FARMERS' DEPARTMENT.

"He who by the plow would thrive,
Himself must either hold or drive."

Best Milk-Producing Food.

T. L. Hart, of West Cornwell, Connecticut, has written an article, from which we make the following extract:

"There is no doubt a difference in the quality of milk in different cows, some being rich in caseine or cheese, and that of others in butter, yet as a rule, the milk will be in a great measure what it is made by the feed of the cow. The milk from the same cows may be varied by feed from 80, by the lactometer, up to 115 degrees, the highest number being the best, and such as is produced by the heaviest feed.

In a carefully tried experiment which I made last winter, I found that heavy feed, such as corn, wheat and rye shorts, fed to twelve cows, pound for pound, did not make as much milk as wheat bran, into nine quarts a day, and I have no doubt that for a time this would invariably be the result, yet I should not dare to continue for any considerable length of time to feed my cows upon wheat bran alone, as it would undoubtedly diminish the strength of the cow, and soon reduce her to a condition that she would be incapable of giving very much milk. I am now feeding to twelve cows two bushels of wheat bran mixed with one bushel of corn meal, ground in the cob, with very satisfactory results. The milk is good, the strength of the animal is kept up, and a diminished amount of hay will keep the cows in good thriving condition. I feed twice a day.

It is yet an open question whether the feed should be fed wet or dry. There is no doubt but that in cold weather it would be much better if the water, which is required by cows in milk, could be warmed. If taken into the system while at a very low temperature, the process of digestion will be retarded until the temperature of the water is raised to blood heat. In warming, this water digestion is not only retarded, but there will be a loss of a certain amount of food, which, like fuel, is consumed in keeping up the heat of the body, and this accounts for the fact that a herd of cattle require very much more food in extremely cold weather than they do in warm weather. It will be evident, therefore, that a large amount of food may be saved by warm stabling in cold weather, and, consequently, a much greater secretion of milk secured.

The great mass of the community are no doubt ignorant in regard to the great difference in the quality of milk made by the different kinds of feed. Milk made from a cow fed upon turnips and buckwheat bran or buckwheat shorts, is totally unfit for a young child, or its mother, and there is no doubt but that the mortality among children is often caused by improper food of which the milk is made. The physician knows the importance of having the milk from a new milch cow assigned for a young child; the why and wherefore very likely he does not know. He probably does not know that the milk from a farrow cow is one-third heavier and one-third richer in caseine than that from a new milch cow, and therefore is not as well adapted to the wants of the child, nor does the mother understand that the cause of the child's illness is owing to some improper food eaten by the cow If I were desirous of making a given amount of milk the best adapted to the use of the greatest number of children, I would feed the cows on equal parts (in pounds) of oats, wheat-bran and Indian corn, and the best hay and apples.

Until we become accustomed to trying experiments we shall not know for a certainty the quantity and quality of food that will, when fed to a lot of cows, produce the greatest amount of really good milk for a given amount of feed, nor shall we know whether the cutting of hay for our milch cows in winter will pay for the extra expense and labor of doing it. Some of our milkmen who have tried cutting are of the opinion that it pays well for the trouble, and some contemplate steaming.

Roots, especially carrots, increase the flow of milk and of the best quality, and will tend to keep the cow in good health. Apples will increase the quantity of milk nearly as much as turnips, and make it of much better quality.

In making milk there is nothing more important than good early cut hay.—Without this it may be doubted whether milk can be made with profit.

Bronze Turkeys.

The Bronze originated in a cross between the common and wild turkey, and with its scale like feathers and coppery lustres, is a very handsome bird. Their color is a bronze brown, of great glossiness, with a metallic coppery lustre, glittering beautifully in the sunshine; a plumage of exceeding brilliancy, being compact, glossy, with metallic reflections; feathers double, as in other gallinacious birds, generally oblong or truncated; tips of the feathers almost conceal the bronze color. The plumage of the male is very brilliant; that of the female is not so beautiful.

These turkeys cannot be valued too highly; their want has been long felt by the American people. The flesh is white, tender, juicy, and excellent flavor; rendering them the best table fowl of any known variety. They are very hardy, easily raised, and good layers. The cocks frequently weigh forty pounds, and there is a specimen of this variety near the residence of the writer that weighs if I mistake not forty-two pounds. The Jesuits, who made early settlements in this country, affirm that the turkies found among the Illinois, weighed each from thirty to forty pounds. The heaviest turkey known to have been raised in England previous to 1853 weighed only thirty-two pounds.—*American Stock Journal.*

A gentleman in Delaware bought 11 head of sheep last year, for which he paid $20.90. This year he realized from these sheep, $12.90 for wool, and $36 for lambs. What business could our farmers engage in that would yield a handsomer per cent.

The Earth System for Stables.—Straw has become too expensive to bed stables with. The best substitute is dry earth. Any common soil may be collected when dry and placed under cover, convenient for use when required.

Beer-Drinking Americans.—A curious and not insignificant fact is developed by the books of the internal revenue office. These show, by the orders for lager beer stamps, that about four times more of that German beverage is being made and consumed than last year. A contemporary is of opinion that this effect is due to two causes—the immense stimulus to the jollity of the Germans by the chronic enthusiasm into which their victories at home have thrown them, and the natural growth of the habit of drinking lager among Americans. It is not inclined to mourn over either of these facts, and thinks that as a people it is not to be denied that the use of light drinks leads us more away from than to the vicious stimulus of spirits.

Thiers on the Income Tax.—In the French National Assembly a proposal was lately made to levy a tax upon incomes as a means of increasing the revenue of the French republic. President Thiers resisted the proposition with great energy. "If this tax," he said, "only impoverished the rich, I should not pity them, but in the present state of society, such a tax would be a source of disorder. Read the admirable book written by Vauban, and you will see that the income tax is, in another form, the most odious of those taxes which were abolished by the revolution, and we are asked to impose it now, not in peaceful times, but in the midst of disturbance and uncertainty.—This tax is nothing but a party instrument, to be used alternately by one party against others. I should be a coward if I did not declare that I will never consent to this tax." It is a pity that our own rulers could'nt be penetrated with a little of this good sense and wisdom.

Spontaneous Generation.—Professor Crace Calvert has made experiments which show the errors of those who advocate the theory of spontaneous generation. He has proved that the temperature of boiling water will not kill all the living germs contained in the water. Hence, it is a mistake to say that living germs which appear after boiling have been developed from non-living matter. An experimentalist, wishing to be absolutely certain that he has destroyed all life in the fluid operated on, should pass it through a temperature of four hundred degrees. As an example of the rapidity with which, in one case, life is developed, Prof. Crace Calvert states that the white of a new laid egg mixed with pure water, and exposed to the air for fifteen minutes only, in August or September, "will show life in abundance."—*Chambers' Journal.*

The Chinese in Louisiana.—The movement to introduce Chinese labor in Louisiana appears to be successful. Many of the richest and most influential planters of the State are engaged in it as stockholders in the Louisiana Immigration Company, just organized with a capital of $250,000, in $100 shares. A Mr. Payne, who is at present in China as the agent of several individual planters, has engaged one thousand laborers in that country, and expects to reach Louisiana with them in time for the planting of the next crop. They have all been selected from the agricultural districts of China, and they have agreed to work for eight or ten years for $8 a month in gold. The Chinese at present in Louisiana live in perfect harmony with the negroes. They are nearly all unmarried young men, and are neat and excellent workmen. They also appear to be perfectly contented. Their cabins are kept with great care and cleanliness. It would seem that Louisiana will soon have a large Chinese population.

The public school moneys actually collected for the system in Charleston, S. C., this year, have amounted to $470,000, very nearly equal to the amount in Baltimore. On June 30th the schools closed, because the money had all been stolen by the officials.

Farmers Look to Your Interest

BLACKSMITHING AND WHEELWRIGHTING.

THE undersigned takes this method of informing his friends and the public generally, that I am still conducting both branches of the above business at KENNEDYVILLE. I keep on hand good material, and have in my employ first class workmen, thus enabling me to give satisfaction to all. I have now on hand the

Smyrna & Newark Plough Castings

such as Concave, Wiley and Heckendorn.

Also, on hand a splendid lot of

STEEL CULTIVATOR TEETH.

Ploughs, Cultivators, Harrows, &c.,

made to order and kept on hand. I shall also put up to order CARTS, WAGONS, DEARBORNS, &c., and special attention paid to all kinds of REPAIRING, at reduced prices.

Come one, come all, and see for yourselves. Thanking the public for past patronage, I hope to merit a continuance of the same.

TILGHMAN SHAFER,
March 4—tf. Kennedyville.

BLACKSMITH AND

Wheelwright Shops.

THE subscriber hereby notifies his friends and the public generally, that he has opened the Shops near the Foundry, in Chestertown, where he is prepared to execute all orders for NEW WORK or REPAIRS with neatness and dispatch, and at low prices.

HORSE-SHOEING.

Having employed a first class horse-shoer, I will give particular attention to this branch of the business, and guarantee satisfaction.

WHEAT CRADLES made to order, or repaired, and Reaper and Mower Knives ground and repaired at short notice and fair prices.

I respectfully request a share of the public patronage. JAMES LAMB.

March 4, 1871—tf.

Galena Machine Shops

PLOWS, CASTINGS, &c., &c.

WM. A. HYLAND & CO., respectfully inform Farmers generally that they keep on hand, and are prepared to make to order all kinds of

AGRICULTURAL MACHINERY,

Such as HORSE POWERS and THRESHERS, CORN SHELLERS, PLOWS, HARROWS, CULTIVATORS, and Cultivator Teeth, best steel plate, at $3 per sett. They have now on hand about 20 tons of CASTINGS of very superior quality, and will be sold cheaper than they can be bought elsewhere. Our Castings need no recommendation as their reputation has been fully established by persons who have used them.

We are also prepared to attach DROPPERS to any kind of Reapers.

Thankful for the liberal patronage which has been extended to us in the past, we solicit a continuance of the same, feeling satisfied of our ability to give general satisfaction.

WM. A. HYLAND & CO.,
fed4-10m. Galena, Kent co., Md

BLACKSMITH —AND— WHEELWRIGHT SHOPS

AT WILLIS' X ROADS.

THE subscriber having rented the above Shops and employed competent workmen, is prepared to do all kinds of work, in either branch, in the BEST MANNER and at REASONABLE PRICES.

Feeling confident of giving satisfaction, a liberal share of public patronage is respectfully solicited. WM. H. WARREN.

Jan. 14, 1871—y

Clear and Harmless as Water!

NATTANS' CRYSTAL DISCOVERY

FOR THE HAIR!

A PERFECTLY clear preparation in one bottle, as easily applied as water, for restoring to gray hair its natural color and youthful appearance, to eradicate and prevent dandruff, to promote the growth of the hair and stop its falling. It is perfectly harmless and entirely free from any poisonous substance and will therefore take the place of all the dirty and unpleasant preparations now in use. In everything in which the articles now in use are objectionable, CRYSTAL DISCOVERY is perfect. It is warranted to contain neither Sugar of Lead, Sulphur, Litharage, or Nitrate of Silver. Bear this in mind when you want anything *for your hair.*

Clear and clean as water, it does not soil the scalp or clothes, is agreeably perfumed, and makes one of the best dressings for the hair in use. It restores the color of the hair more perfect and uniformly than any other preparation, and always does so in from 3 to 10 days. Virtually feeding the roots of the hair with all the nourishing qualities necessary to its growth and healthy condition, it restores the decayed and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also produces a pleasant and cooling effect on the scalp and gives the hair a glossy appearance.

☞ We call especial attention to the fact that a limited number of trial bottles will be given away gratuitously to those desiring to try it. You will notice that in pursuing this course our aim is to convince by the actual merits of the article. ARTHUR NATTANS, Inventor and Proprietor, Washington, D. C., to whom all orders must be addressed.

Washington, D. C., Aug. 5, 1870.

Mr. Arthur Nattans:

Dear Sir—I do not hesitate to say that your Crystal Discovery deserves to supercede all other preparations claiming to restore the growth and color of the hair. I have used it a week now, and my hair has already returned to its natural color, and has ceased falling almost entirely. I cheerfully recommend it.

Respectfully,
MRS. ANNIE MORRAIN.

fe11y. *For Sale by C. F. STAM & BRO.*

HALL'S Veg. HAIR RENEWER, Chevalier's LIFE FOR THE HAIR, MONTGOMERY'S HAIR RESTORER, AYER'S HAIR VIGOR, and BURNETT'S ROLLISTON.

For sale at WICKES' DRUG STORE.

Removal--New Goods.

MRS. A. M. SMITH

HAS removed to the store room lately occupied by Mr. B. H. Gardner, opposite the Vashell House, where she keeps constantly on hand a general assortment of

Groceries, Confectionery NOTIONS, &c.,

Consisting in part of Sugar, Coffee, Tea, Flour, Bacon, Lard, Butter, Salt Fish, Vinegar, Molasses, Soaps, Buckets, Brooms, Tobacco and Segars, Snuff, Pipes, Oil, Lamps and Lamp Chimneys, Notions, Nuts and Candies of various kinds, and other articles too numerous to mention, all of which will be sold at the very lowest cash prices.

ALL KINDS OF COUNTRY PRODUCE taken in exchange for Goods.

Thankful for the patronage heretofore extended to her, she asks a continuance of the same.

jan28y. MRS. A. M. SMITH.

B. STRAUSS

AT THE OLD PLACE YET!

Notice to the Public in General

THE undersigned having re-rented the store room in Burchinal's Building, will still continue to keep on hand

CLOTHING AND GENTS' FURNISHING GOODS,

as heretofore. The Holidays being over and desirous of closing out my entire Winter Stock I will sell at

REMARKABLY LOW PRICES.

☞ I will be pleased to receive a call from my friends and the public generally, and shall endeavor, by fair and honorable dealing, to merit a share of your patronage.

Respectfully, B. STRAUSS,
Corner of High and Cross Streets,
Jan. 7, 1871. Chestertown.

ap8y. BALTIMORE, MD.

A NEW ERA IN BELTING.

PAGE'S PATENT **Tanned Leather Belt.**

Tanned in Oil and by the same process as Lace Leather, by PAGE BROS., inventors and manufacturers of the celebrated Page's Lace Leather.

These Belts are perfectly soft, and hug the pulley like pure rubber, thus giving 25 per ct. more driving power than any other belt.

They also have eighty per ct. more strength than the best oak-tanned belts.

They have been placed on pullies running 9,000 turns per minute, and in places where all other belts have failed, have given entire satisfaction, outwearing every other belt 50 per ct.

The fact that they are driving out of the market in the East, very fast, the other kinds of belt, is sufficient testimony.

All the large Eastern Factories now use them.

The following are a few of the many testimonials we have received:

Messrs. Charles E. Inloes & Co.:

GENTS:—We have been using Page's Patent Belt in our factories for over a year, and believe it to be the best and cheapest belt made.

Best, because it is stronger and more durable than oak-tanned; and cheapest, because its adhesive qualities give it so much more driving power. Very respectfully,

R. H. THOMPSON,
Sup't Union Mfg. Co. of Maryland,
Ellicott's Mills.

Messrs. Charles E. Inloes & Co.:

GENTS:—The fourteen-inch Page's Patent Belt, bought from you, has been in daily use ever since, and gives perfect satisfaction, and you are at liberty to use our name in endorsing the qualities you claim for it, in every respect, as we believe it to be the best Belt made, and shall adopt it altogether in our mills. Very truly,

W. W. TUNIS & BRO.,
Oakland Steam Saw Mills,
Talbot Co., Maryland.

The following are a few of the parties now using it in Baltimore:

R. Sinclair & Co.,	Murrill & Keiser,
W. E. Hooper & Sons,	W. Wilkens & Co.,
Magne & Chipman,	J. W. Butler & Co.,
Liberty Mining Co.,	Johnson & Waters,
P. S. Chappell,	L. M. Beebe & Bro.

Congressional Globe Printing Office, Washington.

The Laps are all short, and besides, the usual copper rivets and glue are fastened by two rows of pegs guaranteed not to come out, which is a great advantage.

Send for circulars and price lists to—

CHAS. E. INLOES & CO.,

I will not be under sold by any store in Kent county, Maryland.

mh28. THOMAS B. BORDLEY.

Ayer's

Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and a grateful perfume.

Prepared by Dr. J. C. Ayer & Co.,

PRACTICAL AND ANALYTICAL CHEMISTS,

LOWELL, MASS.

PRICE $1.00.

Sold by C.F. STAM & BRO, Chestertown, J. P. IRELAND, Galena, and all Druggists and dealers in Medicine everywhere. WM. H. BROWN & BRO., Baltimore, wholesale agents.

J. B. SAPPINGTON.

Store on Cross St., opposite George E. Lambert's Coach Factory. nov5-y.

COUGHS, SORE THROAT, ETC.

No Medicine or Treatment can excel the Powerful Curative Power of

DR. SIMMS' WHITE PULMONIC BALSAM.

It cures with a rapidity unequalled by any other remedy offered for Throat and Lung diseases. It is recommended by over 2,000 persons in Wilmington, and hundreds in Philadelphia, Baltimore and other cities and communities throughout the country. Mr. Pennington, of Wilmington, Illinois, writes that there is not (with a few exceptions) a family in that city who will be without it if possible to procure it. Such is its popularity wherever it is known—and this popularity arises rom the fact that it universally cures all who use it. There is no case of *Coughs, Colds, Sore Throat, Asthma, Bronchitis, Croup, Blood Spitting, Hoarseness,* and even *Pulmonary Consumption,* where the system is not broken down with the wear of the disease, or pretended medicine, or inexperienced advice, that this Balsam will not cure if carefully used, according to directions. We guarantee it all we represent it to be, and invite a trial from the afflicted everywhere. Price, 50 cents, medium size, and $1 for large size bottles. Prepared only by

J. H. SIMMS, M. D.,
Practical Organic Chemist,
No. 707 MARKET STREET,
WILMINGTON, DELAWARE.

Philadelphia Depot, Johnson, Holloway & Cawden, 602 Arch Street.

Baltimore Depot, S. S. Hance, 108 Balt. St.

☞ For sale by Medicine dealers generally.

sep24. JOHN BELL & BRO.

SAVE YOUR MONEY.

There is no class or remedial agents so extensively or so justly used as MEDICATED PLASTERS; the timely use of one of Alcock's or Wells' STRENGTHENING PLASTERS, will prevent much suffering and sickness, especially if predisposed to weak lungs, or any affection of the Chest or Back. They afford great relief in Rheumatism, L
