FARMERS' DEPARTMENT.

"He who by the plow would thrive,
Himself must either hold or drive."

SHEEP.

Some farmers of our acquaintance feel an antipathy to sheep, for the reason that they "bite close." We consider this their chief recommendation. They can only bite close where the pasture is short, and the pasture is short only on a poor farm. A poor farm will necessarily be, encumbered with briars, weeds and brush, in the fence corners. Under such conditions, we would say to a farmer who had $20 or upward in cash (or credit for it, and then let him borrow the amount, if he has to pay one per cent, a month for it,) invest it in as many ewes, not older than three years, as you can get for that money.—Put them this summer in such a field as we have described, and give them, in addition to what they can pick up, a pint of wheat bran and oat-meal daily, with free access to water and salt.

They will first "go for" the briars and clean them out; every portion of that field will be trodden over and over again, and the weeds will have no chance. Fold them on that field during Winter, and carry to them feed sufficient to keep them thriving. Get the use of a good buck in season—Southdown would be preferable—and in the Spring if you have luck (that means if you give them proper attention and feed regularly,) you will raise more lambs than you have ewes. The money will be more than doubled, and the wool and manure will pay for their feed and interest. In the spring you may put that field in corn, with the certainty of getting fifty per cent. increase of crop.

[From the Baltimore American.]

THE LIGHTS OF EXPERIENCE.

We have for years been urging the necessity of greater attention, on the part of our farmers, to the drainage of their lands in connection with a more thorough cultivation thereof, more especially in the increase depth of their plowing, and it is gratifying to find that all we have written upon the subject is fully confirmed by an eminent agriculturist in his experiments in the improvement of his own estates. In a recent reply to the frequent remark made to him by inquirers, that they had "no debth of soil," he said that there were many feet "of good honest land, but that it has only been skinned, the body remaining untouched. Now there is nothing really more easy and simple than deepening this thin staple to any reasonable required extent. Keep the top soil where it is, but break up the hitherto undisturbed soil, so that air and water can have free access into and through it, and so that the top soil and manure may rest upon broken ground and gradually mix with it. This has been my practice for the last twenty-eight years, and, as a natural consequence, I got those large crops which are the surprise of many who knew the poverty of the soil. I effect this object by following in the track of the first plow with another plow minus the breast, drawn by four or six horses, the first plow turning the top soil on to the broken under soil. The effects are prompt and obvious; rain-water sinks rapidly through the top soil into the broken under soil, and thus facilitates its passage to the drains. The top soil is thus left dry, and fit to receive the full benefit of warmth and changes of temperature; the subsoil having remained unbroken for ages, is panned down so tight as to become almost impervious, and certainly in a great degree debarred from atmospheric influences. All this becomes gradually changed by subsoiling or under-plowing, called trench-plowing. See what takes place on our heath. The upper soil has often been taken away; the exposed subsoil for a time remains barren, but after a certain period it becomes improved by the action of air and water, and is again well coated with vegetation, and is again robbed or stripped, as I have frequently witnessed during thirty years. Elements of fertility exist in our subsoil abundantly, but are in an unavailable or passive condition. They are raw, and want cooking by atmospheric exposure and influence. How well the late Rev. Samuel Smith of Lois Weeden understood this.—He not only exposed the subsoil to atmospheric action by plowing his top soil together, and leaving the intermediate space of raw subsoil uncovered, but greatly hastened the cooking process by intermixing with the bared subsoil plenty of manure, so that it became very quickly good feeding ground for the roots of plants. The adjoining root crops (Swedes) soon found this out, and occupied the hitherto barren soil with their fibres."

Mr. Mecht points to the evidences of the value of deep cultivation, as plainly shown wherever a ditch has been filled up, or where the drains have been deeply placed. In such cases, he says, the crops show a visible advantage for much more than twenty years. "Some fancy that the lands is there better drained, but the true reason is the deep loosening and disturbance of the soil; deep and good cultivation and manuring remain visible for nearly a century or more. He details a conversation with a friend whilst walking on his fields. He says:

"I asked what was the cause of one portion of the crop looking so much better than the rest. "Oh!" he said, "that was once a cottage garden long while ago. I have known the field fifty years, and it must have been some time before that." I have a proof of this, added Mr. M., on my own farm. In 1846 I exchanged two acres of land with a neighbor. These two acres (in common with the rest of my land) had been drained and deeply subsoiled about four years previously.—Twenty-five years have since elapsed, and during the whole of that period the crops on these two acres have shown a marked superiority over the rest of my neighbor's field. As a basis and permanent improvement, I look upon deep cultivation as equal in importance with manure. The two, combined with drainage, give the key to profit."

"The disturbance of the subsoil can never be too deep, provided the surface soil is allowed to remain uppermost, or gradually intermixed with the subsoil.—Every impediment to the fibres of plants is a loss to the farmer, causing delay in development; we all know that the compression of heavy land by carting or treading renders it comparatively barren—witness a cart tract. The elements of fertility are there, but are not available. The roots of plants descend many feet in a friable subsoil, naturally or artificially drained. The old story conveys a sound agricultural moral. The old man on his death bed told his sons that somewhere in his field he had buried some money.—The earth was deeply and carefully searched; the money was not found, but a treasure arose from the greatly increased produce, resulting from deep and perfect cultivation. Most of the great old docks, thistles and other weeds, that I see as I pass by rail, standing high above the field corn crops, have a safe and lasting endeavor in the undisturbed subsoil.—My agricultural friends, like myself, are, I know, fond of profit. Let me assure them that one of the most ready ways to get it is by deeper cultivation. Every farmer owns deep, friable soil—as it is no sinecure, let us make some—we can do so profitably if we but use the means."

THE AMERICAN WASHER.

PRICE $5.50.

The AMERICAN WASHER Saves Money, Time and Drudgery.

The Fatigue of Washing Day no Longer Dreaded, but Economy, Efficiency and Clean Clothing, Sure.

In calling public attention to this little Machine, a few of the invaluable qualities, (not possessed by any other washing machine yet invented,) are here enumerated.

It is the smallest, most compact, most portable, most simple in construction, most easily operated. A child ten years old, with a few hours' practice, can thoroughly comprehend and effectually use it. There is no adjusting, no screws to annoy, no delay in adapting! It is always ready for use! It is a perfect little wonder! It is a miniature giant, doing more work and of a better quality, than the most elaborate and costly. One-half of the labor is fully saved by its use, and the clothes will last one-half longer than by the old plan of the rub board. It will wash the largest blanket, three shirts at a time, washing thoroughly! In a word, the ablution of any fabric, from a Quilt to a Lace Curtain or Cambric Handkerchief, are equally within the capacity of this LITTLE GEM! It can be fastened to any tub and taken off at will.

No matter how deep rooted a prejudice may exist against Washing Machines, the moment this little machine is seen to perform its wonders, all doubts of its cleansing efficacy and utility are banished, and the doubter and detractor at one becomes its fast friends.

We have testimonials without end, setting forth its numerous advantages over all others, and from hundreds who have thrown aside the unwieldy, useless machines, which have signally failed to accomplish the object promised in prominent and loud sounding advertisements. It is as perfect for washing as a wringer is for wringing. The price—another paramount inducement to purchasers—has been placed so low that it is within the reach of every housekeeper, and there is no article of domestic economy that will repay the small investment so soon.

$5.50.

All that is asked for this GREAT LABOR SAVER is a fair trial. We guarantee each machine to do its work perfectly.

SOLE AGENTS FOR THE UNITED STATES,

VINEGAR BITTERS

VEGETABLE. FREE FROM ALCOHOL. PURELY. DE WALKER'S CALIFORNIA PUREST. VINEGAR BITTERS

J. WALKER, Proprietor. R. H. McDONALD & Co., Druggists and Gen. Ag'ts, San Francisco, Cal., and 32 & 34 Commerce St. N. Y.

MILLIONS Bear Testimony to their Wonderful Curative Effects.

They are not a vile **Fancy Drink,** Made of **Poor Rum, Whiskey, Proof Spirits and Refuse Liquors,** doctored, spiced and sweetened to please the taste, called "Tonics," "Appetizers," "Restorers," &c., that lead the tippler on to drunkenness and ruin, but are a true Medicine, made from the native roots and herbs of California, **free from all Alcoholic Stimulants.** They are the **GREAT BLOOD PURIFIER and A LIFE GIVING PRINCIPLE,** a perfect Renovator and Invigorator of the System, carrying off all poisonous matter and restoring the blood to a healthy condition. No person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and the vital organs wasted beyond the point of repair.

They are a Gentle Purgative as well as a Tonic, possessing also, the peculiar merit of acting as a powerful agent in relieving Congestion or Inflammation of the Liver, and all the Visceral Organs.

FOR FEMALE COMPLAINTS, whether in young or old, married or single, at the dawn of womanhood or at the turn of life, these Tonic Bitters have no equal.

For Inflammatory and Chronic Rheumatism and Gout, Dyspepsia or Indigestion, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these **Bitters** have been most successful. **Such Diseases** are caused by **Vitiated Blood,** which is generally produced by derangement of the **Digestive Organs.**

DYSPEPSIA OR INDIGESTION, Headache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the regions of the Kidneys, and a hundred other painful symptoms are the offsprings of Dyspepsia.

They invigorate the Stomach and stimulate the torpid Liver and Bowels, which render them of unequaled efficacy in cleansing the blood of all impurities, and imparting new life and vigor to the whole system.

FOR SKIN DISEASES, Eruptions, Tetter, Salt Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-Worms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin, of whatever name or nature are literally dug up and carried out of the system in a short time by the use of these Bitters. One bottle in such cases will convince the most incredulous of their curative effects.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul, and your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

Pin, Tape and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist, there is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased humors and slimy deposits that breed these living monsters of disease. No system of Medicine, no vermifuges, no anthelmintics, will free the system from worms like these Bitters.

Sold by all Druggists and Dealers.

J. WALKER, Proprietor. R. H. McDONALD & CO., Druggists and General Agents, San Francisco, California, and 32 and 34 Commerce Street, New York.

HASKELL, LYON & CO.,

No Boiling!
No Hard Rubbing
No Hot Water!
No Washboards!
No Blueing!
No Injury to Garments or Hands!

No. 33 South Eutaw St.
BALTIMORE, MD.

The above firm having secured the exclusive right to manufacture and sell

Warfield's Patent Cold Water Self-Washing Soap,

in and for the State of Maryland and District of Columbia, invite the attention of the public to this very superior SOAP, which washes thoroughly in any kind of water—hard, soft or salt—*without boiling.* They also guarantee that it will not injure even the finest fabrics.

Not only does it save labor, fuel, clothes, &c., but by using it housekeepers get rid of the discomfort of hot water in summer, and of steam in the house during winter, which cause frequent colds, especially to those who go from a steaming hot wash-room to hang out clothes.

Thousands of testimonials to its great excellence are at hand, but no evidence can equal that derived from one's own observation and experience. To *know* the virtues of this Soap you have only to try it. A single bar is sufficient for the ordinary week's washing of a family of eight persons.

By its own action it dissolves the grease and other things that soil, and liberates them from the garment, thus quietly and quickly accomplishing that which is usually done with labor and hard usage of the clothes by means of a washboard or machine. Very little hand-rubbing is required with this Soap, except when the clothes are much soiled, or the dirt firmly imbedded in the fabric.

The clothes require no blueing if dried in the sun, as they are bleached every time they are washed. Clothes washed with this soap will last *fully* twice as long as when washed in the ordinary way with the Soaps hitherto most popular. To consumers, therefore, it is unquestionably the CHEAPEST SOAP ever manufactured. The usual discount to the Trade. aug5-6m.

RUPTURE CURED.

MARSH'S Radical Cure Truss,

Springs will not Rust. Pads Impervious.

The best and most effectual Truss known for the cure and relief of HERNIA or RUPTURE. This Truss has received the sanction of the most eminent Physicians and Surgeons of this country; who do not hesitate to recommend it to those afflicted with Hernia as being superior to all others.

It is the only Truss that will retain the bowels with any certainty, and the wearer can feel assured that he is using a remedy that will be at all times safe and effectual in its operations. Of this we guarantee entire satisfaction to all who may come under our treatment.

LADIES' SILK ELASTIC ABDOMINAL BELTS for Corpulency, falling of the Womb, and as a support to the Back and Abdominal Muscles. Anklets, Knee Caps and Stockings for Varicose Veins, Ulcers and Weak Joints.

THE EUREKA FANNING MILL.

THE GREATEST INVENTION OF THE NINETEENTH CENTURY!

Farmers Look to Your Interest!

THE attention of Farmers and Mechanics is particularly directed to the combined economy, utility and practicability of the Eureka Mill, and to the many other advantages it possesses over every other Fanning Mill which has been introduced to the public.

It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and has always been rewarded with the best of success. But not feeling satisfied with his former attainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Phythagoras—EUREKA!—signifying in the Grecian language, "I have found it." This has given the name to this new Mill.

In this Mill are all the former improvements to which have been added several more, adding still greater advantages than were at first anticipated, or even thought possible by the inventor himself. It embraces the three great essentials necessary in every invention:

It combines ECONOMY, UTILITY and PRACTICABILITY!

THE "EUREKA" MILL

Is small and lighter, and is capable of doing more and better work in a given time than any other Mill ever invented.

IT IS THE ONLY MILL

that will successfully remove from wheat all such pests as Cockle, Garlic, Oats, Rye, &c.

Should an extra quality of grain for seed or grinding purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of; for nearly one quarter of the grain cleaned in the common Mills is lost when sown, on account of shrunken kernels and inferior grain. The Eureka Mill saves all this, and gives seed every kernel of which will grow when put into the ground, and this saving will, in a short time, pay for the Mill.

HINES & BURCHINAL,
Chestertown, Maryland,

Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of Noland & Co., Port Deposit, Md., which is a guarantee that they will be put up in the best manner. jel7-tf.
