The Kent News.

SATURDAY.....OCT. 16, 1880.

SENATOR BAYARD ON THE TARIFF.—Senator Bayard, of Delaware, in his late speech before the business men of Philadelphia, said:

"I hope to see the day, not when the manufacturing industry of this country shall be lessened or restricted because we have no market for it but our own, but I do propose, so far as my contribution of vote and voice may go, so to establish the duties upon imported merchandise that the American manufacturer may receive as much of his commodity free of duty as is consistent with the repletion of the treasury of the United States, so he can go abroad able, not simply to compete, but overcome his competitors from other markets in the world. I wish to refute as radical, absurd and untrue the suggestion that the Democratic party, being, as they are to-day, the great majority of the people of the United States, has any intention of casting down the system of tariff duties under which the capital of the country has been invested, and under which the labor of the country is profitably employed. But I do propose, under proper restrictions, deliberately, equitably and wisely, and above all permanently, to establish such a system as not only will not restrict our manufacturers, close a single mill, silence a single loom, or drive a single hand from employment, but aid capital invested in manufactures and labor, and make America the workhouse of supplies for the world."

THE REASONS.—James A. Scott, a very able colored man living in Montgomery, Ala., has written a letter to Senator Conkling to show why the colored people of the South are now almost solid against the Republicans.

He gives as the reasons: 1st, all the promises made made by the carpet-baggers were falsified, and the blacks were used, and the carpet-baggers got all the offices. 2d. Many colored people plundered by the Freedman's Bank. 3d. The blacks, under Democratic State control, have for six years, had their political and personal rights respected, and their children have good schools. 4th. The blacks have found out that the debts that were piled up on both States and counties by Republicans are burdens on both whites and blacks, and that under Democratic rule all are most prosperous. 5th. They have found the school funds more honestly expended by Democrats than they were by Republicans, and the colored people have schools for twice as many months under Democratic management as they had under Republican. 6th. They find that under Democratic rule crime has been decreased fifty per cent., and there is far greater harmony between whites and blacks, and the blacks prefer to go with Southerners to going with strangers with whom they have no common interests.

SUGAR FROM THE BEET ROOT.—The complete success of the manufacture of sugar from the beet root in France and Germany has given an impetus to the same industry in the United States, and before long it is not improbable that the sugar beet and the sorghum plant will be recognized as important competitors with the sugar cane of Louisiana and Cuba. The sugar from Hawaii is imported into California under treaty stipulations duty free. But even with this special privilege accorded to the States of the Pacific coast, three sugar beet factories have been established in California, working under American processes, the foreign having failed, one of which, it is reported, will use in sugar-making 8,000 tons of beets the present year, and success has so far attended its manufacture that the capacity of the establishment is to be increased. Another manufactory of sugar from the beet is at Los Angeles, and a third in Southern California near San Diego. There are also similar manufactories in the Eastern States, one in Delaware, another in Maine, and a third in Massachusetts. One company is also making beet-root sugar in Canada, and a second company is said to have been formed there, but is yet not in operation. The extent of the manufacture of beet-root sugar in France and Germany may be best understood from the fact that in France alone 500 factories are in operation, and quite a large number in Germany, and that England imported of these sugars from those countries in 1879 no less than 375,588,660 pounds of unrefined sugar and 337,588,600 pounds of refined.

A BRIDAL BOWER.—The Rochester (N. Y.) *Herald* of Wednesday says: "At the residence of Mr. James Vick there took place last evening the marriage of Mr. Halbert Thayer and Miss Annie Vick. Rev. Dr. Stratton performed the ceremony, which took place in a large tent erected specially for the occasion and connected with the mansion by a covered arch. The tent was brilliantly illuminated with bunting. Suspended from its centre was a magnificent floral parasol, composed of dahlias, roses and carnations. At the end opposite the door there was an elegant bower covered with ferns, smilax and gladiolas. Above and in the centre of this bower was seen a superb floral heart composed of roses and pierced with an arrow. The happy parties to the marriage contract joined hands and heart within this bower.

A ROMANTIC relic of Cowpens battle was shown by Mr. Wm. J. Randolph at King's Mountain during the centennial observance last week. The relic is a plain 22-carat gold ring, which was found on the Cowpens battle-field in 1821. The inscription reads: "This and ye giver is yours forever, 1722." It was presented to a British officer by his sweet-heart before his departure with Lord Cornwallis for America. The officer, who was killed at the Cowpens, also wore buttons of 20-carat gold on his uniform, and some of the buttons are still owned in the Carolinas. One was presented to Gen. Lafayette in 1826, and others were sent to England, the coat-of-arms on them revealing the family to whom they belonged.

PIUS IX prescribed in his will his burial place and that not more than $400 should be expended on the monument above it. Leo XIII, desiring to do his predecessor due honor, he asked a commission of cardinals how this could be done without seeming to be disrespectful, and the cardinals have suggested spending the $400 in a small monument, around and over which a costly one may be reared at the expense of the princes of the church of the late Pope's creation.

MR. BLAINE is reported to have expressed the opinion that Gen. Grant made a grave mistake in attempting to criticise Gen. Hancock as an officer and as a man. By this time, probably, Grant thinks so himself.

A STATEMENT, prepared at the Treasury Department, shows that there are 234 persons employed in the Baltimore custom-house, and of this number 73 have been either in the army or navy.

The Improved
WATER
Elevator
AND
Purifier!

AS A WATER ELEVATOR it has these merits: 1st—It is the Simplest Structure for raising water, on the American market. 2, it is easily adjusted to any well or cistern. 3, it is very durable. 4, it works easily. 5, it will NEVER freeze. 6, it is always ready for use and always at its best. 7, it has none of the objections common to pumps. 8, it will make warm water cold.
All who examine this invention admit the above claims, but ask
How Does it Purify Water?
As the inverted cups pass around the Terra Cotta wheel suspended in the chain at the bottom of the Well or Cistern, they are constantly discharging air through the water from the bottom to the top.
This elevator will destroy *Wiggles, Water Bugs and Water Lice*, will make *foul or stagnant water pure*, and will remove all *color, bad taste and smell*. In short, *it will make bad water good, and good water better.*
The undersigned have secured the exclusive right to sell this really valuable Pump in Kent county and they earnestly ask for it a candid and fair examination, confident of its intrinsic merit. One can be seen on exhibition in Chestertown at any time. For circulars address

W. N. E. WICKES,
AGENT FOR THE SALE OF
LISTER'S STANDARD PHOSPHATE.
This Phosphate, so extensively used, is offered to the WHEAT GROWERS of Kent County at LOWER RATES than heretofore.
THE MERITS of "LISTER'S PHOSPHATE" are so well known and universally acknowledged, that the publication of certificates is deemed unnecessary. Any farmer who has used and tested it is referred to as to its qualities as an IMPROVER, a grain producer, and a great promoter of the growth of Clover, &c.
☞EARLY ORDERS are solicited.
☞In my absence, information can be obtained at WICKES & BROTHER'S, and orders left with them will receive prompt attention.
☞It is in good condition for Drilling. aug21-3m.

PHOSPHATES,
Always in Excellent condition for Drilling,
MANUFACTURED BY
KENNARD & CO.
Our IMPERIAL at $30 time and $28 Cash.
ACIDULATED at $27 time and $25 Cash.
THE ABOVE BRANDS are made to suit the requirements of all farmers; some desire a general mixture, while others prefer a thoroughly acidulated article, and our object being to accommodate all, we therefore prepare our two special brands, and in addition thereto carry a
FULL LINE OF CHEMICALS,
in order to meet any demand for special formulas. These we furnish at Balt. prices.
☞Our goods have been thoroughly tested, and everywhere have been proven to be equal to any and superior to many of the articles in the market.
We pay no commissions to agents and are satisfied with a small margin ourselves, and hence the low figure at which we sell.
A visit to our Factory will afford you an opportunity to judge of the quality of our goods, and the following persons can furnish any information as to their merit:

To WHEAT GROWERS.
The undersigned, PIONEER in the manufacture of Fertilizers in this city, and ORIGINATOR in 1858 of the Formulas and processes of manufacture of
"EXCELSIOR" and Ammoniated Phosphate
So well and favorably known by the Agricultural public, relying upon his experience and personal reputation hitherto acquired in the uniform excellence of these Fertilizers, as manufactured by him, continues to offer them to the Farmers and Planters of Maryland and Virginia, with the assurance that the high standard quality of each will be maintained as heretofore.

The above are the most concentrated FERTILIZERS ever offered to the farmer—combining all the stimulating qualities of Peruvian Guano, and the ever durable fertilizing properties of Bones, in fine, dry powder, prepared expressly for drilling.
For growing Wheat, it is the universal opinion of the Farmers of Maryland and Virginia, after over twenty years' experience in the use of these Fertilizers manufactured by me, that an application of 100 pounds is equal in its effects to 200 pounds of any other fertilizer or guano, therefore fully 50 per cent. cheaper.
With my present advantages and superior facilities for manufacturing, I challenge competition with any Fertilizer sold in the United States, in Quality, Mechanical condition and Price.
By strictly adhering to my Original Formulas, using only the most concentrated materials and superintending in person their manufacture, as for the past *twenty years*
UNIFORM QUALITY IS GUARANTEED.
☞Farmers, to secure the ONLY GENUINE EXCELSIOR and PHOSPHATE prepared according to my Original Formulas established in 1858, should see that every Bag is branded as above, with the ANALYSIS and MY NAME IN RED LETTERS.
