About Gossip

There ought to be a ducking stool for gossips. I mean that species of human who delights in informing the world about his brother's business, true or otherwise. I mean those people who hardly get their feet warm in the house before they ask, "what's the news, what's the dirt?" And then sit in conference and "dish it" coming and going, with the sky as the limit and no holds barred.

It burns me up to be somewhere and hear someone raked over the coals in his absence. Then when he enters the room, to hear that kind of sudden quiet descend that talks so eloquently.

There ought to be a law against that phrase, "I don't know how true it is, I only heard—", and that other classic, "well I heard it, but don't quote me." The two of them are simply a signal for the heads to draw close together and the whispering campaign that has resulted in many a tragedy, is on.

And what makes me sick about the whole business is, that most of the time the gossips don't even know whether what they are saying is the truth, and worst of all, they don't give a rap!

* * *

AT THE CLUBS—

Card club coteries are, perhaps, the worst offenders along these lines. One never needs to buy a newspaper to find out who isn't getting along so well with his spouse. In fact, the fourth estate is usually months late with the news.

The members of the whispering brigade know all about the affair before, even the most interested parties. And to tell the truth—they helped to engineer the situation by running to Jack with tales about Jill and back again. It seems as if they hate to see any family getting along too well.

And don't let a widow wear a wanna be gown. She is sure to be on the make for a new husband. They absolutely ignore the fact that she may be so glad to be free that a pair of pants wearing a million dollars may hang with diamonds simply wouldn't interest her.

And heaven help the single girl and bachelor who attend more than one social affair together. They'll have them middle-aisling in short order.

And don't let a friend wear a new frock—for if she does—the whole history of it is the chief topic of malicious conversation. A wonders where she bought it; B wants to know how much it cost; C says she saw one like it for $2.98; D wonders whether she can afford to buy a new frock; E is sure that someone—usually wearing pants—helped her to foot the bill; and on and on it goes, until the poor soul's reputatoin is in shreds.

AND THE MEN—

And lest anyone think I am holding forth exclusively about women, let me haste to say that the average men's gathering is not a bit better—for all they may say. I've heard a few "bull sessions" where they didn't know a skit-wearer was within hearing distance.

And, Oh Boy! the dirt was high. Did they burn the women up.

Personalities and morals were their chief topics of conversation and I am sure the father of liars must have inspired some of the tales.

To go back to the subject of ducking the gossips—I wonder who is the position to administer such an ordeal? Certainly not I. And certainly not a lot of other people that we meet every day.

But no matter who does this inspired talking—this one thing I have noticed. The person who does the most talking is the one who frequently knows the least about the whole affair. It is also evident that PEOPLE WHO ARE BUSY ENOUGH WORTHWHILE THINGS IN THE WORLD HAVE THE LEAST TIME TO TALK ABOUT THEIR NEIGHBORS.

Gossip is the sign of a stagnant mind. If you don't believe it—look at the gossipers.
