HENRY R. COSTAR—All the summer I have been troubled with Roaches and Mice. I was actually ashamed of the house, for the Roaches were every where. I purchased a box of your exterminator and tried it, and in one week there was not a Roach or Mouse in the house.

JOHN B. GIVENS, No. 94 Elm Street.

HOUSEKEEPERS—troubled with vermin, need be so no longer, if they use "Costar's" Exterminators. We have used it to our satisfaction and if a box cost $5 we would have it. We had tried poisons, but they effected nothing; but Costar's article knocks the breath out of Rats, Mice and Bed-Bugs, quicker than we can write it. It is in great demand all over the country. —*Medina (O.) Gazette.*

MORE GRAIN and provisions are destroyed annually in Grant County by vermin, than would pay for tons of this Rat and Insect Killer.—*Lancaster (Wis) Herald.*

HENRY R. COSTAR—Your Exterminator is received, used, and pronounced a decided success. We used a box of it, and the way the Rats and Mice around our premises "raised Ned" that night was a caution to sleepers. Since then not a Rat or Mouse has been heard in Kitchen or cellar.—*Magregor (Iowa) Times.*

I HAVE BEEN SELLING your Exterminator for the last year, and have found it a *sure shot* every time. I have not known it to fail in a single instance.

GEORGE ROSE, Druggest, Cardington, O.

WE ARE SELLING your preparations rapidly. Wherever they have been used. Rats, Mice, roaches, and Vermin disappear immediately.

What Constitutes a Good Sewing Machine.

1. It should be well made, simple in its construction, and easily kept in order.
2. It should make a TIGHT LOCK-STITCH, alike on both sides of the material.
3. It should sew any and all materials that can be sewed.
4. It should be able to use Cotton, Thread, or Silk direct from the spool.
5. It should be able to sew from coarse to fine, and from thick to thin, with rapidity and without changing the tension.
6. It should be able to make the tension greater or less, on both the under and upper threads, and with uniformity.
7. It should have a straight needle; curved ones are liable to break.
8. The needle should have perpendicular motion. This is absolutely necessary for heavy work
9. It should be capable of taking in the largest pieces of work
10. It should be able to bind with a binder, hem with a hemmer; should stitch, fell, run and gather.
11. It should be always ready to work.
12. It should be capable of using the same size of thread on both sides of the work, and of using different colored thread or silk, above or below, to correspond with any two colors of cloth to be united.
13. It should be able to make a long or short stitch.
14. It should be able to fasten off the seam, and commence sewing tightly at the first stitch.
15. It should run easy and make little noise.
16. It should have a wheel feed; none others are in constant contact with the work.
17. It should not be liable to get out of order.
18. It should not be liable to break the thread nor skip stitches.
19. It should not be necessary to use a screw driver, or wrench to set the needle.
20. It should not be liable to cut the operator's dress.
21. It should not form a ridge on the under side, nor ravel out, nor be wasteful of thread, as is the case with ALL CHAIN STITCH machines.
22. It should not be "more trouble than it is worth."
