# FARMERS' DEPARTMENT.

"He who by the plow would thrive,
Himself must either hold or drive."

### Summer Management of Horses.

A member of the Royal College of Veterinary Surgeons, writing to the *Times*, exposes the fallacy of the popular belief that a horse is benefitted by "a month's run." He says that new pastures are beginning to look green, and the weather promises to become warm, owners are thinking of giving their horses a treat by turning them on to grass. "I have worked my horses hard," say they, "and they need a summer's run." It will rest their legs and feet; besides, green food is the natural provender for horses, and they will enjoy a few months' rest at grass, and be all the better for it." It is all very well for the young animal, protected by long hair, lengthy mane and tail, whose time, while young, has to be got over one way or another, and it is found convenient to let him forage for himself; but with stale and "groggy" horses requiring rest, and whose owners turn them out with this object, the matter is entirely different. "Rest," properly so called, is not to be had in the pasture. In the simple process of gathering his food the horse walks many miles during the twenty-four hours, if the pasture be bare, and the same process obliges him to throw extra weight on his fore legs and feet, which it has been the intention of the owner to "rest." Besides, in the summer months, witness the poor horses huddled together for shelter from the myriads of insects which surround cattle when grazing, and watch them nervously tossing their heads, switching the tail, stamping, and thus jarring the feet and legs, moving to and fro in the vain hope of escaping from their tormentors, and ask if this be "rest." When the sun is powerful, the feet become hot and parched, the horn is rendered brittle, and breaks off in pieces. Besides, nothing throws a horse so soon out of condition as green food. The consequence, in eight cases out of ten, is that the animal comes up from the grass in much worse form than when turned out "to rest"—if he escapes getting staked, or being kicked by his companions. What, then, is the best method of dealing with horses in the summer, when either rest is a necessity or otherwise desirable? Put them into a loose box or shed, well littered with tan-bark, sawdust or straw, or all combined; remove the shoes, and rasp off the sharp edges of of the crust to prevent them from breaking, supply water without stint, give a liberal allowance of oats, Indian corn and bran, with cut chaff and hay, the whole of which will be better for being made ready damp with water. If, on the part of the owner, there is a predilection for green food, give it in small quantities mixed by hand with the hay, always remembering that the fat which it invariably produces is so much lumber, not condition, and that when the horse returns to work, the fat is thrown off at the cost of additional wear in the feet and legs.

HARD TIMES FOR FARMERS.—A farmer in debt always will have hard times, such as those who own land and have a comfortable home, free from all encumbrance, cannot fully comprehend. Mr. Beecher, who knows the cost of farming, perhaps, better than its profits, says candidly:

"No blister draws sharper than interest does. Of all industries, none is comparable to that of interest. It works all day and night, in fair weather and foul. It has no sound in its footsteps, but travels fast. It gnaws at a man's substance with invisible teeth. It binds industry with its film as a fly is bound in a spider's web. Debts roll a man over and over, binding hand and foot, and letting him hang upon the fatal mesh until the long-legged inte[illegible] devours him. There is but one thing on a farm like it, and that is the Canada thistle, which swarms new [illegible] time you break its roots, [illegible]ose blossoms are prolific, and every flower the father of a million seeds, every leaf is an awl, every branch a spear, and every plant like a platoon of bayonets, and a field of them like an armed host. The whole plant is a torment and vegetable curse. And yet a farmer had better make his bed of Canada thistles than attempt to be at ease upon interest."

OLD AND NEW PLACES FOR RAISING FOWLS.—During 1869, I raised about 150 fowls on an old place where fowls had been raised more or less for years. The consequence was, I lost at least one-third of all hatched, by the much dreaded gapes. I tried nearly all the remedies recommended, but my only success was in removing the worms with a feather trimmed for the purpose. This year I am on a new where no fowls were ever kept. I set my first hen on January 29th; I have now about 140 chicks out, some one-third grown, and not a single case of gapes or other sickness yet; treatment the same in both years.—*Poultry Bulletin.*

HIRING HELP.—That farmer is fortunate who has two or three active and intelligent sons able and willing to take hold of farm work. Make much of them. Those who have to hire should be willing to pay good wages for good men. Know what a good day's work is, and get it; but do not ask for more. An unreasonable employer makes discontented servants. If they do well tell them so; if not, reprove mildly but firmly.

A FARMER writes: "I have been in the practice of raising corn in drills to feed milch cows at this season of the year. I have an acre in this year that will feed my twenty-two cows two months well without any other feed, and they will give more and better milk than from any other feed I have ever seen."

A CORRESPONDENT of the Ohio *Farmer* says, always, if possible, plough the ground just before planting. If sod, never until the grass is well started.—Then the grass will furnish food for worms, and also commence heating or rotting at just the right time to make the young corn grow rapily.

EVERY farmer should have a brand to mark his cattle and tools. It will save its cost often.

ANDY WAS RIGHT.—Don Piatt relates as a fact that the only question in which President Grant "seems to be at all sensitive comes under the head of Andy Johnson," and then goes on rather naively:

"You will recollect that the impetuous Andrew, in that little difference over the War Department, said that our friend Grant was a small man intellectually, and not reliable in the matter of veracity—in a word, he was stupid and not to be believed. As Andrew was very unpopular at the time, and Grant was regarded as the saviour of his country, great indignation was felt at the attack, and we all joined in hooting and abusing the poor executive devil for daring to intimate anything of the sort. Gradually, however, since then, the unpalatable fact has crept in upon the public mind that Andrew was right after all, and now the best friends of the General, in the way of his defense, admit the charges by saying that he is well meaning; that he intends to do what is right; which means if he knew how."

## Clear and Harmless as Water!

## NATTANS' CRYSTAL DISCOVERY

*FOR THE HAIR!*

A PERFECTLY clear preparation in one bottle, as easily applied as water, for restoring to gray hair its natural color and youthful appearance, to eradicate and prevent dandruff, to promote the growth of the hair and stop its falling. It is perfectly harmless and entirely free from any poisonous substance and will therefore take the place of all the dirty and unpleasant preparations now in use. In everything in which the articles now in use are objectionable, CRYSTAL DISCOVERY is perfect. It is warranted to contain neither Sugar of Lead, Sulphur, Litharage, or Nitrate of Silver. Bear this in mind when you want anything for your hair.

Clear and clean as water, it does not soil the scalp or clothes, is agreeably perfumed, and makes one of the best dressings for the hair in use. It restores the color of the hair more perfect and uniformly than any other preparation, and always does so in from 3 to 10 days. Virtually feeding the roots of the hair with all the nourishing qualities necessary to its growth and healthy condition, it restores the decayed and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also induces a pleasant and cooling effect on the scalp and gives the hair a glossy appearance.

☞ We call especial attention to the fact that a limited number of trial bottles will be given away gratuitously to those desiring to try it. You will notice that in pursuing this course our aim is to convince by the actual merits of the article. ARTHUR NATTANS, Inventor and Proprietor, Washington, D. C., to whom all orders must be addressed.

WASHINGTON, D. C., Aug. 5, 1870.

Mr. Arthur Nattans:

*Dear Sir*—I do not hesitate to say that your Crystal Discovery deserves to supercede all other preparations claiming to restore the growth and color of the hair. I have used it a week now, and my hair has already returned to its natural color, and has ceased falling almost entirely. I cheerfully recommend it.

Respectfully,
fe11y. MRS. ANNIE MORRAIN.

## A NEW ERA IN BELTING.

PAGE'S PATENT

## Tanned Leather Belt.

Tanned in Oil and by the same process as Lace Leather, by PAGE BROS., inventors and manufacturers of the celebrated Page's Lace Leather.

These Belts are perfectly soft, and hug the pulley like pure rubber, thus giving 25 per ct. more driving power than any other belt.

They also have eighty per ct. more strength than the best oak-tanned belts.

They have been placed on pullies running 9,000 turns per minute, and in places where all other belts have failed, have given entire satisfaction, outwearing every other belt 50 per ct.

The fact that they are driving out of the market in the East, very fast, the other kinds of belt, is sufficient testimony.

All the large Eastern Factories now use them.

The following are a few of the many testimonials we have received:

*Messrs. Charles E. Inloes & Co.:*

GENTS:—We have been using Page's Patent Belt in our factories for over a year, and believe it to be the best and cheapest belt made.

Best, because it is stronger and more durable than oak-tanned; and cheapest, because its adhesive qualities give it so much more driving power. Very respectfully,
R. H. THOMPSON,
Sup't Union Mfg. Co. of Maryland,
Ellicott's Mills.

*Messrs. Charles E. Inloes & Co.:*

GENTS:—The fourteen-inch Page's Patent Belt, bought from you, has been in daily use ever since, and gives perfect satisfaction, and you are at liberty to use our name in endorsing the qualities you claim for it, in every respect, as we believe it to be the best Belt made, and shall adopt it altogether in our mills. Very truly,

## Ayer's Sarsaparilla,

FOR PURIFYING THE BLOOD.

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inveterate cases of Scrofulous disease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt foe of the organic understructure constitutes and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this *Sarsaparilla* is advisable, even when no active symptoms of disease appear. Persons afflicted with the following complaints generally find immediate relief, and, at length, cure, by the use of this *SARSAPARILLA*: *St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears*, and other eruptions or visible forms of *Scrofulous* disease. Also in less more concealed forms, as *Dyspepsia, Dropsy, Heart Disease, Fits, Epilepsy, Neuralgia*, and the various *Uterous* affections of the muscular and nervous systems.

*Syphilis* or *Venereal* and *Mercurial Diseases* are cured by it, though a long time is required for subduing these obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. *Leucorrhœa* or *Whites, Uterine Ulcerations*, and *Female Diseases*, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. *Rheumatism* and *Gout*, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also *Liver Complaints, Torpidity, Congestion* or *Inflammation* of the *Liver*, and *Jaundice*, when arising, as they often do, from the rankling poison of the blood. This *SARSAPARILLA* is a great restorer for the strength and vigor of the system. Those who are *Languid* and *Listless, Despondent, Sleepless*, and troubled with *Nervous Apprehensions* or *Fears*, or any of the affections symptomatic of *Weakness*, will find immediate relief and convincing evidence of its restorative power upon trial.

## COUGHS, SORE THROAT, ETC.

*No Medicine or Treatment can excel the Powerful Curative Power of*
**DR. SIMMS' WHITE PULMONIC BALSAM.**

It cures with a rapidity unequalled by any other remedy offered for Throat and Lung diseases. It is recommended by over 2,000 persons in Wilmington, and hundreds in Philadelphia, Baltimore and other cities and communities throughout the country. Mr. Pennington, of Wilmington, Illinois, writes that there is not (with a few exceptions) a family in that city who will be without it if possible to procure it. Such is its popularity wherever it is known—and this popularity arises from the fact that it universally cures all who use it. There is no case of *Coughs, Colds, Sore Throat, Asthma, Bronchitis, Croup, Blood Spitting, Hoarseness*, and even *Pulmonary Consumption*, where the system is not broken down with the wear of the disease, or pretended medicine, or inexperienced advice, that this Balsam will not cure if carefully used, according to directions. We guarantee it all we represent it to be, and invite a trial from the afflicted everywhere. Price, 50 cents, medium size, and $1 for large size bottles. Prepared only by
