news of the day; a regular detail of naval and military events; a correct and regular journal of the proceedings of the National Legislature; as also those of the different states, and all documents that may be submitted to them for their consideration. And in the absence of the above general named intelligence, he will insert useful notices of the progress of commerce, (internal and external) of Manufactures and of Mechanics, as indeed it is to be solely devoted to their advancement. A price-current (corrected weekly) will be inserted upon the most convenient day.

The utility of such newspaper at the present time is most certainly obvious to those acquanted with the time of the arrival of the great mail; and as it is the wish of the editor to make the contemplated paper as useful as possible, he promises to use his utmost exertions in collecting of intelligence that may be useful and interesting to those who may favour him with their support. TERMS:

"The Baltimore Correspondent" will be printed on a half sheet super-royal, at FIVE Dollars per annum, payable half yearly in advance. The paper for the Country at THREE dollars, in advance. Advertisements to be inserted on the usual terms, unless otherwise contracted for by the year.

P. S.—Arrangements are now making to anticipate news by letter.

New Invented & Patented LOOM.

The subscriber takes leave to inform the public and especially the Cloth Manufacturers, that he has invented a Loom, which although extremely simple possesses greater advantages than any heretofore known.—They consist briefly in the following to wit:

It requires the use of one hand only, the motion being more regular than in common looms, the texture of the Cloth is more even and the selvidge more perfect. The Threads are not so apt to break.

It can weave Stuffs of any kind, from the narrowest dimension to 4 and 5 yards.

A child 10 or 12 years old, may learn how to use it in a couple of hours, and work in a few days with as much ease and regularity, and do more work than any workman who has followed the business for years in the ordinary way.—It is susceptible of being worked either by water or steam.

The Mechanism can with very little expence be adapted to common Looms.

To be seen from 8 in the morning to 1 in the afternoon, at
MOREL GUIRAMAUD's,
No. 16, Charles st.
