SOUTH CAROLINA'S "STEVIE" REBUKED BY REP. MADDEN

MADDEN FLAYS SO. CAROLINA CONGRESSMAN

Stevenson Advised "Big Bill" Thompson To Eliminate Africans From P. O.

CLEAN UP YOUR HOME IS MADDEN'S RETORT

Smith Chagrinned Because Blacks Are Leaving And Forcing Them To Work

WASHINGTON, D. C.—(Special)—Hurrying from a meeting of the Appropriations Committee, when he learned that Congressman William F. Stevenson of South Carolina was getting off a tirade against Negro employees of the Chicago Post Office Representative Martin B. Madden admonished him to go back down South and clean up his own house, in a stinging rebuke Wednesday.

The rebuke followed a sarcastic speech made by the South Carolina representative while he was reading into the records a resolution from the National Civic Welfare Association of Chicago, headed by one L. W. Gelbaugh, white, and which is fighting the present policy of employing colored people in the Chicago post office.

Stevenson declared that it was the contention of the National Civic Welfare League that the Negroes were getting too much recognition from political bosses. They say in this communication that the population of Chicago is in excess of 3,000,000 and 150,000 of this population, or about five per cent, are colored. Out of the entire employment in the Chicago post office of 11,019 men and women, 2,950, or 31 per cent. are colored.

Quoting a report made by efficiency experts during the Harding administration in 1921 to the effect that at that time 900 white men could do the work that 1400 colored men were doing, Stevenson suggested that $1,000,000 a year could be saved by reducing the number of race men and women employed.

"I will say in conclusion," Stevenson said, "that they have a Mayor out there who would drive out the English from the public schools and higher institutions of learning. According to these people here, he ought to get busy and eliminate a few Africans from the post office, if they are telling the truth."

Madden Replies

"It is clear," hotly retorted Representative Madden, "that the gentleman from South Carolina has no motive in presenting this case. Perhaps if he could look nearer home he could find better reason for cleaning up things than he finds in the case of clearing up Chicago.

"Chicago needs no defense. The Mayor of Chicago needs no defense. If he is not American, who is? If these black people in Chicago are not American, where are Americans to be found? They are citizens of the United States and are recognized as such in Chicago.

3,200 Employed

"Chicago post office is the second biggest post office in the nation. It employs 14,000 Americans, 3,000 of whom are colored. They are patriotic Americans. They do their duty as they find it. They are law abiding citizens. They have the respect of the community in which they live. There are more than 150,000 black people in Chicago. I should say 400,000. They have made more progress there than any other class I know. They are in the banking business and in the manufacturing business. They are in art and in education. They are in all the activities that attract the best minds of the best people of the world.

"I am proud o be here to speak for the black people of Chicago and the nation. I apologize to no man, whatever he may be, for my interest in the black people of America.

South Chagrined

The people of the South are naturally a little chagrined because the black people are leaving them and forcing them to work. They would like to have them back. but the black people refuse to do it after they have obtained a simple glimpse of liberty as it is to be found in north; yes, Chicago. I am glad that Chicago is sufficiently liberal in its views to recognize the rights of citizens, whether they be black or white.

In Chicago, all citizens, of all races, are honored as they deserved to be honored; and Chicago, the queen of the inland seas, pays no attention whatever to any protests from any crowd so narrow minded as those who sent this circular letter to the gentleman from South Carolina."

PRESIDENT COOLIDGE GREETS BANKERS

Delegation Of Business Men Received At White House Saturday

60 RACE BANKS

Nation's Head Surprised To Learn Of Stability

WASHINGTON, D. C.—President Coolidge was informed of the stability of the banking business by delegation representing the executive committee of National Negro Banks' Association, which called at the White House, Saturday.

There are 60 Negro banks in the United States having deposits of more than twenty-two million dollars and more than 350,000 separate depositors, spokesman for the bankers declared. While some of these banks are more than a quarter century old, most of them have come into being with the prosperity which came after the world war, the president was told.

All Over Country

Negro bankers are scattered all country, and by honest smethod are gaining the confidence of the people. There are twelve million Negroes in the country with an earning power of approximately three billion dollars per year.

The property holdings of Negroes today are -estimated at $3,000,000,000. The church property alone amounts to $150,000,000. Negro insurance companies have resources

No Failures

Failures among Negro banks have not averaged one a year in the past ten years, while there have been ten thousand failures of banks conducted by white people. Some race banks are guided by new men who have been trained in the Howard School of inance and the Wharton School of Finance and the University of Chicago.

It is significant, it was stated, that not one institution affiliated with the National Negro Bankers Association had failed. The president was asked to endorse the organization and urge bankers now operating independently to join and avail themselves of the protection and guidance the body offords.

President Surprised

President Coolidge expressed his surprise at the information, stating that he was not aware that colored people were doing business on such a large scale. He endorsed the organization.

Those in the delegation were Major West Hamilton, C. W. Rutherford, Judge Edward Henry of Philadelphia, John R. Hawkins, and Jno. M. Marquess.

BILL MAKING HOWARD GOVT. UNIT IN HOUSE

Majority Report States U. S. Should Do As Much For Negroes As Indians

MINORITY DIXIE MEMBERS OBJECT

Southern Colored Folk Prefer White Doctors And Dentists They Say

WASHINGTON, D. C.—The bill authorizing Federal appropriations to aid in the construction, development, improvement and maintenance of Howard University was favorably reported to the House last Wednesday by Representative Daniel A. Reed, Republican, of New York, from the Committee on Education to which the bill was referred.

The committee reccommended that the bill be passed as introduced.

A minority report, signed by Representatives B. G. Lowery, of Mississippi, M. C. Tarver, of Georgia, and Rene L. DeRouen, of Louisiana, all Democrats, was also submitted.

Majority Report

The majority report is in part as follows:

Apart from the precedent established by 49 years of congressional action, the committe feels that Federal aid to Howard University is fully justified by the national importance of the Negro problem.

"For many years past it has been felt that the American people owed an obligation to the Indian, whom they dispossessed of his land, and annual appropriations of sizable amounts have been passed by Congress in fulfillment of this obligation.

Negro-Indian

"The obligation in favor of the Negro race would seem to be even stronger thain in the case of the Indian. The Negro was not robbed of his land as was the Indian, but he was seized by forces and brought unwillingly to a strange country, where for generations he was the slave of the white man, and where, as a race, he has since been compelled to eke out a meager and precarious existence.

"Moreover, financial aid has been and still is extended by the Federal Government to the so-called land-grant colleges of the various states. While it is true that Negroes may be admitted to these colleges, the conditions of admission are very restricted, and generally it may be said that these colleges are not at all available to the Negro, except for agricultural and industrial education.

Medical Schools

"This is particularly so in the professional medical schools, so that the only class A school in America for training colored doctors, dentists, and pharmacists, aside from Meharry College, at Nashville, Tenn., is Howard University, it being the only place where complete clinical work can be secured by the colored student.

"There is furthermore, a strong practical reason why a school like Howard University should be maintained in the District of Columbia. The Freedmen's Hospital was authorized by Congress in 1904, and was built upon land owned by Howard University. The university generously leased the land to the Federal Government for 99 years, at $1 a year, with a privilege of renewal for a like period.

Hospital

"The existence of this hospital so near to the medical school of Howard University offords the students of the university an opportunity which exists nowhere else in this country to acquire the clinical instruction which is necessary to complete each student's medical course. On the other hand, this opportunity exists for white students in every sate of the Union.

"In addition to the great importance to the country of having an institution capable of developing trained leaders for the colored race in all walks of life, the urgent necessity of making possible a supply of properly trained physicians of that race for the protection of the health of all our people, white as well as black, must be plain to every fair-minded American citizen."

Minority Report

In the minority report, the annual appropriations ranging from $10,000 to over $500,000 are declared to have been made illegally for the reason that no law authorizing them has been passed.

The question involved, the minority report says, is the establishment of an unsound paternalistic governmental policy of "sustaining one university for one race by Federal funds, while the hundreds and thousands of schools for that race and all other races are left to state county, or municipal support, or to private philanthrophy." Such a policy is declared to be unfair, unwise and unjust.

Other Schools

Tuskegee Institute, Hampton Institute, Wilberforce University, Fisk University, Southern University, Straight College, Clark University and Spellman Seminary are pointed to as institutions meeting the demands for the education of the Negro without Federal aid.

The minority report says:

"The demand of Howard for this year is $390,000. Hardly a member of the House but can think of some worthy struggling college back in his home state that would be relieved of an unspeakable burden, and immensely promoted in usefullness by one gift of that amount. Then shall we go on from year to year making these large donations to the university for Negroes in the city of Washington while the constituents of our home schools pay the taxes and struggle on in poverty with their own institutions?

White Doctors Preferred?

"Some members of this House have expressed a hesitancy as to their vote on this bill because of the answer they may have to make to their Negro voters back home. It might be well for some to consider the answer to be made to their white constituents who are struggling so hard to maintain institutions for the education of their own young people.

"The plea is made that Howard University is a necessity for the purpose of preparing physicians, dentists, etc., for the service of the Negro race. In a very large part of the South that is not a necessity because the white physicians and dentists do practice for the Negroes, and the Negroes seem to prefer them.

District Funds

"But finally, if Howard must be supported for any reason, we submit that it should be done with District funds, just as other cities all over the Nation give large funds for great institutions of learning, because of the advantages material and otherwise which such an institution brings to the town in which it is located."

OUSTED

PHEOBUS, Va.—Circuit Court here declared Dr. A. A.Graham, photo above, was no longer pastor of Zion Baptist Church, whose pulpit he filled 22 years.

In an unguarded moment Dr. Graham said the church could get another pastor. The church took his advice and paid him off. Dr. Graham said he did not mean to resign but the Court held him to his word.

Boxer, 64, Spars With Wife; Freed

PHILADELPHIA. Pa.—Big Joe Butler, a former heavy-weight pugilist of four decades ago, because Joe is now 64 years old, was acquitted in the Municipal Court last week before Judge Crane of a charge of assault and battery and malicious mischief. The charges emanated from Mary Butler, 19th and Reed streets, who has made her homt with "Joe" for the past 22 years. She said, when she was removing the furniture which she claims was hers, "Joe" smashed the furniture and hit her with a piece of the rocking chair. "Joe" denied the statement made by Mary, and said, the furniture was his and he had worked hard for it. He said Mary moved it away on April 1st. He clearly remembered the day, because it was "April Fool's Day," and he was the fool. The jury acquitted him without leaving their seats.

If You Are Skeptical, Just Ask Your Neighbors

For 15 years Terpinoil has been helping people suffering from Chest Colds, Bronchitis back to health and strength.

In your own neighborhood, there are doubtless many men and women who had suffered one time or another from colds—and at last found in Terpinoil the so much wanted relief. Ask your own Druggist or Doctor—they will tell you what a splendid medicine it is.

Why shouldn't Terpinoil do for you what it has done for thousands?

Don't say, "it won't help me."

Get a bottle of Terpinoil, and see how quick it relieves the most obstinate cough, cuts the phlegm and makes breathing easy.

YOUR MONEY BACK IF IT DOES NOT HELP YOU.

Fair Enough—Isn't It?
