ALLIANCE FILES APPEAL AGAINST INJUNCTION WRIT OF BOYCOTT

Washington Boycott Body Plans Fight for Picket Rights.

WISH TO AVOID DELAY OF COURT

Ready to Go to Highest Court.

WASHINGTON.—The legal staff of the New Negro Alliance, has filed a formal notice of appeal last Friday, including a writ of error, in the District Court of Appeals.

This action marks the first step taken by the alliance to have the temporary injunction, served against the boycott-where-you-can-work organization by the Hecht-Kaufman Department Store, disclosed.

Belford V. Lawson, Jr., Thelma A. Arkin and William Henry Hastie, of the organization's legal staff, included in their motion a request for a special hearing in the injunction case, to restrain the New Negro Alliance from picketing the firm of Harry Kaufman, located at 1348 Seventh Street, northwest.

It was pointed out at the headquarters of the alliance that over a year's delay would take place, should the injunction fight be placed on the regular court of appeals' calendar.

Early this year the boycott organization, through its counsel, ordered the transcript of the district Supreme Court record of the case for the higher court.

It was shown that Justice Peter Dickerson Letts, of the District Supreme Court, ruled against the alliance, despite arguments of its lawyers centering around the Norris-LaGuardia anti-injunction act passed by Congress on March 23, 1932. It was further shown that citations by the Kaufman counsel were of cases dated before the passage of the anti-injunction act.

This legislation, passed by Congress, holds that employer-employee relationships are not necessary to place a case of this kind under a labor dispute. Taking this as a basis for argument, the lawyers for the alliance cited the Philadelphia theatre enterprise case in which the Pennsylvania court ruled that "a patron of a business enterprise is a colateral employee of such an enterprise, and as such has a direct pecuniary and profect conditions and arrangements under which such employees of said business are employed."

Spurred by the action of its legal staff, the local body consolidated all its divisions for completing a city-wide organization. Under the direction of Dr. Charles Robinson of the organization committee and Mr. Robert Weaver, administrator, work began this week with full speed to set up the 13 districts of the alliance, located throughout the city, into a powerful economic machine."

Prepare for Endurance Test

At a recent meeting of the organization, held in the Y.M.C.A. last Saturday, Robert C. Mcguire, reporting for the finance committee of the organization showed that the returns from the records from the District Supreme Court decision would amount to a very great sum. Other nominal costs in the case have been met, he said. The remarkable progress made in this direction showed that the organization engineers to do greater effforts in the interests of the all-important vacuum tube.

According to H. E. Lendenhall, in the Bell Telephone Laboratories, December, 1933, a tube of 100 kilowatt capacity, has been perfected at the Bell Telephone Laboratories. It is interesting to note that six tubes of this new type will provide a power more than the 30 tubes employed in the present transatlantic service.

HEALTHY SCHOOL CHILDREN IS AIM OF COMMITTEE

WASHINGTON.—How they might improve school health facilities was considered here this week, when a advisory committee of women met for luncheon for school children at a meeting in the commissioners' room in the District building.

A larger staff of nurses was urged to conduct periodical examinations of pupils and recommend proper treatment. It was pointed out that there are only 15 nurses available for pupils in the entire District school system.

Representatives expressed fear that taxpayers would be wasting funds through the absence of pupils due to illness, in view of the fact that the schools are maintained without regard for the number of pupils.

Harry M. Gardner, white, of the Emergency Relief, reported that 100 sterilizers have been ordered for 3 elementary schools, serving 3,500 pupils.

Mrs. John Wesley Jr., and Mrs. Joseph Saunders, both white, were appointed to form a parent-teacher committee for the child visiting and inspection of schools.

The cafeteria supplying food for the hot lunches has employed 10 additional men to handle the school work and expects to hire 10 more.

The hot lunch survey was expanded this week to a total of 4,000 children, 3,563 children were served, out of whom 1,812 were colored, according to George W. Beasley, member of the committee representing the president of the Federation of Civic Associations.

Present at the meeting were: Mrs. Frances W. Wilson, commissioner George Allen, Dr. Frank Boyle, Jr., Mrs. Mary Moor Bethune, Walter F. Uford, Leroy Halbert, Harry M. Gardner, Mrs. J. N. Saunders, Lowell Mellett, Harry M. Cummings, Mrs. Mabel T. Anna E. Murray, Father Sheahan, John Colpoys, Mrs. W. A. Roberts, Dr. Louise Stanley, all white, and Mrs. J. E. Pair, and George W. Beasley.

BELL PHONE CO. PERFECTS MORE POWERFUL TUBES

WASHINGTON.—When the first successful transatlantic telephone message was completed by Bell System engineers back in 1915, more than 500 vacuum tubes were required to conduct the voice currents from the wireless station at Arlington, Va., to the Eiffel Tower in Paris.

Since then vacuum tubes have undergone almost continuous development. The original vacuum tube capacity has permitted much longer and more frequent long wave transatlantic telephone conversations than the first capacity of 15 kilowatt rating.

The reduction from 500 to 30 tubes in the transatlantic circuit represents, as it does, the remarkable progress made in this period, but only served to spur telephone engineers to greater effort. Further progress was needed, they only served to spur telephone engineers to greater effort. Further progress was needed, they only served to spur telephone engineers to greater effort. Further progress was needed, they
