FOR HERNIA.

THE Pad is made of hard rubber or gutta percha, weighs half an ounce, and is perforated so as to admit air to the ruptured part, and let off the perspiration without absorption, thus keeping the body pure and healthy.

Those residing at a distance from the city will have a circular sent them, free of postage, by sending me their address.

Private rooms for Ladies, attended by a lady who will use every endeavor to give satisfaction.

Baltimore, Md., July 17, 1860.

Mr. W. F. DAILY,—Dear Sir:—You request my individual and professional experience in the use of your improved Ventilated Truss.

Having been necessitated for the last ten years to wear a truss for Inguinal Hernia, during which time I have worn trusses made by the manufacturers of our principal cities, and for the last twelve months your own, I unhesitatingly give it the preference for applicability of purpose and comfort to any other.

Those of my patients who have been fitted by you express their positive choice over every other they had previously applied.

Respectfully, JOHN C. S. MONKUR, M.D., Late Professor of Medicine, Washington University of Baltimore.

I have constantly on hand, both of my own manufacture and importation, the following articles, in varieties too great to name, and will also make to order any instrument for physical deformity needed.

Surgical and Dental Instruments, Trusses of various kinds, Abdominal Supporters, Suspensary Bandages of Silk, Linen and Cotton, of twenty different kinds, Elastic Silk and Cotton Stockings, Knee Caps and Anklets for Swelled Legs or Varicose Veins, Shoulder Braces, Syringes of every description, Ear Trumpets, Auricles, Artificial Tympanums, Conversation Tubes, Silver Tubes for the Ear, Breast Pumps, Nipple Shields, Nursing Bottles, Piles-Trusses, Pile Syringes, Galvanic Batteries for Medicinal and Dental purposes; Money Belts, Respirator, Pessaries, &c.

The First and Highest Premium

AWARDED TO THE

GROVER & BAKER

Sewing Machine and Stitch,

FOR FAMILY USE.

Read the following:

NASHVILLE, September 15th, 1860.

The undersigned Committee appointed by the State Bureau of the Seventh Annual State Fair of Tennessee to examine, and mark award, for the best Family Sewing Machine, find on exhibition the following machines in competition: the I. M. Singer; Wheeler & Wilson, A. B. Howe, and the Grover & Baker. The first three named, although differing in construction and capacity, still, so far as the stitch is concerned, all arrive at the same point—making what is called and known as the Shuttle stitch, each using a shuttle or shuttle and bobbin, upon which all of the lower thread, or thread used underneath, is required to be re-spooled.—The Shuttle Machine may be used upon some classes of Family Sewing with a degree of satisfaction, but we conceive from their construction, operation and stich, their principal adaption is to the purposes of manufacture.

The points we conceive most necessary and important to meet the wide range of requirements in a Machine for family sewing, we find more fully combined in the Grover & Baker—extent of capacity, simplicity of construction, ease of management, advantage of using thread from two spools without re-winding, strength of work, elasticity, durability, and regularity of stich, and quietness of movement. We therefore mark award to Grover & Baker,

JOHN HERIGES, *Chairman.*

Jo. W. HORTON, J. W. WISSON,
C. H. WHITE, JAS. A. WOODS.

I hereby certify that the above is a true copy of the original decision and award of the Committee upon Family Sewing Machines, appointed by the Tennessee State Fair, for 1860.
