CHRISTIAN SCIENCE SERVICES

"Truth" will be the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, January 22.

The Golden Text will be from Deut. 22: 3, 4- "Ascribe ye greatness unto our God. He is the Rock, his work is perfect; for all his ways are judgement; a God of Truth and without iniquity, just and right is he."

Among the citations comprising the Lesson-Sermon will be the following from the Bible—Luke 11:1. "And it came to pass, that, as he was praying in a certain place when he ceased one of his disciples said unto him, Lord, teach us to pray, as John taught his disciples."

The Lesson-Sermon also will include passage from the Christian Science textbook, Science and Health with Key to the Scriptures, by Mary Baker Eddy, among which is the following, page 16—Our Master taught his disciplles one brief prayer, which we name after him, the Lord's Prayer. Our Master said, After this manner therefore pray ye, and then he gave that prayer that covers all human needs.

Services: Sunday, 11 a. m., Sunday school 9:45 a. m. Wednesday evening testimonial meetings at 8 o'clock, 11 N. Harrisson St., Easton, Md.

Safe Driving Is Cheaper

A merit rating plan, under which automobile owners will pay insurance rates in accordance with their record of safety, has been approved by Louis H. Pink, State Insurance Superintendent of New York.

Under the new plan applying to all companies in New York, the drivers are classified into A, B and C groups. Class A drivers are those who have not been involved in an accident or in one resulting only in property damage. Lowest premiums will be accorded this group.

Class B. drivers include those who have had one accident that resulted in bodily injury only, or one accident that resulted in both injury and property damage. They will be charged 10 per cent more than Class A for their insurance.

Class C includes those having two or more accidents resulting in either injury or property damage and will have to pay 15 per cent more than the drivers in Class A.

Classification are basesd on an "experience period" of 21 months, beginning two years prior to the effective date of the policy and ending three months prior thereto.

A close watch is to be kept to assure accurate rating information, a large responsibility for accuracy being placed on the company writing the policy, and previous carriers are obligated to supply their records for rating purposes without delay.

Eastern Shore Briefs

PAST MASONIC LEADERS MEET

Federalsburg— E. Hambleton Grace of Nanticoke Lodge of this town was elected president of the Caroline-Dorchester Past Master Association of Masons at its annual meeting recently in Preston.

Wilmer S. Noble, also of Nanticoke Lodge, was reelected treasurer for the fifteenth consecutive year. Membership of the association now numbers 103.

BODY OF MAN FOUND HANGING FROM TREE

Dover, Del.—The frozen body of George E. Cannon, 87-year old widower, who had been missing for at least a week from his home near Dulaney's, was found hanging from a tree in some woods near Clayton Saturday.

SEEK TO CUT POLL COSTS IN SOMERSET

Princess Anne, Md.—Somerset county political leaders counted speculatively the cost of four election recount hearings and talk developed concerning the advisability of voting machines.

"I don't know just what the cost of voting machines is," declared Ralph W. Powell, chairman of the Somerset county delegation in the Democratic State Central Committee, but at any reasonable price they would be cheap for this county, compared to the expense of our present method of holding elections and recounts.

ACCUSED OF OPERATION OF 650-GALLON STILL

Elkton — Sheriff David J. Randolph, who, since December 20, has been on the lookout for Archie Hedges, of the Chesapeake City section, on a charge of operating a 650 gallon still in Pensels Woods, arrested him Saturday night at the home of Mrs. Kathryn Goodyear, near here.

When he called at the house, the Sheriff is reported to have said, Mrs. Goodyear began tossing bottles of liquor out of a window.

Both were arrested. Hedges was turned over to the Federal authorities and taken to Baltimore, while Mrs. Goodyear gave bail for a further hearing on a charge of having untaxed liquor in her possession.

GIVE COLOR EFFECTS

The joys of an open fire can be greatly enhanced these winpleasing color effects in the flames, according to C. F. Winslow, specialist in forestry for the University of Maryland Extension Service. These colors may be obtained through use of a number of different chemicals which are entirely harmless and can be secured from any wholesale drug company.

Mr. Winslow says that for best results the wood which is to be used in the fireplace should be soaked for at least several hours in a solution made up of one pound of chemicals to one gallon of water. Following the treatment the wood should be spread out for several days to dry thoroughly before using.

Colors which may be obtained in this manner are as follows: purple from lithium chloride, orange from calcium chloride, blue from copper sulphate or barium nitrate, red from strontium nitrate and green from copper chloride.

First Things First

"Hurry—you know we are dining with the MacTavishes this evening."

"All right. Let's eat dinner and be on our way."
