QUOTES EXAMPLES ON NAT. MONOPOLY Members of the Elkton Rotary Club and their invited guests enjoyed a most interesting address by Dr. Harrison E. Howe, of Washington, governor of the Thirty-Fourth Rotary District, at their regular Tuesday evening dinner meeting held at the Howard Hotel. Dr. Howe, a chemist, is editor of the Industrial Chemical Engineer, national publication. After a short talk on Rotary as an international organization, he

At one time, the speaker gave as an example, the Germans held a monopoly amounts of which were imported into this country yearly at a very great cost. ple cover the heads of saints' statues This high cost of the product was due possible to the Collector of Customs, so rots, lettuce, pens, spinach, potatoes, with little bonnets. These hats follow to the monopoly held by the Germans. Scientific chemical research by chemists of this country made it possible for them to produce a similar product equally as effective as the monopolized bromide and that could be manufactured in this country at a much lower cost than the imported product. This broke the monopoly and caused the price of the imported goods to be dropped to a minimum.

gave specific examples of various chem-

ical commodities and the effect they

have had on international relations in

He also cited a number of other instances in which national monopoly of one country had been broken by scientific research by chemists in this coun-
