SATURDAY - - - - - OCT. 31, 1874

BRUIN AT LARGE.

A BEAR ESCAPES FROM A RAILROAD TRAIN.

[From the Reading Eagle, Oct. 26.]

On Saturday about noon the people residing near Avon Station, on the Lebanon Valley Railroad, were in a fearful state of alarm. A huge black bear escaped from a freight car, jumped over fences advanced on the farm yards in that vicinity, and there was a terrible excitement. It appears that the animal was the property of a Mr. Diemer, residing near Wernersville. He owned the bear and was desirous of making it a present to an old friend of his at Palmyra Station on the Valley Road The animal was accordingly placed in a large hogshead and was chained in there. Both were then placed in a stock car. The train hands not thinking it possible for the animal to escape, closed but one side of the car, and the train started. They had not proceeded on their journey very far before a passenger train passed them, the engine whistling and the steam hissing in its escape. This, together with the rattling and rumbling of the train, scared Mr Bear, and he determined to get out of that hogshead. And he did He tore and twisted, and finally the chain snapped, the few boards that covered the top were forced off, and the bear got out in the car. Just as the train was rolling slowly into Avon, at the rate of eight miles an hour, the engineer looked back and was startled to see the animal jump from the car and scamper towards the fence. He shut off and shouted, "By thunder. there goes the bear!" and the bear did go. He went with one of those peculiar hop, skip and jump trots that only bears indulge in, over fields and fences, and finally he brought up in an apple orchard By this time another train came along. After putting everything into proper shape, and carefully seeing that the trains were in no danger, several of the crews started out to catch the bear. The farmers had by this time heard of the enemy, and they assembled with pitchforks and guns. The women folks drove in their geese and ducks, and doors were barred against the bear. The railroaders approached and the bear gaowled and snapped. Although tame, he was worked up to a high pitch of excitement, and it was dangerous to be near him. The railroaders skirmished and tried to outflank the bear, but it was no use. He growled and showed his tusks the same as any other bear, wild or tame. A rope was then procured, and an engineer undertook to lasso him, but the bear growled louder than before, and the knight of the throttle got out of the way and said he wanted "no more bear in his life." One of the brakemen, in his efforts to secure the animal, was severely bitten in the arm. At last, by a united effort, the bear was driven into a cow stall of a barn Then the farmer wished to know where he should keep his cows. The bear in the stable was an elephant on his hands, and he was in a terrible predicament. It was some time before the excitement died out, and the owner of the bear was telegraped for, who came and soon afterwards took charge of it. The railroaders again got on their trains and went on as usual, and to day the talk of the road is about the bear fight.

GRAND LODGE OF ODD FELLOWS OF THE UNITED STATES.—During the late session of the Grand Lodge of the United States at Atlanta, Georgia, the members thereof of the legal profession, thirty-six in number, pursuant to previous arrangement, visited in a body the Supreme Court of Georgia, and were presented to the court by Hon. J M. Durham, Deputy Grand Sire, as practising attorneys from every section of the country. Chief Justice Hiram Warner then extended to the visitors a cordial and hearty welcome, and said:

"We profess to administer the laws of the land here, independently and impartially. Whether we do so or not we are willing to be judged by the record of our proceedings, and invite your critical examination thereof. From my knowledge of our people, after an intimate association with them from the seaboard to the mountains for twenty-five years as a judicial officer on the circuit bench and as one of the judges of this court, I can assure you, with some degree of confidence, that the great body of them are conservative, law-abiding people It is true we have bad men amongst us, as they have in other States and organized communities, but I do not know that we are any worse off in that respect than others We endeavor to enforce the law here against all who violate it Georgia is not a very good place for the violators of the law, as we arrest and punish that class of people when found guilty for the protection of society. It is not only our duty as judicial officers to do that, but it is for the interest of the whole people that it should be done, otherwise there would be no protection for either person or property."

MAYOR WILTZ, of New Oorleans, has issued a proclamation requesting the closing of all drinking saloons on election day, and calling on all good citizens to preserve the peace. Between 5,000 and 6,000 fraudulent registrations of negroes have been discovered, but the authorities do not strike them from the lists. The Central Committee, of fifty Republicans, negroes, have issued an address, stating that they constitute nine-tenths of the Republicans of the State, asking an equal distribution of public patronage, and demanding that colored men be consulted upon all questions involving interests which they represent and the welfare of the people of the State

The Source of Many Ills.

If all the ailments, bodily and mental, which torment the human family could be traced to their primary sources, it would probably be found that three-fourths of them originated in the failure of the stomach and the other organs by which the food is converted into nutriment and applied to the purposes of life, to perform the tasks allotted to them by nature, vigorously and regularly. This being the case the vast importance of a medicine which compels these organs to do their whole duty, thoroughly and efficiently, becomes at once apparent Hostetter's Stomach Bitters may be truly characterized as a preparation of this kind, indeed as the only one which can be implicitly relied on as combining the propensities of a stomachic an alterative and an aperient in such proportions as to produce simultaneously the desired effect upon the disordered stomach, liver and intestines. This conclusion is warranted by the celerity and certainty with which the Bitters afford relief in chronic cases of dyspepsia, torpidity of the liver and constipation. The false idea that these complaints and others that grow out of them, could be cured by fierce cathartics, has at last, it is to be hoped, been thoroughly exploded. The sick during the last hundred years have swallowed thousands of tons of mercury, scammony, gamboge, croton oil, jalap, &c., and tens of thousands of graves have been prematurely filled thereby But ever since the principle of renovation, as embodied in Hostetter's Stomach Bitters, was arrayed against the principle of prostration as represented by mineral salivants and furious purgatives, the latter has steadily and surely fallen into deserved contempt. The outcry against stimulation by which concoctors of depleting drenches hoped to give *eclat* to their disgusting and dangerous compounds has only served to increase the demand for the wholesome stimulant, tonic and alterative which for twenty-five years triumphed over all opposition and is now the most popular medicine in the Western hemisphere.

MYSTERIOUS BELL RINGING.

A PUZZLE FOR THE BALTIMORE ACADEMY OF SCIENCE.

[From the Baltimore Sun.]

The ringing of the bells in a house on North Stricker street, above Cook, which has caused a little sensation in the northwestern section of the city during the past week, still continues to agitate the residents of not only that portion of the city, but on account of the publicity given to the affair the curious in such matters from all sections of the city visit the locality for the purpose of solving the mystery.—There has been no positive solution as yet of the exact cause of the ringing, although the matter has been investigated by several scientific men. A colored servant girl in the house it is considered exercises some unknown influence over the bells It is said she never approaches the wires but they vibrate The gentleman who resides in the house being convinced that the girl did exercise some influence over the bells, watched her movements for some time and noticed that the bells were much affected whenever the girl was near them, and at night, after the girl had retired in the third story of the house, there was not so much ringing; also that about twelve o'clock they generally ceased their clatter until the girl comes down stairs in the morning She was spoken to about the matter, and acknowledged that she had been discharged from a former position on account of the bells ringing and her supposed connection with it. She added that at another place, beside the one from which she was discharged, the bells did the same thing, but as the family were Spiritualists they did not mind it. The girl is very much worried over the matter, but says she is powerless to prevent it, as she is an involuntary bell ringer and she knows it, and will probably loose her present place on this account.

The house is a fine looking, three-story, brick building, and has never been occupied before the present tenant moved in. The girl is of very dark color and hails from Virginia Electricity has been tried upon the wires, thinking that the ringing may have been caused by that agency, but the electricity had no effect. The wire was detached from one of the three bells in the house, and while it was detached the bell did not ring, but the wire vibrated all the same. At times during the night the bells have become so annoying that they had to be muffled in order that the occupants of the house could sleep.—The bells began to ring in this way on Monday morning last, and continued to do so at intervals all through the week. One member of the family had his hand cut in trying to prevent the wire from vibrating Spiritualists attribute the ringing to spirit power, and are quite anxious to get into the house for the purpose of investigating the matter, but have been refused, and so many curious people have gone to visit the premises that a policeman had to be detailed to keep off the crowd. Mysterious as the ringing may be, there is no doubt, however, that it is caused by some perfectly natural agency. Several members of the Academy of Science have visited the house, but their scientific researches have failed to solve the mystery, and all the newspaper reporters give it up. It will be interesting to know however, whether the spirits will continue to ring when the colored girl leaves her situation.

JUST now there is some trouble among British officials on account of the disclosure of a State secret of great importance. The Gladstone Government paid the respectable sum of $80,000 for the exclusive secret of making the destructive "fish" torpedo, doubtless intending that this new and terrible instrument of naval warfare should be quietly kept out of public view, as Bismark kept back the needle-gun which won the victories in the Austro-Prussian war of 1866. When "distinguished foreigners" were admitted and permitted to go throught the constrretive departments at Woolwich, they were not allowed to see the "fish" torpedo, and mention of it in conversation was avoided or tabooded. Few but the persons entrusted with the making of this engine of wholesale slaughter of men and destruction of ships knew anything of its principle. Nevertheless, the secret has oozed out, for the German Admiralty has paid a large price for it to an Englishman who claimed to be the inventor. When Emperor William was at Kiel, the other day, at the launch of the formidable iron-clad Frederick the Great, he was so anxious to see the capabilities of the "fish" topedo fully tested that an experiment, the success of which much exceeded the expectation, was made under his own eye. In Prussia the secret is said to have been entrusted only to one officer and to the chief of the engineering department. The authorities in England disbelieve the idea that the "fish" torpedo was invented *twice*, and are persuaded that some treachery at Woolwich has betrayed the secret for which the Gladstone administration paid so largely.

A Substitute for Quinine.

For years, quinine was regarded as the only specific for malarious diseases, and immense quantities of the drug were annually consumed throughout our western country, more particularly along the river bottoms and adjoining low lands.

With the fall months malaria, in all its varied forms, stalks like an epidemic through the land, and whole districts are prostrated with chills and fever, the entire population shaking with ague. Heretofore, quinine was regularly resorted to; but, while it frequently failed to effect a cure, it invariably deranged the stomach, producing nausea, vertigo and fugitive pains in the head to such an extent that months elapsed ere the system recovered from its effects. These objections to its use were so marked, that the introduction of Mishler's Herb Bitters was hailed as a triumph in medicine. Infinitely more certain in its beneficial effects than quinine, it possessed none of the demerits of that drug. Instead of nauseating, it tones and invigorates the stomach, and while speedily expelling the noxious humors, increases the appetite and facilitates digestion, thus rendering the system stronger and better fitted to resist the attacks of disease. In fact, a judicious use of Mishler's Herb Bitters at this season of the year, will prevent the recurrence of this disease, even in those who have never passed an autumn without it. An experience of twenty years proves it to be the greatest ANTI-PERIODIC known to medical science.

There are, perhaps, no diseases so subject to climatic changes as affections of the Kidneys. Hundreds of our farmers, mechanics, and laboring men, strong and hardy in all other respects, suffer continual inconvenience, and occasionally excruciating pains in the back and across the loins; experience a frequent desire to pass water, pain during its passage, and frequent stoppages in its flow. These are manifestations resulting from some strain or heavy lift (perhaps years ago), and aggravated by every change in the weather. Every slight cold flies direct to this one weak spot, and unless promptly attended to the disease becomes chronic, and the once strong man a miserable wreck. Mishler's Herb Bitters is the *only certain* remedy for this class of diseases. It has a peculiar tendency to the kidneys, stimulates them to healthy action, and removing the cause, prevents the formation of brick-dust deposits, which, if permitted to continue, will by cohesion form gravel stone, necessitating a painful operation for its removal. Many of the ingredients entering into its composition, are universally recognized as specifics for all complaints of the urinary organs. In Liver Complaint, Dyspepsia, all disorders of the Bowels, and affections of the Throat and Lungs, it is equally certain and efficacious; while, as a remedy for the complaints peculiar to the femal, sex, it has no equal. LADIES, old and younge married and single, in every condition of life, will find this GREAT FEMALE REMEDY *prompt, safe certain and reliable*. The pale, sallow complexion is replaced by a blooming, healthful countenance, and its *occasional use* enables Nature to perform her functions REGULARLY AND WITHOUT INCONVENIENCE. Sold only in bottles by all Druggists and general dealers.

Why suffer with a bad cold if one bottle of Dr. Bull's Cough Syrup will cure a cough of the worst kind. Dr. Bull's Cough Syrup is sold for 25 cents per bottle, or five bottles for $1.00, in every respectable drug store in the United States.

JOSHUA GRIFFIN, the negro charged with the murder of Miss Susan Taylor, near Aberdeen, Harford county, was born in the jail at Belair.

DOWN-TOWN

Clothing and Variety Store

JOHN K. WILLIS,

IS prepared to accommodate the public at Bacchus' old stand, corner High and Queen Streets, with

CLOTHING AT CITY PRICES!

Coats from $1 up; Under shirts and Drawers from 50 cts. up; Neck Ties 3c, 5c, 10 and 15c. Straw Hats 18 to 20 cts., and other goods in proportion.

Flour, Meal and Feed of all kinds.

BACON, DRIED BEEF, SAUSAGE, FISH, all at the very lowest prices.

Groceries, such as Sugar, Coffee, Tea, Syrups, &c., &c., a full supply, which require only to be seen to secure sales.

Notions.—A large variety of goods in this line, to which special attention is paid. Give me a call.

JOHN K. WILLIS.

DUGDALE'S

UNRIVALLED

EXCELLENZA

BONE SUPER PHOSPHATE

FOR THE

Wheat Seeding of 1874!

OUR SUPPLY OF "EXCELLENZA" of this Fall has been prepared with special reference to the wants of the Wheat Crop—The necessary elements for the growth of this cereal have been increased, and the mechanical condition greatly improved.

So far as we have been able to learn, the "EXCELLENZA" has given the most complete satisfaction to nearly all who have used it, and MANY UNHESITATINGLY PRONOUNCE IT TO BE THE

BEST FERTILIZER

THEY HAVE EVER USED.

We use *no South Carolina Rock, no insoluble Guanos of any kind, no adulterative matter.*

Pure Dissolved Bone

And Rich Nitrogenous Matter,

Treated with SULPHURIC ACID, are the ingredients which compose the EXCELLENZA.

We earnestly invite all Farmers who have not given it a trial, to TEST IT alongside of other brands no matter how high their reputation, or how high their price.

We submit to the consideration of Farmers the following letters:

BAKERVILLE, KENT CO., MD., July 25, 1874.

Messrs. Geo. Dugdale & Co.:

Gents:—I have used your Excellenza Bone Superphosphate on my Wheat for three years. It has always given me entire satisfaction. I regard it as second to no fertilizer I have ever tried. JAS. H. BAKER.

CENTREVILLE, MD., July 21st, 1874.

Messrs. Geo. Dugdale & Co., Baltimore, Md.:

Dear Sirs:—Having sold your "Ammoniated" and "Excellenza" Phosphates for the past four seasons, and each season used them on my own farms, I take great pleasure in saying that they have given those to whom I sold them, as well as in all the cases in which I have used them myself, general satisfaction.

Yours, truly, WM. MCKENNEY.

GEO. DUGDALE & CO., Baltimore, Md.

To Wheat Growers.

"EXCELSIOR."

1874. 1874.

The most concentrated, universal and durable Fertilizer ever offered to the farmer—combining all the stimulating qualities of Peruvian Guano, and the ever durable fertilizing properties of Bones. In fine dry powder, prepared expressly for drilling, and can be applied in any quantity, however small, per acre. It is the opinion of many close calculating Farmers after SIXTEEN YEARS' experience in testing it side by side with other popular fertilizers, that an application of 100 pounds of Excelsior is equal to from 200 to 300 pounds of any other fertilizer or Guano, and therefore fully 100 to 200 per cent. cheaper.

UNIFORMITY OF QUALITY GUARANTEED BY THE MANUFACTURERS.

Farmers should see that every Bag is branded as above, with the ANALYSIS and OUR NAME in RED LETTERS. All others are counterfeits. **Price $55 per Ton.**

WHANN'S

Raw Bone Super Phosphate

IN the culture of WHEAT, true economy implies the use of such manures as produce the greatest yield, and at the same time leave the land in the best condition for grass.

WHANN'S RAW BONE SUPER PHOSPHATE is extensively used on this important crop, for the reason that it fulfills these conditions—the Grass often paying for the Fertilizers, leaving the increased yield of Wheat clear profit.

No Fertilizer has ever excelled it, combining the active qualities of the best Peruvian Guano with the more lasting properties of dissolved Bone, it is unexcelled as a manure for Wheat. Those Farmers who have used

Whann's Raw Bone Super Phosphate,

need no reminder as to its worth. Their continued use of it year after year is the strongest argument which can be brought to prove its merits.

The following testimonials from two well known Farmers will be appreciated:

HANESVILLE, KENT CO., MD., July 17th, 1874.

Messrs. Walton, Whann & Co.:

Gentlemen:—I have used Whann's Raw Bone Super Phosphate on my Wheat for the past two years. I am very much pleased with its action both on Wheat and Grass, and regard it as one of the best Fertilizers on the market, and a permanent improver of the land.

Yours, truly,

WILLIAM T. ANDERSON.

CHESTERTOWN, MARYLAND, July 16th, 1874.

Messrs. Walton, Whann & Co.:

Gentlemen:—I have been using Whann's Raw Bone Super Phosphate on my farm near Chestertown nine or ten years. It has never failed to give me satisfaction both in its results on Wheat and the Grass following. I regard it as second to none, and expect to continue its use.

Respectfully, yours,

S. LECATES.

FARMERS who have not yet used this renowned Fertilizer are earnestly requested to TRY IT.

ITS MECHANICAL CONDITION IS EXCELLENT, prepared EXPRESSLY FOR USE WITH THE DRILL.

Pamphlets and Circulars mailed free on application.

Texas Bone Meal

IT is now nearly three years since we first introduced our

Texas Bone Meal

in the Market. We sold the first ton, with the confident assurance that if strictly pure goods would establish reputation, we were sure to obtain it, and the result has confirmed our belief. Farmers who have used it, and dealers who have sold it, give it the preference, and heretofore we have been unable to meet the demand. C. C. Fulton, Esq., editor of the *Baltimore American*, recently visited Texas and was at our Factory, located at Fulton, Texas. In writing to his paper, under date February 24, 1874, and published in the American Weekly, March 14, he says of our Texas Bone Meal:

"After drying the residuum of Bones and Meat, it is ground to a fine powder, producing a fertilizing material but little inferior to Peruvian Guano. It smells very much like Guano, and if there is any virtue in bones, blood and animal matter, it ought to be a superior fertilizer. The material is too abundant to induce any temptation to give anything but the pure article, and as I witnessed the operation, I can vouch for its genuineness, that is to say, that it is all pulverized bone, flesh and blood."

This was testimony we had unsought and unknown, until we had several inquiries from the readers of the "Baltimore American."

We recommend the use of the TEXAS BONE MEAL to farmers, assuring them that it is strictly pure and will always be kept so.

The Analysis of Texas Bone Meal, made by Dr. T. R. Wolf, State Chemist, Newark, Del., July 17, 1874, is as follows:

Ammonia - - - - - -	4 55
Phosphoric Acid - - - - -	24.25
Equal to Bone Phosphate of Lime -	52 968

This Analysis will compare favorably with any other in the Market.

PRICE $45 PER TON—2,000 lbs.

CALL AND SEE BEFORE BUYING ANY OTHER KIND.

THE

FARMER'S FAVORITE,

OR

BICKFORD & HUFFMAN

GRAIN DRILL.

HINES & BURCHINAL

Agents for Kent and Queen Anne's Co.'s

FOR THE ABOVE DRILL, HAVE ON EXHIBITION at their Ware House, next to the Kent National Bank, one of

The Improved Drills for 1874.

This Drill has stood the test for several years as CHAMPION OF GRAIN DRILLS. THE ONLY GRAIN DRILL which throws out of gear by the Automatic action of the TUBE LIFTER, and covers all the seed distributed.

TUBE SHIFTER, to enable the farmer to change the Tubes from a straight to a zig-zag, without raising the Tuber or stopping team.

THE IMPROVED

Fertilizer or Guano ATTACHMENT

For 1874.

SURPASSES ANYTHING IN THE MARKET. Sows Guano, Super Phosphate, Bone Dust, Lime, Ashes, Salt, Plaster, or any Fertilizer, DRY OR DAMP, in desired quantities per acre. Never fails to perform.

The complaint about Drills not sowing Damp Fertilizers ceases with this Drill, as it has been obviated by the above Guano Attachment.

HINES & BURCHINAL sold Two Car loads last Fall of the New Style, and they gave perfect satisfaction, as the following Certificates will show:

NEAR CHESTERTOWN, KENT CO., MD., July 8th, 1873.

To Messrs. Hines & Burchinal, General Agents for the sale of Agricultural Implements, Chestertown:—Gentlemen: I have the highest appreciation of the merits of Bickford & Huffman's Eight Tooth Wheat and Guano Drill. The arrangement, for simplicity and good execution, I have never seen equalled in the workmanship of any similar Agricultural Implement. The Guano Attachment of this Drill is a *very gem* of excellence, and must soon establish its utility and superiority beyond cavil. In short, this is the best "Combination" Drill with which I am acquainted, and therefore, in recommending it to the consideration of Farmers generally affords me not a little pleasure.

JOSHUA COPPER, Farmer.

CHESTERTOWN, Kent Co., Md., July 9th, 1873.

MESSRS. HINES & BURCHINAL—*Dear Sirs:*

The Latest Improved Bickford & Huffman Drill I purchased of you last Fall gives me perfect satisfaction, in both seeding of Wheat and Fertilizers, sowing them both regular, and it is my impression it far surpasses any Drill I ever saw, and I would cheerfully recommend it to the Farmers of Kent co The late improvement beats anything I ever saw for seeding Fertilizers.

ISAAC PERKINS.

STILL POND, Kent Co., Md., May 8th, 1874.

THIS IS TO CERTIFY that I bought of HINES & BURCHINAL last Fall, one of the Bickford & Huffman Improved Wheat and Fertilizer Drills, which I pronounce the best I have ever seen My son bought a Delaware Drill at the same time, and says he likes mine better.

I think, and in fact know, that the Bickford & Huffman is the best Drill. It sows the Guano *perfectly even*, and it is the only Drill I ever saw that did.

JAMES A. ROSEBERRY.

They also refer to:

GEO. W. T. PERKINS, WM. H STEWART
R. SAMUEL BECK, JOHN BRICE,
SAMUEL TAYLOR, WILLIAM FORD,
AND OTHERS,

Who will give the highest testimony in favor of these Drills

Persons in want of a good Drill, should call and see the NEW STYLE for 1874.

Those in want of a 9-tube with shaft, will give their orders as soon as possible, as the Company make all 8-tube with tongue, unless otherwise ordered.

HINES & BURCHINAL,

Chestertown, Md.

FERTILIZERS.

We also offer to Farmers the following well known brands of Phosphate:

Rhodes & Company's.

Watson & Clark's.

And Pacific Guano.

We offer the above Phosphate on time and reasonable terms, delivered either on Sassafras or Chester River and their tributaries. Call before buying.

HINES & BURCHINAL,

Aug. 15—3m. Chestertown.

NOTICE.

To Hotel-Keepers, and all others who deal in Liquors.

FOR the information of all persons concerned, the following Act of the Legislature, passed March 24, 1865, is published:

CHAPTER 191.

AN ACT prohibiting the sale of Spirituous or Fermented Liquors in the several Counties of the State on the day of Election.

SEC. 1. Be it enacted by the General Assembly of Maryland, That it shall not be lawful for the keeper of any hotel, tavern, store, drink ing establishment, or other place where liquors are sold, or for any person or persons, directly or indirectly, to sell, barter, give, or dispose of any spirituous or fermented liquors, ale or beer, or intoxicating drinks of any kind, on the day of election herein after to be held in the several counties of this State.

SEC. 2. And be it enacted, That any person violating the provision of this Act shall be liable to indictment by the Grand Jury of the County where the offence is committed, and shall upon conviction before any Judge of any Circuit Court of this State, be fined a sum not less than fifty dollars, nor more than one hundred dollars for each and every offence, one half of the fine to be paid to informer, and the other half to the County Commissioners for the use of public roads.

EDWARD PLUMMER.

Sheriff of Kent Co.

A LECTURE TO YOUNG MEN.

Just published in a sealed envelope.

Price Six Cents.

A Lecture on the Nature, Treatment and *radical cure* of Seminal Weakness or Spermatorrhoea, induced by Self-Abuse, Involuntary Emissions, Impotency, Nervous Debility, and Impediments to Marriage generally; Consumption, Epilepsy and Fits; Mental and Physical Incapacity, &c.—By ROBERT J. CULVERWELL, M. D., author of "Green Book," &c.

The world renowned author, in this admirable Lecture, clearly proves from his own experience that the awful consequences of Self-abuse may be effectually removed without medicine and without dangerous surgical operations, bougies, instruments, rings, or cordials pointing out a mode of cure at once certain and effectual, by which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically

This Lecture will prove a boon to thousands and thousands.

Sent, under seal, in a plain envelope, to any address, postpaid on receipt of six cents, or two postage stamps.
