FOR SALE,

THE FARM near Little Black Water Bridge, containing

250 acres,

situated directly on the road between Mrs. Dorothy Staplefort's and Levin H. Wall's. The Buildings are in tolerable repair, and the land is well adapted to the growth of corn and wheat. Its fertility is not surpassed by that of any farm in the neighborhood. This property has on it a great sufficiency of timber for the use of the farm, and is not surpassed by any farm in Black Water for the advantages of raising stock. A further description is deemed unnecessary, as it is presumed any person wishing to purchase will first view the premises. There will be an undoubted right given, clear of all incumbrances. Talavera Wheat.

THE subscriber offers for sale a few hundred bushels of "Talavera" Seed Wheat, which he has taken much pains to preserve pure. It is a smooth head and white wheat, grows a vigorous and tall stalk; and is very productive. From his experiments, fairly made, in the last two years, and especially that of the last winter, in comparison with the "Blue Straw," "the Red Chaff White," and "the Smooth White," under like circumstances, in various soils, and situations, its character as the most hardy wheat is established in his opinion:—Branching largely, it requires less for seed; and, from its superior strong growth, it will probably, as is said of it, "considerably resist the Fly."

The price will be the same it cost him—two dollars per bushel.

He wears whiskers, and has a scar on his upper lip, from a bite in fighting—one of his great toes is also disfigured, in consequence of having been mashed when he was a boy, by the fore part of an ox cart against the tongue. American Magazine
OF
Useful and Entertaining Knowledge.
VOLUME II.

Published by the Boston Bewick Company, No. 47, Court street, Boston.

THE Publishers are encouraged by the flattering reception and extensive circulation of the Magazine for the year past, to prosecute the work with renewed assiduity; and with a constant desire to fulfil the promises made in the outset of the work. We intend to 'stick to our text;' and to serve those who have so liberally cheered us with their kind patronage, with what is useful and pleasant. The *utile et dulce* shall still be our object and aim. We do not presume to instruct the veteran and erudite scholar, who has spent thirty or forty years in his study,—nor to lay open those hidden mysteries of nature which have escaped the ken of the most inquisitive. Nor do we expect to approach so near to the moon or other planets, as to tell what are the trees, the birds, and animals which may there grow, or live and move. We leave such extraordinary feats to those who are more visionary, or more daring than we are. But we hope and intend to keep up the character and spirit of the Magazine, in presenting solid and useful articles, which may be instructive to a portion of our readers, and not considered wholly unimportant to literary men. We consider the whole United States as our field, though not our's exclusively; and we ask the favour of persons of taste and science, to communicate important facts, and natural scenes, and works of art, for the benefit of all our friends. As republicans, we feel that we are in the same family as those in the south and in the west—as friends of improvement, of good morals and good learning, we wish also to be considered of the same family. If we can do any thing by our labours to increase and strengthen this sentiment and feeling, "we shall be ready to the good work."

We would call the attention of our present subscribers to the terms of the Magazine, and to the notice in the last number relating to the subject. It is very important to us to know who propose to continue taking the Magazine, and to receive the very small sum, charged for it in advance.

FOURTH YEAR OF
WALDIE'S LIBRARY.
BOOKS BY MAIL!

PROSPECTUS OF TWO NEW VOLUMES FOR 1836.

THREE years have now elapsed since the proprietor of Waldie's Select Circulating Library laid before the public his original prospectus for a valuable Library, the great features of which were cheapness, and the facility of a rapid transportation by mail. The most ample success has attended the enterprise, and the effects upon the reading community, it is believed, have been wholesome.

The fourth year will commence on the first Tuesday of January, 1836, at which period it will be necessary to determine the additional amount of copies to be printed, subscriptions being taken only from January of each year. The entire success of the Library is the best guarantee that can be given of its continuance. It was the first to supply *books by mail* at a mere per centage of their former cost; it has outlived more than thirty puerile attempts at imitation; and has now an extensive list of patrons who are of the most solid and valuable class of citizens in every part of the Union, as well as in foreign countries.

The object of Waldie's Library, its use and purpose is enjoyment liberal and intellectual. To all who love a mental banquet, without being compelled to depend on places of public resort, this publication furnishes a most valuable desideratum, supplying polite literature of a character to enlarge and improve the mind. The time and attention of the editor, himself a reader from inclination as well as duty, are devoted to the procurement of works of an elevated standard of intellect which may be admitted into every family without hesitation by the most fastidious, and become a rallying point for all its members, promoting social belles lettres reading and conversation. The variety thus collected from the whole mass of published works, mostly new, embraces Biography, Novels, Voyages and Travels, Sketches, Tales, and Select History, personal memoirs of extraordinary individuals, and curious adventures, &c. &c. An amount equal to fifty London duodecimo volumes is thus annually furnished in weekly numbers, at a cost only equal to one of the London works. The plan thus embraces the whole range of popular literature, and the work has now become so universally diffused in every part of the Union as to form no inconsiderable portion of the literature of the country, and with which an acquaintance has become really necessary for those who mix in society.

The Library, as now conducted, disseminates books to all parts of the country in from five to six weeks after their issue in London. Five dollars per annum expended in this way will supply good reading for a whole circle or family; for a *cent and a half a day*, postage included, a duodecimo book is sent every week, making in the course of the year more than three volumes of Rees's Cyclopedia. One volume of the Library, containing from fifteen to twenty entire works, can be bound at an expense little exceeding that of binding either separately, and constitutes a concentrated collection forming a never-failing source of amusement and instruction, and which must always be worth the price that has been paid for it. The most ample testimony has been spontaneously afforded that this work has contributed to the pleasure of thousands, who, but for the resource it afforded, must have been left with minds unoccupied, or thrown into unprofitable and uncongenial society. This immense supply of periodical reading has thus become welcomed every where as a means of improvement, and a substitute for the small talk or idle listlessness so apt to employ a large portion of the time of the many.

Waldie's Library is published every Tuesday, accompanied by a cover of four quarto pages, entitled The Journal of Belles Lettres, containing reviews of new books, literary intelligence of all kinds, tales, lists of new books, &c.; thus combining the advantages of a Library, and the amusement of a magazine and newspaper; the whole for FIVE DOLLARS per annum, or clubs of individuals obtain five copies for $20, a reduction which pays the postage. ☞*Payment always in advance.*

WALDIE'S PORT FOLIO
And Companion to the Library.

THIS periodical contains half as much matter as the Library, at half its price; or *both* are furnished to clubs of five for $6. Its contents consist of a reprint of the best matter from the London Magazines and Reviews, more especially Chambers's Edinburgh Journal. Its object is popular instruction and amusement, combined in such a manner as to enlist the feelings of every member of the social circle. It enjoys an extensive circulation. Price to single subscribers not taking the Library, $2 50, postage paid.

***A very limited number of complete setts of Library and Port Folio, at the original subscription price, may be had for a short period. The Library has been published three years and the Port Folio one; an individual may now form a club by himself, and by paying for the past three years and the volumes for 1836 of the Library, and Port Folio for 1835 and 1836, the whole can be had for $20. For this an amount of matter may be procured which public approbation has stamped as truly valuable and unique of its kind. This privilege must, however, be of brief continuance.

Address, post paid,
ADAM WALDIE,
Seventh, two doors south of Chesnut street, Philadelphia.

☞The Museum of Foreign Literature and Science, price $6 per annum, the Library and the Port Folio, will be all supplied for *twelve dollars.*

The Silk Culturist.

THE Executive Committee of the Hartford county Silk Society, have commenced a monthly publication, called the Silk Culturist and Farmers' Manual.

The object of the publication is to disseminate a thorough knowledge of the cultivation of the Mulberry Tree, in all its varieties. The rearing of Silk Worms—The production of Cocoons and the Reeling of Silk, in the most approved method. The importance of this knowledge will appear from the fact that the nett profit of land devoted to the culture of Silk, is double, if not triple, to that derived from any other crop which can be put upon it. It is also a fact, that every moderate farmer can raise several hundred dollars worth of Silk, without interfering with his ordinary agricultural operations. But in order to avail himself of this facility to obtain competency and wealth which our soil and climate have given him he must possess himself of information on the subject—for without it his attempts will be fruitless. It is, therefore, the object of the Committee to diffuse this information as extensively as possible, and at the cheapest rate. The publication will contain a complete manual or directory from sowing the seed to reeling the Silk, together with such facts and experiments, as will enable farmers to raise Silk and prepare it for market, without further knowledge or assistance. It will also contain interesting matter on agricultural subjects in general.

TERMS—The Culturist will be published in monthly numbers of Eight Quarto Pages, at FIFTY CENTS a year. No subscription will be received unless paid in *advance*, and for not less than a year.

Subscriptions received by F. G. COMSTOCK, Secretary, Hartford, Conn., to whom also, Communications may be addressed, which, if post paid, will be attended to.
