The Crops of the West in 1857.

The Cincinnati Gazette has the following estimates of the crop of 1857, compared with the production of 1849. in the nine great grain-growing States of the West. The Gazette says the estimates are based on sound data in relation to increase of population and ratios of production, and on the assumption that the crop of this year will be a full average. Of course providential circumstances may mar this flattering prospect:

	Wheat. Crop of 1849.	Estimate. Crop of 1857
Ohio	14,500,000	20,000,000
Indiana	6,200,000	10,000,000
Illinois	9,500,000	19,000,000
Kentucky	2,200,000	5,000,000
Tennessee	1,650,000	3,000,000
Michigan	5,000,000	6,000,000
Wisconsin	4,200,000	5,000,000
Missouri	3,000,000	5,000,000
Iowa	1,500,000	3,000,000
Aggregate	47,550,000	73,000,000

This shows an advance of 55 per cent. on the production of 1849. The increase of population is about 35 per cent. so we have allowed a large margin for more favorable crops. Looking to the consumption of Indian corn bread, the consumption of wheat for flour and seed in these States will not exceed 45,000,000 bushels, so that there will be, assuming an average crop, twenty-eight millions of bushels for exportation. This is probably double the amount which went out of the Northwest to the Atlantic coast:

	Corn crop of 1849 Bushels.	Corn crop of 1857 Bushels.
Ohio	50,100,000	85,000,000
Indiana	53,000,000	65,000,000
Illinois	57,650,000	75,000,000
Kentucky	58,700,000	65,000,000
Tennessee	52,200,000	60,000,000
Michigan	5,800,000	10,000,000
Wisconsin	2,000,000	8,000,000
Missouri	36,200,000	55,000,000
Iowa	8,700,000	20,000,000
Total	332,450,000	443,000,000

This is an increase of 35 per cent, or about the same with the population. Of this great cereal crop fully one-half goes into surplus, partly in bulk, partly as pork, lard, whisky, cattle. There will be a greater surplus in 1857 than in 1850, by full 50,000,000 bushels, which is equivalent to an increase of thirty millions of dollars — There will be half the same increase on wheat, and one-fourth as much on oats.— The advance in hay, which is already much out gathered, will be full fifteen millions more, which chiefly appears in the weight of cattle, horses, &c. In addition to all these considerations, we must remember that the crop of 1856 fell below that of 1849 very much. If our hypothesis of a full average crop should turn out true, we think the surplus of the West will be from sixty to a hundred millions of dollars better than in 1856. There is a full demand for these, and our railroads furnish a ready and cheap outlet to all markets.

MOSQUITO BITES.—An antidote for the poison of mosquitoes, bees, wasps, &c., has been found in "Burnett's Kalliston, prepared by Joseph Burnett & Co., Boston. This preparation contains a peculiar property, which upon being thoroughly rubbed into the bites and stings of insects, instantly neutralizes the poison and allays the inflamation.
