MIGHTY MICHIGAN WINS SILVER CUP

Finishes Third Of More Than 100 Cars In 108 Mile Race

The following telegram was received at the Michigan factory, in Kalamazoo, July 10th:

"V. L. Palmer:
Michigan Forty finished third in road reliability race—Camden to Wildwood, New Jersey—one hundred and eight miles. Over one hundred cars entered. Pierce Arrow first. Our prize: Silver Cup. Car driven by Dr. Faulkner, of Bridgeton, New Jersey.
E. F. GERBER."

This is one of many similar performances that the Mighty Michigan Forty has given this season.

The even balancing of all parts to match the strength represented by the Mighty Michigan Motor and Chassis is a characteristic which has become distinctive of this Car. It is asserted that this accounts for the sensational success of the Michigan among medium priced cars. It is an illustration of the value of thirty years manufacturing success behind the product.

Dearborns

Our trade has increased so much from year to year on Dearborns that our supply has always run short about this season of the year. We have built a larger quantity this season than ever before, and we now have on hand a liberal supply ready for immediate delivery. They have all Cypress bodies, Oak Riggings and our own wheels. If you are going to need one this season now is the time to order. We will book your order, guarantee delivery later, or we will deliver at once, if you prefer.

Cream Harvesters

Now is the time when you need a Separator. It takes all the impure substances from the milk, saves all the cream, and each cow will make on an average one pound of butter more per week. We have on our floor now the

BLUE BELL

We have many satisfied users of these machines and they do the work. One gentleman said a short time ago if he could not buy another he would not take $200 for his. We are so well satisfied of its ability to perform all the service we claim for it that we are willing to bring it to your farm and let you use it for a week or ten days, and if you are not fully satisfied we will take the machine away.

You run no risk. We give you full instructions how to operate it and we know you will be satisfied with the results. Can we bring it?

Gasoline Engines

The I. H. C. Engines are so well known here now that we hardly need to elaborate any on the merits of them. We only want to call your attention to the fact that we are still the agents for them and any size, up to and including four-horse power, can be seen at our store.
