FARMERS' DEPARTMENT.

"He who by the plow would thrive,
Himself must either hold or drive."

DOES FARMING PAY.

We often hear it said that there is no longer any money in farming. In the course of our experience we have heard similar statements concerning other occupations. A printer, adhering in these days to the old-fashioned hand press, might make the same complaint, and with as much justice as the present farmer, who carries on operation in the old style or a carpenter who makes his mouldings by hand or planes boards. The improvements in machinery of all kinds have so quickened the demand for labor in every branch of industry, that the farmer as well as the mechanic must abandon hand labor and use machinery, or his profits must be eaten up in expenses. Hay may be made and put into the barn by machinery now at the rate of one dollar per acre. By hand the cost would be four dollars. The old style of crop is half a ton per acre; now three times that is a fair crop. The difference is just that between eight dollars per ton and sixty-six cents. The wide awake farmer has this difference for his profit, eight dollars being about the market price of hay in many places. The same is true of most other crops, grain and roots especially. In feeding stock and making and using manure, equally large differences result. So of breeding stock; the old style rooter, and the modern Berkshire, are not more unlike, than are their several values when made into pork. The same of the ill-fed, rough-coated, native heifer or steer, and the sleek, well-fed grade Jersey, or Ayrshire. The same is true of many farming communities in respect roads, fences and schools. All these must be fitted up with *modern improvements*, or farming as a business must suffer. We *know* whereof we speak, when we emphatically deny that farming is an unprofitable business. The capital invested will, if rightly used, return in this branch of industry as good an interest as in any other, besides having the invaluable merit of indestructibility. A work-shop or factory may burn up, but land remains not only intact, but from uncontrollable circumstances is ever advancing in value. So the labor of the farmer is sure of some renumeration if properly directed. Poor farms and poor farmers are the ones whose crops fail through drouth or excessive wet. On a properly conducted farm these may damage the crop, but will never destroy it.—The divine promise of seed time and harvest is for the especial benefit of the farmer; but it rests with himself in a great measure whether the fulfilment to him individually, or whether his more enterprising neighbor secures it.—*Ag.*

Underdraining.

At a Pennsylvania Agricultural Society, the following statements were recently made by a Bucks County farmer. He began by draining four acres, in which he put down about 4,000 feet of tile, something over 60 rods to an acre, the drains being about 40 feet apart. The work was done in a very thorough manner, the ditches being four feet deep; pipe tile, with collars, were laid, the mains being three inches in diameter, and the latterals an inch and three fourths.—The collars, by holding the ends of the pieces evenly together, give every piece a chance to run its full capacity of water. A tightly stretched cord was used for regulating the grades of decent, an operation which always requires considerable care and some engineering ingenuity. Although the whole work was done in the most thorough manner, and obviously somewhat more expensively at the start than most underdraining, yet the increase in the crops has paid the owners at least 20 per cent. on the investment, his money doubling every five years. Another farmer in the same county had two acres of land, previously unfit for cultivation, drained in this thorough manner, that yielded him 125 bushels of corn in a year, or at the rate of 62½ bushels per acre.

How to Milk.

The *Rural American* says: It is a fact that a poor milker will spoil almost any cow, and there are but few people who are aware of the fact that in the mere process of milking, a great difference is made in the yield of a dairy cow. The ability to bring a cow to the largest yield of milk, varies greatly with different milkers, as many persons who consider themselves good milkers, are in reality very poor ones. Owing to the fact that a large proportion of what a cow gives at a milking, is secreted during the process of milking, it must naturally follow that unless the cow is in a quiet, contented state of mind, and satisfied with the milker, the usual secretion of new supplies during the milking will not take place. It is generally owing to this cause that cows oftentimes hold up their milk, as it is termed, and this cannot be obviated so long as the cow is in a restless state of mind, and dissatisfied with her milker.

An exchange says that six years ago, a Scotch dairywoman did most of the milking of a herd of nine cows. She was the best and quickest milker that we ever knew. The cows gave an unusually large quantity, and continued their milk later than usual. The next year the same job was mainly done by less skillful hands, and the result demonstrated that the loss was at least ten if not twenty per cent.

SINGULAR PHENOMENON.—At Buffalo last Saturday evening, the *Express* says, a most singular phenomenon was observed. As viewed from a certain point the sun appears to sink into the waters of the lake, and presents a beautiful sight on all ordinary occasions, but at the time referred to, just at the moment when the sun appeared to be floating as if it were a ball of fire on the surface of the lake, it suddenly assumed a conical shape, as if of molten iron and the sides had run down, the whole form evidently magnified to twice its usual size. Directly in the centre of this ball of fire was plainly visible the form of a ship, as if sailing in and a part of the sun. The like of this was never before seen in that locality.

A MAN in Cayuga county, New York, has a remarkable Cochin China rooster. He has observed his master's practice of family worship, and as soon as the Bible is taken to be read, before prayer, the rooster walks in deliberately and takes his stand by the side of the woman of the house, and there remains in a very quiet and reverent posture during the whole of the service, seeming to understand the words, for as soon as Amen is repeated, he walks out without noise and joins his family of hens. The children of the family, in their out-door plays, have the company of chanticleer simply by calling him "Cochin." He allows them to put their arms around him and perform other acts of playfulness.

THE best way to kill the thistle in patches and fields, is by the copious application of salt. If before a rain the stalks are cut off close to the ground and salt poured into the cavities, it will be sure to destroy them.

NEVADA has a Spring that will color the hair a jet black.

MISCELLANY.

ORIGIN OF THE CORONER'S INQUEST.—A gentlewoman in London having buried six husbands, found a suitor hardy enough to make her a wife once more. For several months their happiness was mutual, a circumstance which seemed to pay no great compliment to the former partners, who had disgusted her, she said, by their drunkenness and infidelity. With a view of ascertaining the real character of his mate, the gentleman began to absent himself, and returned at late hours in a state of apparent intoxication. Reproaches at first, and menaces in succession, were the effects of his coudnct. The gentleman persisted, and seemed to become daily more addicted to his vices. One evening when she thought him senseless or asleep she unsewed a leaden weight from a fold in her gown, and having melted it, approached her husband to pour it into his ear. Convinced of her wickedness, the gentleman started up, seized her, and having procured assistance, confined her until morning, when she was carried before a magistrate who committed her to prison. The bodies of the six husbands were dug up, and as marks of violence were discernable upon the whole of them, she was brought to trial and convicted of murder. To these circumstances we are indebted for the most useful institution.

QUICK WORK.—A gentleman recently visited a shoe factory in Lynn, Mass., and became greatly interested at the rapidity with which a young lady performed the work of fastening the tops and soles of ladies' boots together preparatory to lasting. One of those having the management of affairs expressed the opinion that she could do twenty cases in ten hours. The gentleman first mentioned could not credit this, and offered to stake $1,000 against five hundred that the feat could not be accomplished. The wager was accepted, the young lady acquainted with the facts, and asked if she could do it.—She replied that she was willing to try, provided she should have a share of the money she should win. This was agreed to and the task was commenced. At 12 o'clock on the next day she had eleven of the twenty cases finished and packed ready for the laster, and at ten minutes inside the ten hours the task was completed. The incredulous gentleman paid the wager of one thousand dollars, and the winner handed the young lady five hundred of it. This, together with the sum earned by doing the work, made pretty fair wages for one day, and any one can see by a little calculation that she had to keep pretty busy. There were in each case sixty pairs, four pieces to a pair, making two hundred and forty pieces of leather to be handled, and as many nails to be driven. In the twenty cases there would be forty-eight hundred pieces to take care of in ten hours, which was done; thus averaging four hundred and eighty per hour, or eight in one minute.

CATHOLIC MISSION FROM ENGLAND.—A cable dispatch announces the sailing from England on Saturday of the first Roman Catholic mission ever dispatched from England to America, consisting of four priests, whose duty it will be to labor exclusively among the colored people. This is evidently the same mission referred to in the Baltimore *Sun* of Friday last, which is to have a permanent establishment near Bryantown, Charles county, Maryland. The priests, it is stated, are of the St. Joseph's Society. The mission was inaugurated in England, and Archbishop Spalding has donated sixty acres of land upon which it is located, with an ample building formerly used as an academy, in aid of the work. The establishment of schools for colored children at practicable localities will be among the first duties of the mission, which comprehend the general, mental and spiritual improvement of the colored race. Curiously enough, according to the dispatch, the mission has been established by the Catholic Church of England, because, in the language of Archbishop Manning, England had imposed slavery upon America, and it was fitting that Englishmen should be the first to move for the amelioration of the emancipated people.

A VERY ECCENTRIC and famous old man died in a hovel in the Lt. Giles quarter, in London, the other day. Thirty years ago he was one of the most celebrated men in England. He was a chimney-sweep, and like the Fletcher in the play, "loved the Queen." He became so infatuated after the then young and fascinating royal lady that he climbed down the chimney of St. James Palace a number of times, but escaped when chased, save on one occasion. Then he was taken as he was about to enter the Queen's apartments and shut up in Tothill street prison. As soon as his time was up he tried repeatedly again to see the queen, and the police took the matter in hand. He was arrested, taken into Gravesend, embarked on board the "Diamond," and sent to Australia. He lived for many years at Sydney, but was allowed to return to England about five years ago, always desperately enamored of the Queen. His remaining years were spent in miserable poverty.—A fortnight since a rumor was one day started in London that Queen Victoria was dead. He heard it just as he was retiring to rest, uttered a groan, and died instantly.

BARNUM IN A FIX.—When George Wood was about to open his museum, Barnum's last museum was burned.—Wood, fearing that Barnum would erect a new museum up town, contracted to pay him $12,000 per year for ten years, on condition that he should not open any place of amusement in New York during that time. Barnum retired, and for several years has received his thousand dollars per month from Wood. But, lying idle having made Barnum restive, he started an immense traveling show, that has swept all before it, through the country. Now Barnum wants to bring his traveling show to New York for a month, and offers Wood $12,000 for the privilege. Wood replies: "No, sir! But tear up the agreement; by which I am to pay you $84,000 during the next seven years, and you may show in New York whatever and whenever you like." Barnum is in a brown study.—*New York Tribune.*

HENRY BOEHM, the oldest living minister of the M. E. Church, officiated on the 1st of October at the laying of the corner-stone of the Third M. E. Church, in Lancaster, Pa. Sixty-eight years before he preached the first Methodist sermon ever delivered in that city, and organized the first society, consisting of six members. One person was present at the corner-stone laying who heard the first sermon, in 1803.

AN intoxicated man in New York saw two street cars passing him in the evening with red and blue lights in the front and rear. His fuddled brain comprehended the colored lights, and he was heard to say to himself, "Must be pretty sick—sickly in New York now, they are running drug stores round on, on the whe—wheels."

A WESTERN editor informs a correspondent that the words "No Cards" accompanying a marriage notice, signify that the wedded pair don't play poker.

Notice to Farmers AND HORSEMEN.

YOU CAN BE SUPPLIED AT THE "PEOPLE'S HARNESS STORE," with everything in my line of business at CITY PRICES. We have a fine stock of

NEW HARNESS

ow on hand, which we are selling at very low gures. A good stock of

SADDLES

which I can guarantee. BITTS of all styles, and SPURS of all kinds.

Clear and Harmless as Water!

NATTANS' CRYSTAL DISCOVERY

FOR THE HAIR!

A PERFECTLY clear preparation in one bottle, as easily applied as water, for restoring to gray hair its natural color and youthful appearance, to eradicate and prevent dandruff, to promote the growth of the hair and stop its falling. It is perfectly harmless and entirely free from any poisonous substance and will therefore take the place of all the dirty and unpleasant preparations now in use. In everything in which the articles now in use are objectionable, CRYSTAL DISCOVERY is perfect. It is warranted to contain neither Sugar of Lead, Sulphur, Litharage, or Nitrate of Silver. Bear this in mind when you want anything for your hair.

Clear and clean as water, it does not soil the scalp or clothes, is agreeably perfumed, and makes one of the best dressings for the hair in use. It restores the color of the hair more perfect and uniformly than any other preparation, and always does so in from 3 to 10 days. Virtually feeding the roots of the hair with all the nourishing qualities necessary to its growth and healthy condition, it restores the decayed and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also produces a pleasant and cooling effect on the scalp and gives the hair a glossy appearance.

☞ We call especial attention to the fact that a limited number of trial bottles will be given away gratuitously to those desiring to try it. You will notice that in pursuing this course our aim is to convince by the actual merits of the article. ARTHUR NATTANS, Inventor and Proprietor, Washington, D. C., to whom all orders must be addressed.

WASHINGTON, D. C., Aug. 5, 1870.

Mr. Arthur Nattans:

Dear Sir—I do not hesitate to say that your Crystal Discovery deserves to supercede all other preparations claiming to restore the growth and color of the hair. I have used it a week now, and my hair has already returned to its natural color, and has ceased falling almost entirely. I cheerfully recommend it.

Respectfully,
MRS. ANNIE MORRAIN.

VINEGAR BITTERS

VEGETABLE — FREE FROM ALCOHOL — PURELY — CALIFORNIA — D. WALKER'S — EUREKA

VINEGAR BITTERS

J. WALKER, Proprietor. R. H. McDONALD & Co., Druggists and Gen. Agts., San Francisco, Cal., and 32 & 34 Commerce St. N. Y.

MILLIONS Bear Testimony to their Wonderful Curative Effects.

They are not a vile **Fancy Drink,** Made of **Poor Rum, Whiskey, Proof Spirits and Refuse Liquors,** doctored, spiced and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the native roots and herbs of California, **free from all Alcoholic Stimulants.** They are the **GREAT BLOOD PURIFIER and A LIFE GIVING PRINCIPLE,** a perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. No person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

They are a Gentle Purgative as well as a Tonic, possessing also, the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver, and all the Visceral Organs.

FOR FEMALE COMPLAINTS, whether in young or old, married or single, at the dawn of womanhood or at the turn of life, these Tonic Bitters have no equal.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these **Bitters** have been most successful. **Such Diseases** are caused by **Vitiated Blood,** which is generally produced by derangement of the **Digestive Organs.**

DYSPEPSIA OR INDIGESTION, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms are the offsprings of Dyspepsia.

They invigorate the Stomach and stimulate the torpid Liver and Bowels, which render them of unequaled efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

FOR SKIN DISEASES, Eruptions, Tetter, Salt Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-Worms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

Pin, Tape and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist, there is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vermifuges, no anthelmintics, will free the system from worms like these Bitters.

Sold by all Druggists and Dealers.

J. WALKER, Proprietor. R. H. McDONALD & CO., Druggists and General Agents, San Francisco, California, and 32 and 34 Commerce Street, New York.

HASKELL, LYON & CO.,

WARFIELD'S COLD WATER SOAP

No Boiling!
No Hard Rubbing
No Hot Water!
No Washboards!
No Blueing!
No Injury to Garments or Hands!

No. 33 South Eutaw St.
BALTIMORE, MD.

The above firm having secured the exclusive right to manufacture and sell

Warfield's Patent Cold Water Self-Washing Soap,

in and for the State of Maryland and District of Columbia, invite the attention of the public to this very superior SOAP, which washes thoroughly in any kind of water—hard, soft or salt—*without boiling.* They also guarantee that it will not injure even the finest fabrics.

Not only does it save labor, fuel, clothes, &c., but by using it housekeepers get rid of the discomfort of hot water in summer, and of steam in the house during winter, which cause frequent colds, especially to those who go from a steaming hot wash-room to hang out clothes.

Thousands of testimonials to its great excellence are at hand, but no evidence can equal that derived from one's own observation and experience. To *know* the virtues of this Soap you have only to try it. A single bar is sufficient for the ordinary week's wasking of a family of eight persons.

By its own action it dissolves the grease and other things that soil, and liberates them from the garment, thus quietly and quickly accomplishing that which is usually done with labor and hard usage of the clothes by means of a washboard or machine. Very little hand-rubbing is required with this Soap, except when the clothes are much soiled, or the dirt firmly imbedded in the fabric.

The clothes require no blueing if dried in the sun, as they are bleached every time they are washed. Clothes washed with this soap will last *fully* twice as long as when washed in the ordinary way with the Soaps hitherto most popular. To consumers, therefore, it is unquestionably the CHEAPEST SOAP ever manufactured. The usual discount to the Trade. aug5-6m.

RUPTURE CURED.

MARSH'S Radical Cure Truss,

Springs will not Rust. Pads Impervious.

The best and most effectual Truss known for the cure and relief of HERNIA or RUPTURE. This Truss has received the sanction of the most eminent Physicians and Surgeons of this country; who do not hesitate to recommend it to those afflicted with Hernia as being superior to all others.

It is the only Truss that will retain the bowels with any certainty, and the wearer can feel assured that he is using a remedy that will be at all times safe and effectual in its operations. Of this we guarantee entire satisfaction to all who may come under our treatment.

LADIES' SILK ELASTIC ABDOMINAL BELTS for Corpulency, falling of the Womb, and as a support to the Back and Abdominal Muscles. Anklets, Knee Caps and Stockings for Varicose Veins, Ulcers and Weak Joints.

SHOULDER BRACES for Ladies, Gents and Children, for the cure of stooping of the Shoulders and as a Chest Expander.

PILE INSTRUMENTS, the most superior article in use—light, easily adjusted and effectual. Instruments for all Physical Deformities, Curvature of the Spine, Bow Legs, Club Feet, &c., &c.

Ladies' Apartments with Lady Attendants.

Agent for Clement's CELEBRATED ARTIFICIAL LIMBS.

Agent for Grandall's Patent Rubber-tipped CRUTCHES.

Agent for Dr. Babcock's Silver Uterine Supporter.

Agent for Dr. Wadsworth's Stem Persory.

All of the above scientifically applied and satisfaction given.

Orders per mail promptly attended to.

August 19.

THE EUREKA FANNING MILL.

THE GREATEST INVENTION OF THE NINETEENTH CENTURY!

Farmers Look to Your Interest!

THE attention of Farmers and Mechanics is particularly directed to the combined economy, utility and practicability of the Eureka Mill, and to the many other advantages it possesses over every other Fanning Mill which has been introduced to the public.

It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and has always been rewarded with the best of success. But not feeling satisfied with his former attainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Phythagoras—EUREKA!—signifying in the Grecian language, "I have found it." This has given the name to this new Mill.

In this Mill are all the former improvements to which have been added several more, adding still greater advantages than were at first anticipated, or even thought possible by the inventor himself. It embraces the three great essentials necessary in every invention:

It combines ECONOMY, UTILITY and PRACTICABILITY!

THE "EUREKA" MILL

is small and lighter, and is capable of doing more and better work in a given time than any other Mill ever invented.

IT IS THE ONLY MILL

that will successfully remove from wheat all such pests as Cockle, Garlic, Oats, Rye, &c.

Should an extra quality of grain for seed or gristing purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of; for nearly one quarter of the grain cleaned in the common Mills is lost when sown, on account of shrunken kernels and inferior grain. The Eureka Mill saves all this, and gives seed every kernel of which will grow when put into the ground, and this saving will, in a short time, pay for the Mill.

HINES & BURCHINAL,
Chestertown, Maryland,

Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of Noland & Co., Port Deposit, Md., which is a guarantee that they will be put up in the best manner. jel7-tf.

THE WEED

"F. F."—Family Favorite,

Sewing Machine!

LOCK STITCH! STRAIGHT NEEDLE

The Most Simple, Elegant, Economical and Desirable of any in use.

"THE WEED" was awarded the HIGHEST PREMIUM for family purposes, in an exciting contest with EIGHTY-TWO others, and is the Best Finished Instrument of the kind in the whole Exhibition.—[Report Paris Exposition, Gallignani's Messenger, (French) June, 1867.]

ALSO, THE

"M. F."—Manufacturer's Favorite,

Having a space of nearly twenty inches under the arm—a positive feed on three sides of the needle. Without Cam, Cog Wheels, Compound Cranks, Wire Springs or Revolving Shafts.

SILENT! RAPID! POWERFUL

These Machines are in use by many families in Chestertown and Kent county, and are universally preferred over all others by Ladies who have used different kinds. Every family should have one.
