TRADE MARK

WILBUR W. HUBBARD'S FERTILIZERS

MUST HAVE

Superior quality and absolute Uniformity and Purity. This spring makes their 64th season in business and their trade has increased each year in spite of competition, their sales for the past year having been larger than ever before. Can the sales of an inferior article constantly increase all these years?

Our fertilizers are not better than all others, but they have been, and we are willing for you to try them in competition with any goods on the market.

WE PRESUME

you are now thinking about Asparagus, Corn, Potatoes, Peach Trees and top dressing your hay. Well we have the goods to apply and at all right prices.

BUT FOR TOMATOES

Everybody knows that our Peerless is the goods to use on them, for it has quality and is made of the very best materials known to the trade and one ingredient we use in it is the only phospate that contains this article outside of France where it has been used so successfully in tomato and truck fertilizer.

Mr. Jas. F. David of Smyrna says he grew with it last year the finest tomatoes he ever saw grow he picked a basket that weighed 1½ lbs. each. He grew onions that measured 13 inches in circumference. He grew corn some stalks 13½ feet high and ears 14 inches long. The late Captain Emory grew on one occasion 17 tons per acre. Mr. Zac T. Gilbert grew 19 tons to the acre. Mr. G. W. Collins has bought as high as 50 tons per year, and his men grew from 12 to 15 tons per acre. We have sold already in Anne Arundel county, the lower counties and New Jersey, hundreds of tons. Messrs. Baker and Morgan have bought as high as twelve hundred dollars worth; Captain Dashiel says he would have it if he had to give $50.00 per ton for same. Mr. Joseph Downey says when he was canning that he could actually tell the difference in tomatoes grown with Peerless when brought to his cannery. Mr. Numsen says he knows that tomatoes grown with our goods are fine. Mr. Frank Moore, who runs Assaw Bains & Co's cannery, says the best tomatoes brought there are from Peerless. Mr. Loose, a customer of his, says a ton of Peerless grew him $96.00 worth more tomatoes than another goods costing $7.00 less per ton. Mr. Money says it is certainly good. We could go on, but with a testimonial will close.

Unsolicited some time ago Mr. J. W. Elburn & Son came in our office and said: "I believe your Peerless to be the best tomato goods I ever saw. You remember what an advocate I was of it when I lived out at the mill. Well, wherever I have lived since, on the Western Shore or elsewhere, I would have it, and last year I put some of this same goods on some onions grown from the seed, and they were as fine as Burmudas. Many measured 4 inches in diameter, and I grew over 600 bushels per acre, or at rates of 1162 baskets. I used it on strawberries and picked 8000 quarts per acre."

WILBUR W. HUBBARD,

CHESTERTOWN, MD.

A NATURAL TONE TALKING AND SINGING MACHINE

FREE

ABSOLUTELY. Upon the completion of a $50.00 purchase from our vast stock whether it is Furniture, Carpets, Mattings, Mattresses, Lace Curtains, Portieres Window Shades, Wall Papers, Paints, Leads, Linseed Oil, Window Glass of which we carry in stock about sixty sizes, Oil Cloth or Linoleum. We issue coupons, so that you don't have to purchase $50.00 worth in a day unless you want to. We have many customers who will be entitled to a machine in one day.

JOHN BARTLEY, Chestertown, Md.

THE TIMBER SUPPLY.

Three Times as Much Timber Used Each Year as the Forest Grows.

Every person in the United States is using over six times as much wood as he would use if he were in Europe. The country as a whole consumes every year between three and four times more wood than all of the forests of the United States grow in the meantime. The average acre of forest lays up a store of only 10 cubic feet annually, whereas it ought to be laying up at least 30 cubic feet in order to furnish the products taken out of it. Since 1880 more than 700,000,000,000 feet of timber have been cut for lumber alone, including 80,000,000,000 feet of coniferous timber in excess of the total coniferous stumpage estimate of the Census in 1880.

These are some of the remarkable statements made in Circular 97 of the Forest Service, which deals with the timber supply of the United States and reviews the stumpage estimates made by all the important authorities. A study of the circular must lead directly to the conclusion that the rate at which forest products in the United States have been and are being consumed is far too lavish, and that only one result can follow unless steps are promptly taken to prevent waste in use and to increase the growth rate of every acre of forest in the United States. This result is a timber famine. This country is today in the same position with regard to forest resources as was Germany 150 years ago. During this period of 150 years such German States as Saxony and Prussia, particularly the latter, have applied a policy of government control and regulation which has immensely increased the productivity of their forests. The same policy will achieve even better results in the United States, because we have the advantage of all the lessons which Europe has learned and paid for in the course of a century of theory and practice.

Lest it might be assumed that the rapid and gaining depletion of American forest resources is sufficiently accounted for by the increase of population, it is pointed out in the circular that the increase in population since 1880 is barely more than half the increase in lumber cut in the same period. Two areas supplying timber have already reached and passed their maximum production—the Northeastern States in 1870 and the Lake States in 1890. To-day the Southern States, which cut yellow pine amounting to one-third the total annual lumber cut of the country, are undoubtedly near their maximum. The Pacific States will soon take the ascendency. The State of Washington within a few years has come to the front and now ranks first of all individual States in volume of cut.

At present bnt one-fifth of the total forest area of the United States is embraced in National Forests. The remaining four-fifths have already passed or are most likely to pass into private hands. The average age of the trees felled for lumber this year is not less than 150 years. In other words, if he is to secure a second crop of trees of the same size, the lumberman or private forest owner must wait, say, at least one hundred years for the second crop to grow. As a rule, such long-time investments as this waiting would involve do not commend themselves to business men who are accustomed to quick returns. But the States and the Nation can look much farther ahead. The larger, then, the area of National and State control over woodlands, the greater is the likelihood that the forests of the country will be kept permanently productive.

THE HUMAN BODY.

It is worth while to remember that the human body has the most perfect sewerage system that has ever been devised. Just as in that of a great city, the sewerage system of the individual is designed to carry away the waste, which, allowed to collect, would cause discomfort, in all probability followed by serious disease. Hence the sewers of the body must not be allowed to become clogged. Yet that is just what is the matter with the man or woman who suffers from constipation. And when constipation becomes chronic, more is required for its perminent releaf than a mere passage of the bowels. Governing muscles must be strengthened and restored to their natural condition of elasticity. Many physicians of repute find that this can be done by the use of the following prescription: ½ oz. Fluid Extract of Senna, ½ oz. Rochelle Salts, 1 oz. Aro-Sagrada, 30 grains Bi-carbonate of Soda, ½ oz. water and 1½ ozs. of Glycerine. A teaspoonful of this is given at bed time and before each meal, and this is continued until there is a free movement of the bowels. The ingredients indicated are obtainable at any first class pharmacy.—X.

AN unusual phenomenon has been observed at Delaware City recently, in the canal near the bridge. The herring, and they are countless in number, spring from the water in a solid body of millions, jumping about two feet and making a sound that is only compared to a rushing roar. It is thought that they do this in order to get more fresh air, as they are dying by the thousands.

"This is awfully stick weather."

"Do you find it so?"

"Yes, Bilkins stuck me for another five this morning." —Cleveland Plain Dealer.

MISS ADELAIDE NICHOLS

PERIODS OF PAIN

While no woman is entirely free from periodic suffering, it does not seem to be the plan of nature that women should suffer so severely. Irregularities and pain are positive evidence that something is wrong which should be set right or it will lead to serious derangement of the feminine organism.

Thousands of women, have found relief from all periodic suffering by taking Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, as it is the most thorough female regulator known to medical science.

It cures the condition which causes so much discomfort and robs that period of its terrors. Women who are troubled with painful or irregular functions should take immediate action to ward off the serious consequences and be restored to health and strength by taking

Lydia E. Pinkham's Vegetable Compound

Miss Adelaide Nichols of 324 West 22nd Street, New York City, writes:—Dear Mrs. Pinkham:-"If women who suffer would only rely upon Lydia E. Pinkham's Vegetable Compound their troubles would be quickly alleviated. I feel greatly indebted for the relief and health which has been brought to me by your inestimable remedy."

Lydia E. Pinkham's Vegetable Compound cures Female Complaints such as Falling and Displacements, and Organic Diseases. Headache, General Debility, Indigestion, and invigorates the whole feminine system. For the derangements of the Kidneys of either sex *Lydia E. Pinkham's Vegetable Compound* is excellent.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. From the symptoms given, the trouble may be located and the quickest and surest way of recovery advised.
