THE CHRONICLE.

CAMBRIDGE—MD

SATURDAY MORNING, October 10, 1846.

☞Mr. V. B. PALMER is our authorized agent to receive supscriptions and advertisements for the "CAMBRIDGE CHRONICLE," in the cities of Baltimore, Philadelphia, New York and Boston,

The Orphan's Court of Dorchester county will sit on the 13th Oct.

—o—

THE Democrat of last week *feeling* the force of our remarks upon the subject of Biennial Sessions, and seeing that his objections against the bill could not be sustained by argument and reason, has drawn pretty strongly upon his wit. We leave it to his readers to form their own opinion concerning its refinement or *vulgarity*. If our self respect would permit us to indulge in equal coarseness, we could remind him of the proverb that "a puppy will show his breeding," which would probably be equally, if not more appropriate to the subject of our remarks than his Jackass proverb was to us. But as the election is over and the whigs of Dorchester triumphant and Biennial Sessions still more triumphant, while we are rejoicing at the triumph of correct principles, we are willing that he should not be disturbed in the enjoyment derived from his own wit.

We presume his present condition to be such that small favors are thankfully received by him.

—o—

It will be seen by the returns below, that although from local causes the Whigs have lost the Senators in Caroline and Worcester counties by small majorities they have achieved a great victory throughout the State. The next Senate will stand 13 (W.) to 8, (L. F,) The House of Delegates will probably be composed of 54 whigs and 28 LOCOS. So overwhelming is the Whig victory, that the LOCOS, have succeeded in electing their full ticket in but one county in the State—Allegany by a small majority. It is true the ticket elected in Baltimore county is LOCO, but as it was brought out against the caucus tickst, and supported by the Whigs, the L. F. party can claim no credit for it.

So ends conventional reform for the present. We cannot collect sufficient returns from the papers to enable us to form any opinion concerning the Biennial Session Bill.

—o—

MARYLAND ELECTION RETURNS.

The election on Wednesday was for Delegates from each county to the General Assembly, and also for nine Senators. We annex the results as far as received.

FREDERICK COUNTY.—A Whig Senator and 5 Whig delegates elected from this county by 80 or 100 majority.

WASHINGTON COUNTY.—Clark, the Whig candidate for the Senate is elected by about 50 majority. The delegates divided —3 whig and 2 Locos The 3 whig Commissioners all elected.

ALLEGANY CO.—All the districts from this county have not been heard from. The democratic majority is about 100 for Senator and 150 for delegates.

MONTGOMERY CO.—The whole whig ticket elected in this county, majority not known.

BALTIMORE CO. In this Co. there was no whig ticket. It seems to be conceded that the Independent Locofoco ticket is elected—5 Delegates and a Senator.

HARFORD CO. 1 whig and 3 Locos elected in this County.

CECIL CO. The Loco candidate for Senator is elected. The Delegates are 3 Locos and 1 whig

QUEEN ANNS CO. The entire whig ticket consisting of Senator and 4 delegates elected by a majority of about 70.

KENT C: 2 whig delegates elected no opposition.

CARROLL CO.—4 independent whig Candidates from this County.

ANNE ARUNDEL CO.—Messrs Johnson, Donalson & Hayden (W.) and messrs. Morris and Chairs (L. F.) are elected in this County.

BALTIMORE CITY.—The official returns as made by the Judges yesterday elect Keyser the whig candidate for the Senate by one vote, Kennedy and Patterson (W.) and 3 Locofocos elected to the House of Delegates.

SOMERSET CO.—In this county the whole whig ticket is elected.

WORCESTER CO.—The Locofoco Senator is elected by about 50 votes [illegible] whig delegates, and Holland Locofoco.

CAROLINE.—Potter the whig candidate for the Senate is said to be defeated by 17 votes Delegates—(5 L. F.) and 1 tie.

TALBOT CO: The whigs have elected in this county one delegate and two commissioners, the Locos 2 delegates. It is believed by the whigs that if there had been no independent whig candidate the whole whig ticket would have been easily elected

—o—

CONNECTICUT TOWN ELECTION.—On Monday, as far as heard from, 20 towns elected Whig officers, 15 Democrats and 4 were divided. Litchfield, Middletown, Guilford and Huntingdon now Whig, last year gave majorities for the Democratic Governor, so that the Whigs have 4 towns gain.

DELAWARE.

Correspondence of the Philad. U. S. Gazette.

WILMINGTON, Del., Oct. 7, 8 P. M.

The election is over and I am happy to inform you that the Whigs have again succeeded in carrying the State.

In New Castle County the Whig candidates for Inspectors have been elected by a majority of about 80 votes.

In Kent County the Whig ticket succeeded by about 150 majority.

Sussex has been but partially heard from, believed to have gone for the Whigs.

Meterial for new States.—It is said that California will make forty-five States, each the size of New Jersey; and New Mexico is equal to twenty-five New Jerseys. A Washington letter gives this account of the position of our forces investing Mexico.

Not all your corporate authorities pending an important election can come up to Gen. Kearney in the way of naturalizing foreigners who have just got into the Union. He takes in a town at a time, and proclaims them citizens of our glorious confederacy.

The whole army is now rapidly closing down in their march toward the capital of our unruly neighbors—the various detachments sweeping the whole breadth of the Republic. The following is perhaps within the limits of the land forces operating against Mexico.

Army under Gen. Taylor,	10,000 men
Detachments between Montery and Point Isabel,	4,000 "
Under Gen. Wool, west of main army Under Gen. Kearney, north west of Gen. Wool,	3,000 "
	2,500 "
Total,	19,500 "

West of Gen. Kearney we have the indomitable and gallant Fremont, the mountain-scaler the path-finder, and the pilot of the deserts. He has we understand, a force of about 50 men, equal to a base line of 500 miles against the Mexicans. He has doubtless joined in the war.

The base line of the land operation stretches therefore, clear across the continent, from the Gulf of Mexico to the Pacific Ocean.

The naval forces in the Gulf and on the side of the Pacific, will muster you a complement, officers, seamen and marines, of 3000 men

With the reinforcements *en route* for the seat of war, the army will be augmented to at least 22,000 men, which added to the naval force, will amount to the land and water co-operation of 25,000 staunch and stalwort Anglo Saxons against the Mexicans, forming a line of operation by land and sea around the Mexican Republic of 4000 miles, completely enclosing that vast country, except in the narrow neck to the southward.

FOREIGN NEWS.

7 Days Later from Europe.

Highly Important Commercial Intelligence—Advance in the Price of Cotton—Trouble Between England and France Relative to the Marriage of the Queen of Spain—The Marriage Broken off, &c.

The steamship Hibernia, Capt. Ryrie, arrived at Boston at an aarly hour on Saturday morning. She sailed from Liverpool on the 19th ult. We have received as yet but a meagre account of the intelligence brought by her, in consequence of no mail arriving from the North on Sundays. We annex two telegraphic reports:

[From the New York Herald, extra.]

The intelligence is of the highest importance in a commercial point of view.

The political news may also be important, of this nous verrons.

Cotton had gone up a farthing with large sales.

The business in flour was generally moderate. At Liverpool it was firm and in fair demand. Free flour at 29s. to 31s. Bonded flour at 27s. 6d.

Corn has advanced 3s, with sales of yellow at 46s, and of white at 47s.

At London flour was dull at 29s a 30s 6d, free.

The London money market was very easy, and it was supposed that the Bank of England would make another reduction in the rate of interest.

The wheat crop is a full average crop in England.

There appears to be some trouble between France and England relative to the marriage of the Queen of Spain. It is said that the marriage has been broken off. It is thought this will lead to serious rupture in the entiente cordial.

The potatoe crop has turned out a complete failure.

The markets in Liverpool were brisk; in London dull.

The total failure of the potatoe crop appears to be a sad reality. Every where in Ireland, and in the greater part of the British Island, the potatoe fields are shrouded with the dark mantles of the plague. The vegetable has turned into putrid matter, which even hogs will not devour. From the continent of Europe, including Russia, we have dismal accounts of the progress of the blight The future use of the potatoe, as an article of food, is now almost abandoned.

The Bank of England declared a semi-annual dividend of 3 1-2 per cent.

The Gazette de Cologne says it has been announced for some time past that a measure will shortly appear prohibiting the exportation of corn from the territory of France.

A number of tried friends of commercial freedom entertained A. Brown, esq., a few days at Warrington, England, in celebration of his return as representative of South Lancanshire and the triumph of free trade principles.

The epidemic at the Hague is on the increase.

Foroign Stocks, particularly Mexican Spanish and Portuguese, owing to the unsettled state of those countries, have receded.

The rupture among the Repealers in Ireland is daily manifesting itself, and at a meeting in Belfast a few days ago, the physical force party obtained a decided triumph over the moral force or O'Connell men.

Mr. Polk's proposals of peace to Mexico excited considerable comment in the Paris papers. The Journal Des Debats, the Government organ, remarks that without doubt the new aspect given to the policy of the United States towards Mexico must be ascribed to offers of mediation made by England.

[From the Philadelphia Inquirer, extra.]

By the arrival of the Hibernia at Boston, we have, by Telegraph, the following brief outline of the foreign intelligence, seven days later.

The market for Flour was dull in London, and firm in Liverpool. Free, from 58 to 31 shillings per quarter. Moderate sales.

Corn advanced 3s. Per quarter. Yellow, 46s; white, 47s.

The advices by the Caledonia put cotton up one farthing.

The potatoe crop is an entire failure.

The wheat harvest in England is an average.

—o—

DR. WEATHERLY.—We have published below a card from this gentleman setting forth the unceremoneous, and we might say the unjust manner in which he has been treated by his Locofoco friends. The Doct. we understand is very popular in Lakes District and we presume would have received at least the whole strength of his party there, had he consented to be a candidate. But his professional engagements, and perhaps his inclination forbidding him from running as a candidate, it seems rather a hard case that his name should be used against his consent. The Doct. will find that these Locos about Cambridge dont stand upon ceremony when they get in a tight place.

—o—

COMMUNICTED

To the Editor of the Chronicle:

DEAR SIR:—I will be very much obliged to you if you will mention in your next paper, that I streneously objected previously to the meeting of the Democrats in Cambridge, to my name being used by them as a Candidate for a seat in the next Legislature of Maryland —that as soon as I heard of my nomination, which was the day after it was made, I despatched a messenger to Cambridge with my resignation to the "Democrat," which has never been published—that I was not aware until the day preceding the election that I was still to be continued as a Candidate—and that my name was to be on the printed tickets—and that on this day I notified the Judges of Lakes District election that I was not a Candidate—never had been, and that I objected to their counting any votes cast in my favour.

Yours Respectfully

JOSEPH WEATHERLY,

Oct. 7th 1846.
