STATISTICS OF THE OYSTER TRADE.—Mr. R. H. Edmunds, of the Baltimore *Journal of Commerce*, has, at the request of Gen. F. A. Walker, superintendent of the census, compiled as complete statistics of the oyster trade as was possible with the imperfect records of the business. The value of this information will be appreciated by all, and it is certainly needed, for as Mr. Edmunds says, "notwithstanding the great importance and value of the oyster trade of the Chesapeake bay, it is a subject upon which there has been no reliable information, either as regards its extent, the amount of capital invested, or the past and present condition of the business. The Legislatures of Maryland and Virginia have, at every session for many years, revised and re-revised the laws upon this subject for their respective States, but have always been content to work in the dark, knowing nothing practically, and never seeing the value of obtaining full information upon so important an industry. There is, perhaps, no subject of such vital importance to either State that is so little understood. By some it is as greatly overestimated as it is underestimated by others. Many who have never lived near the water and who gain their information from the rose-colored pictures drawn by correspondents, who see only the best features of the trade, imagine that an oyster bed is a mine of wealth from which every oysterman may gather a liberal competence with but little labor. Nothing could be more erroneous."

The report is based upon investigations made by the request of Professors Spencer F. Baird and G. Brown Goode, and will be published in the *Journal of Commerce*.

THE SUN AT MIDNIGHT.—The spectacle of the shining sun at midnight attracts many foreigners to Swedish Lapland during the month of June. For six weeks there is scarcely any night in the north of Sweden; the sun never sets, and the soil, constantly heated, produces in a month and a-half barley and other crops. At that time of the year the Laplanders pen up their reindeer and move their huts towards the cultivated fields. Being very hospitable, they greet with joy the arrival of tourists, who generally meet at Mount Gellaware, 148 kilometres from Lulea. From that hill, which is 580 metres high, the beautiful spectacle of the "midnight sun" can be admired in better conditions than from any other place. The 24th of June is the day selected for the ascension; it is the longest day in the year, the sun being twenty-two hours above the horizon. This year the 24th of June was not favored by fine weather, and, owing to a cloudy sky, the sun was not visible at midnight, but the following days travelers were well rewarded for their trouble, the sun shining brightly at midnight.

A GENTLEMAN who attends church near Newark Del., recently invited one of the elders to his house to take dinner. The invitation was accepted and upon being seated the host called upon him to ask the blessing which he did very creditably; while doing so the little son of the host scrutinized him closely, and when finished addressed him as follows: "What was that you said?" The elder replied, "It was a blessing; doesn't your father ask one?" "Yes," said the little boy, but he doesn't say it in that way." "How does he say it, then?" quoth the elder. "Well" says the boy, "he looks all over the table and says 'Oh, the devil! is that all you've got for dinner?'"

BUSINESS LAW.

Notes bear interest only when so stated.

It is not legally necessary to say on a note "for value received."

A note drawn on Sunday is void.

A note obtained by fraud, or from a person in a state of intoxican cannot be collected.

ONE of the simplest ways to get rid of rats is to place within their reach a pan of flour mixed with unslaked lime, and a pan of water placed beside it. The lime causes thirst, and the rats die almost directly after they drink.

The introduction of the

English Condition Powders

In our American market, exempt from duty, freight, &c., has proved to the thousands who are daily using them that they have been a long felt want.

For the past half century they have grown in public favor and general use in all quarters of the Globe, until their name and fame is world-wide.

There is not an ailment (known in Veterinary practice) of the Horse, Cow, Sheep or Pig, but yield to their miraculous influence.

Their rare balsamic properties are conveyed to every part of the brute creation, and immediate relief is given.

They heal Internal Ulcerations, banish all derangements, and give the stomach proper tone.

No Stock-owner need despair a cure, whilst this *never-failing remedy* can be obtained; and the reputation they bear from all quarters of the *Globe* is fully borne out by the success they have attained—corroborated by testimonials of all classes and countries.

They have cured Thousands of Cases conceded Incurable.

The many ailments of each class of animals and their various forms are too extended to discuss. But we *guarantee* in each case a tenfold remuneration for the small investment that places them within reach of the most humble who often have to rely on their stock for support.

The majority are more directly interested in Horses, and to them we say one trial will convince you that they work wonders; and no matter how doubtful the case is, you will invariably be benefitted, & your animals made & kept healthy by their use.

English Condition Powders

are a *certain* and *speedy remedy*, no matter what the disease is, or how complicated. They are not a temporary, but have invariably proved to be a *radical cure*.

They *restore health* and *produce flesh, milk and butter*. They aid digestion and assimilation, and thoroughly renovate the system, and will be found invaluable and remunerative to every stock-owner.

TO CONSUMERS.—They are only one-third the price of all others, and are as superior in quality as quantity.

The following TESTIMONIALS speak of their merits:

Baltimore, June 17, 1879.

Mr. P. Warren—Sir: We have been handling your English Condition Powders for some time past, and find that their merits as compared with similar compounds, meet a want seldom (if at all) found in goods of a similar class. With Patrons of Husbandry they are growing into favor rapidly. Signed: H. O. DEVRIES, Ag't Maryland State Grange.

Ashland House, 24th St. & 4th Avenue, *New York City*, Mar. 10, 1879.

I have used the English Condition Powders and can recommend them to the turf profession as being pure and similar to the imported, and would use no other.—For purity and quality they are *unequalled* and invaluable to horsemen.

Signed, HARRY HARTMAN, Late manager Budd Doble's Turf Stock.

Baltimore, Md., Aug. 6, 1879.

P. Warren, Esq.—Sir: The English Condition Powders are conceded by all my patrons to be the *purest, cheapest* and *best* on the market; and have worked wonders where used. I sell five times as many of *them* as all others combined.

Resp'y, &c., THOS. J. STACK, Feed & Grain dealer, 112 Linden ave.

Baltimore, Md., Aug. 11, 1879.

Mr. P. Warren—I used one pound box of your English Condition Powders on a mare which was so poor and weak she had to be raised when she laid down. She is now in perfect health and good flesh, and I credit it all to the Powders.

GEO. R. HEBBELL, Penna. ave. and Clifton st.

AND THOUSANDS OF OTHERS.

Rev. Dr. L. W. BATES, one of the most distinguished ministers of the M. P. Church, wrote and published the following editorially in the *Methodist Protestant:*

"Any in need of his (DR. WORTMAN'S) services may employ him without hesitation. From knowledge of his practice for the past two years, I have no doubt that he will cure nine hundred and ninety-nine cases in every thousand. I speak, not only from personal experience, having been cured by him after twenty-two years of suffering, but also from a knowledge of a host of patients who applied to me as a reference. Out of some twenty-five or thirty cases that came under my observation, through this means, he has not failed in one. L. W. BATES."

To WHEAT GROWERS.

The undersigned, PIONEER in the manufacture of Fertilizers in this city, and ORIGINATOR in 1858 of the Formulas and processes of manufacture of

"EXCELSIOR" and Ammoniated Phosphate

So well and favorably known by the Agricultural public, relying upon his experience and personal reputation hitherto acquired in the uniform excellence of these Fertilizers, as manufactured by him, continues to offer them to the Farmers and Planters of Maryland and Virginia, with the assurance that the high standard quality of each will be maintained as heretofore.

The above are the most concentrated FERTILIZERS ever offered to the farmer—combining all the stimulating qualities of Peruvian Guano, and the ever durable fertilizing properties of Bones, in fine, dry powder, prepared expressly for drilling.

For growing Wheat, it is the universal opinion of the Farmers of Maryland and Virginia, after over twenty years' experience in the use of these Fertilizers manufactured by me, that an application of 100 pounds is equal in its effects to 200 pounds of any other fertilizer or guano, therefore fully 50 per cent. cheaper.

With my present advantages and superior facilities for manufacturing, I challenge competition with any Fertilizer sold in the United States, in Quality, Mechanical condition and Price.

By strictly adhering to my Original Formulas, using only the most concentrated materials and superintending in person their manufacture, as for the past *twenty years*

UNIFORM QUALITY IS GUARANTEED.

Farmers, to secure the ONLY GENUINE EXCELSIOR and PHOSPHATE prepared according to my Original Formulas established in 1858, should see that every Bag is branded as above, with the ANALYSIS and MY NAME IN RED LETTERS.
