Save Independent Medicine

We do not hear much agitation for socialization of medicine these days. Our system of private medicine has been responsible for so many great achievements that demands for revolutionary changes are not given the support of thinking people.

However, proposals are occasionally made which, though they may seem superficially sound, would extend a measure of political control over medicine which would pave the way for socialization or regimentation of the doctors at some future date.

A recent example of that is to be found in the proposal that the Social Security laws be broadened to make health insurance compulsory for all workers and their families.

If this proposal were made into law, the doctor would have to look to the insurer.

Libraries in the U. S. Navy date back to the days of John Paul Jones.

FOR FENCING IN YOUR VICTORY GARDEN

Many of our customers have planted small "victory" gardens and are looking forward to a bountiful harvest of "home grown" vegetables for summer use. In many instances there'll be vegetables for home-canning and even a few for the neighbors.

But in addition to the proper care, most gardens will need protection from the kiddies, or from the neighbor's chickens or from careless footsteps of the grownups.

We recommend the economical use of low-cost "chicken" wire as your "victory" garden fence. It's available in any height and length in a variety of mesh sizes. May we quote you prices?
