The Index Has Been Compiled In The Following Manner:

Plats and Records have been microfilmed and are listed by Drawer Number, Name of Street, and Number of Plat (an additional number is sometimes listed only when it appeared on the original Plat).

Each Plat has been assigned a microfilm number (or numbers) in numerical sequence.

In order to locate a Street Plat, it will be necessary to refer to the original alphabetical Index Card.

That card lists the Drawer Number in which a particular Street Plat is stored.

By taking the Drawer Number and then referring to the Listing, it would be merely a matter of checking the Street and Plat Number to find the microfilm number.

Each box of microfilm bears the numerical sequence of the microfilmed images contained therein.

Therefore, the boxes must be checked in order to locate the microfilm number and image one seeks.
