FARMERS' DEPARTMENT.

"He who by the plow would thrive,
Himself must either hold or drive."

SIGNS OF GOOD SOIL.—J. B. Smith, of Patmos, Ohio, said in the Farmers' Club that he had written something on soils. He now added: "Timber in a measure indicates the character of the soil; that flat white-oak land is poor; that shellbark mostly grows in cold, wet land; that flat beach and sugar lands are good for summer crops and grass, but not for wheat; that rolling beach and sugar lands, where large poplar and black-walnut abound, are fine grazing lands, and produce, when new, large crops of all kinds of grain, except wheat, when it is winter-killed; that large white oak and chestnut, growing together, and black oak and hickory, indicate a loose subsoil; and that lands where the water soon sinks into the subsoil; are much the most valuable for grain; that a soil that will raise large crops of all kinds of grain, and then clover and timothy, and after they run out will come in with green grass and white clover, is the best."

MANY of the diseases among farmers are caused by their manner of living. It is a notorious fact that farmers, gardners, and those who have had the largest facilities for raising vegetables, use much less than those who do not and cannot raise them. If asked why they do not eat more of the peas, beans, fruits and etc., which they raise, their reply is, they do not care for them. Generally they raise but one or two messes, their chief diet being cheese, milk, butter and meats. Now, in order to keep the blood healthy, the system requires plenty of fresh vegetables. Lettuce, beans, spinnach, peas, radishes, asparagus, cucumbers, green corn, etc., are what are needed, and every farmer who wishes to live and not expend half he makes in doctor's bills should have at least one acre in a vegetable, and two or three large hot beds, that early plants and fresh salads may be had for spring use.

TO KEEP BUILDINGS COOL.—Dwellinghouses and stables may be kept cool during the hot weather throughout the middle of the day by the simple plan of keeping them closed. A thorough ventilation early in the morning, about sunrise, will clear out all the vitiated or impure air, and reduce the buildings to the temperature of the outside air, which at this season is cool. When sufficiently ventilated, close perfectly and keep dark. The house will then retain the coolness of the morning, although the outside air may increase 20 in temperature. The stables will be cool and free from flies, and the cattle, brought in from the pastures at eleven o'clock, by which time they will be filled, will enjoy the quiet, dark, and cool stable, and will remain there gladly until five in the afternoon, when they will feed again with a relish. No draft of air should be permitted to enter, nor ray of sun, until late in the afternoon, when a free airing and sunning may be given.

ARE OATS AN EXHAUSTING CROP?—As the regular rotation in Eastern farming consists of clover, corn, oats, wheat, or rye, it is worth while to consider if oats are really the non-exhausting crop they are claimed to be. In the ash of oat straw there is over fifteen per cent of potash, while the percentage of phosphoric acid is very light. Oats can not therefore be considered as a non-exhausting crop, as this is a large amount of potash to carry off, and potash is a substance that we find difficult to replace. As oats, therefore, seem to withdraw principally this alkali from the soil, either lime or ashes is indicated as a manure suitable for this crop, and in practice these are found beneficial. Lime in its action on soils is known to liberate and render soluble the potash contained in them, and hence its favorable effects as a fertilizer.

THINNING TURNIPS.—This is a duty that must not be neglected, if fair, well-grown roots are desired, and these make the heavy crops. If the soil is rich and the growth promises well, twelve or fifteen inches should be left between the plants, otherwise less will do. A sharp hoe is a good singling instrument. Vacant spaces may be filled by transplanting, if it is carefully done. A garden trowel should be used, and a scoopful of earth taken with the plant and deposited in the place desired. This work should be done on a damp evening or during a shower of rain. If dry weather occur, it will hardly be worth the trouble; at least, we have found it so in our experience.

A VETERAN FEMALE AGRICULTURIST.—An exchange reports that Mrs. Mary Wilson owns a farm of 150 acres near Reed's Corners, Ontario County, N. Y., and, although 72 years of age, has gathered in all her grain without help. She was found by an interviewer pitching off a load of wheat, and the day before had been mowing. She is said to swing a scythe and handle a pitchfork with the ease of a man in his prime.

NOW IS THE SEED-TIME OF WEEDS, and it is necessary that a little time be snatched from the harassing duties of the harvest to attend to these pests. If neglected they will seed the ground for many years. If an opportunity can be seized of cutting them now, and burning them, so that the seeds are utterly destroyed, a breath of relief may well be taken, for a serious and unintermitting enemy has been vanquished. A few victories so complete will lead to their disappearance.

CUTTING TIMBER.—If posts or rails are needed for service during the winter, the trees may be cut now while in full leaf. Allowed to lie as the trees are cut, the evaporation from the leaves will drain the timber nearly dry, when a short exposure afterwards will very effectually season it. The economy of using posts and rails peeled is very great; the loose bark retains moisture between it and the wood, and the sap wood soon rots.—When peeled the say wood dries, and will last many years longer.

CATTLE SHOULD HAVE SALT.—Cows now in full flow of milk absolutely require salt, without which their milk will not be perfect. It is not only because cows are fond of salt that it should be given to them, but also for the fact that if they are deprived of it, either the yield of milk will become diminished or the quality deteriorated. Further than this, salt is an assistant to digestion, and as such is conductive to the health of animals.

CARE OF TEETH.—Put a piece of quicklime the size of a walnut into a pint of distilled water. Clean the teeth frequently with this fluid, washing the mouth well with clean water afterwards. The application will preserve the teeth and keep off the toothache, and will harden the gums.—*A correspondent of the English Mechanic.*

ONIONS DRIVE TO LICE.—Asa Baldwin, Chatauqua county, New York, says that fifty years ago a very lousy cow of his ate ten or twelve onions and in fifteen hours afterward she lice had disappeared. He has tried the same remedy many times since, with the same result in each case.

SUN SCALD ON SHEEP.—It is often the case that the hot sun will scald a closely shorn sheep. A simple and effectual remedy is fresh butter or lard applied to the inflamed spot. Sheep are subject to so many accidents that they should be looked after, regularly, twice each day. If anything is wrong, it can then be taken in time; delay in even small things is sometimes fatal. It is very unwise to keep sheep in a pasture where there is neither shade nor water. We would advise no man to own a flock, if he does not possess a pasture well provided with these.

MOWING STRAWBERRY LEAVES.—The plan of mowing strawberry leaves after fruiting is coming into notice. One who has tried it says he has practised uniformly for eight years, and never been obliged to reset his plants or renew his bed, while the luxuriance of his plants and size and quality of his berries were matters of great notoriety in his own neighborhood. The propriety of cutting off all the old and exhausted stems, leaves, etc., after fruiting, will not be questioned, we think, by any.

A NEW CATTLE DISTEMPER.—A disease has recently appeared among the cows of Jackson county, Mo., which has caused considerable loss to stock-raisers. The eyes alone are attacked, and throw off water for two weeks, at the end of which time a film covers the eyeballs, and completely destroys the sight. The appetite is not affected, nor is the general health of the animals in any way impaired. The cow-doctors of Kansas City are much exercised over the matter, and have not as yet found either a name for the disease nor a remedy.

SEED WHEAT.

AS I HAVE some of the FRENCH RED CHAFF MEDITERRANEAN (seed imported from south of France) more than sufficient for my own use, I can supply those in want of a clean and good variety of Wheat at Two Dollars per bushel, cash. *French White Chaff Mediterranean*, of as recent importation, can be had for the same price.
Apply to JAMES H. BAKER,
jy29-6t* Bakerville.

TO MY CUSTOMERS
—AND—
THE PUBLIC GENERALLY.

I HEREBY GIVE NOTICE, that on the first day of next September, I shall do a
STRICTLY CASH BUSINESS.
Buying and selling on a Cash basis, I shall be enabled to sell goods much cheaper.
B. M. HAZELL, *Millington.*
July 15, 1871—7t*

VINEGAR BITTERS
VEGETABLE FREE FROM ALCOHOL
PURELY CALIFORNIA
DR. WALKER'S
VINEGAR BITTERS

J. WALKER, Proprietor. R. H. McDONALD & Co., Druggists and Gen. Agts. San Francisco, Cal., and 32 & 34 Commerce st. N. Y.
MILLIONS Bear Testimony to their Wonderful Curative Effects.
They are not a vile Fancy Drink, Made of Poor Rum, Whiskey, Proof Spirits and Refuse Liquors, doctored, spiced and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the native roots and herbs of California, free from all Alcoholic Stimulants. They are the GREAT BLOOD PURIFIER and A LIFE GIVING PRINCIPLE, a perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. No person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.
They are a Gentle Purgative as well as a Tonic, possessing also, the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver, and all the Visceral Organs.
FOR FEMALE COMPLAINTS, whether in young or old, married or single, at the dawn of womanhood or at the turn of life, these Tonic Bitters have no equal.
For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have been most successful. Such Diseases are caused by Vitiated Blood, which is generally produced by derangement of the Digestive Organs.
DYSPEPSIA OR INDIGESTION, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms are the offsprings of Dyspepsia.
They invigorate the Stomach and stimulate the torpid Liver and Bowels, which render them of unequaled efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.
FOR SKIN DISEASES, Eruptions, Tetter, Salt Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-Worms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.
Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples Eruptions or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
Pin, Tape and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist, there is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vermifuges, no anthelmintics, will free the system from worms like these Bitters.
Sold by all Druggists and Dealers.
J. WALKER, Proprietor. R. H. McDONALD & CO., Druggists and General Agents, San Francisco, California, and 32 and 34 Commerce Street, New York.

HASKELL, LYON & CO.,
WARFIELD'S COLDWATER SOAP
No Boiling! No Hard Rubbing! No Hot Water! No Washboards! No Blueing! No Injury to Garments or Hands!
No. 33 South Eutaw St.
The above firm having secured the exclusive right to manufacture and sell
Warfield's Patent Cold Water Self-Washing Soap,
in and for the State of Maryland and District of Columbia, invite the attention of the public to this very superior SOAP, which washes thoroughly in any kind of water—hard, soft or salt—*without boiling.* They also guarantee that it will not injure even the finest fabrics.
Not only does it save labor, fuel, clothes, &c., but by using it housekeepers get rid of the discomfort of hot water in summer, which causes frequent colds, especially to those who go from a steaming hot wash-room to hang out clothes.
Thousands of testimonials to its great excellence are at hand, but no evidence can equal that derived from one's own observation and experience. To *know* the virtues of this Soap you have only to try it. A single bar is sufficient for the ordinary week's washing of a family of eight persons.
By its own action it dissolves the grease and other things that soil, and liberates them from the garment, thus quietly and quickly accomplishing that which is usually done with labor and hard usage of the clothes by means of a washboard or machine. Very little hand-rubbing is required with this Soap, except when the clothes are much soiled, or the dirt firmly imbedded in the fabric.
The clothes require no blueing if dried in the sun, as they are bleached every time they are washed. Clothes washed with this soap will last *fully* twice as long as when washed in the ordinary way with the Soaps hitherto most popular. To consumers, therefore, it is unquestionably the CHEAPEST SOAP ever manufactured. The usual discount to the Trade. aug5-6m.

RUPTURE CURED.
MARSH'S
Radical Cure Truss,
Springs will not Rust. Pads Impervious.
The best and most effectual Truss known for the cure and relief of HERNIA or RUPTURE. This Truss has received the sanction of the most eminent Physicians and Surgeons of this country; who do not hesitate to recommend it to those afflicted with Hernia as being superior to all others.
It is the only Truss that will retain the bowels with any certainty, and the wearer can feel assured that he is using a remedy that will be at all times safe and effectual in its operations. Of this we guarantee entire satisfaction to all who may come under our treatment.
LADIES' SILK ELASTIC ABDOMINAL BELTS for Corpulency, falling of the Womb, and as a support to the Back and Abdominal Muscles. Anklets, Knee Caps and Stockings for Varicose Veins, Ulcers and Weak Joints.
SHOULDER BRACES for Ladies, Gents and Children, for the cure of stooping of the Shoulders and as a Chest Expander.
PILE INSTRUMENTS, the most superior article in use—light, easily adjusted and effectual. Instruments for all Physical Deformities, Curvature of the Spine, Bow Legs, Club Feet, &c., &c.
Ladies' Apartments with Lady Attendants.
Agent for Clement's CELEBRATED ARTIFICIAL LIMBS.
Agent for Grandall's Patent Rubber-tipped CRUTCHES.
Agent for Dr. Babcock's Silver Uterine Supporter.
Agent for Dr. Wadsworth's Stem Persory.
All of the above scientifically applied and satisfaction given.
Orders per mail promptly attended to.
S. MARSH,
No. 92 W. Baltimore Street,
jly8. BALTIMORE, MD.

TO ALL BUSINESS MEN!

ON RECEIPT OF Fifty Cents, I will forward to any address a RECIPE FOR PREPARING A BLACK INK, which is so indellible that even Oxalic Acid will not remove it from anything that it is used upon. It is one of the very best writing fluids, and it cannot be beat as a marking ink. It is a jet black from the beginning, and flows beautifully from the pen, and costs only about Six Cents PER GALLON.
Address all letters to
W. A. STEWART,

THE EUREKA FANNING MILL.

THE GREATEST INVENTION OF THE NINETEENTH CENTURY!

Farmers Look to Your Interest!

THE attention of Farmers and Mechanics is particularly directed to the combined economy, utility and practicability of the Eureka Mill, and to the many other advantages it possesses over every other Fanning Mill which has been introduced to the public.
It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and has always been rewarded with the best of success. But not feeling satisfied with his former attainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Phythagoras—EUREKA!—signifying in the Grecian language, "I have found it." This has given the name to this new Mill.
In this Mill are all the former improvements to which have been added several more, adding still greater advantages than were at first anticipated, or even thought possible by the inventor himself. It embraces the three great essentials necessary in every invention:
It combines ECONOMY, UTILITY and PRACTICABILITY!
THE "EUREKA" MILL
Is small and lighter, and is capable of doing more and better work in a given time than any other Mill ever invented.
IT IS THE ONLY MILL
that will successfully remove from wheat all such pests as Cockle, Garlic, Oats, Rye, &c.
Should an extra quality of grain for seed or gristing purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of: for nearly one quarter of the grain cleaned in the common Mills is lost when sown, on account of shrunken kernels and inferior grain. The Eureka Mill saves all this, and gives seed every kernel of which will grow when put into the ground, and this saving will, in a short time, pay for the Mill.
HINES & BURCHINAL,
Chestertown, Maryland,
Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of Noland & Co., Port Deposit, Md., which is a guarantee that they will be put up in the best manner. jel7-tf.

THE WEED
"F. F."—Family Favorite,
Sewing Machine!
LOCK STITCH! STRAIGHT NEEDLE
The Most Simple, Elegant, Economical and Desirable of any in use.
"THE WEED" was awarded the HIGHEST PREMIUM for family purposes, in an exciting contest with EIGHTY-TWO others, and is the Best Finished Instrument of the kind in the whole Exhibition.—[Report Paris Exposition, Gallignani's Messenger, (French) June, 1867.]
ALSO, THE

J. B SAPPINGTON.
Store on Cross St., Opposite George E. Lambert's Coach Factory. nov5-y.

GOOD HARNESS
MADE AND SOLD AT
J. F. HOWARD'S HARNESS STORE
FOR $20.
Chestertown, Jan. 7, 1871.

THE TOURNAMENT
WAS A GRAND SUCCESS. Good Tilting—good Speeches—and good order. The Executive Committee and K. of P. deserve great credit. Gentlemen from a distance arrived the following day at Chestertown to join the thousands, supposing the tilting would have been postponed on account of the great storm the day and night previous. Taking into consideration the heaviness of the track it is believed there never was better time and riding done by the gallant knights of our sister counties. We would advise those who were so pleased to call at VICKERS', and examine all Summer Goods selling at first cost. To our gentlemen friends we would state, their bills are now made out up to July 1st, 1871, for settlement. Respectfully,
WM. A. VICKERS.
Chestertown, July 28, 1871.
