SATURDAY, JULY 25, 1908.

A BEE in an apple eaten by a hog belonging to Albert Burke, at Red Pump, Md., stung the animal in the throat and caused it to suffocate.

GOMPERS AND MITCHELL, the great labor leaders, have announced their intention of supporting Bryan and Kern. How's that for a starter? This is the first time that Mr. Bryan has had the support of the great labor organizations. It is simply a whole stack of straw to show how the wind is blowing.

THE Cochran and Jones Lumber Company was incorporated to purchase, lease or otherwise acquire timber, farm and grazing lands in Delaware and Maryland. The incorporators are George F. P. Cochran, George L. Townsend and Henry Corbit Jones, all of Middletown. The capital stock is $50,000. It is reported that this company will start a lumber yard at Georgetown, this county.

IT was stated this week by a number of business men at Ocean City that there has been more active business at that resort so far this year than has been done in years when the saloons were wide open. The large number of people already at Ocean City indicate that the season wil be a profitable one to the merchants.

THE 127th session of Washington College, Chestertown, begins September 16th, as per announcement in our advertising columns. This college offers four courses of study—classical, latinscientific scientific, each leading up to the degree of Bachelor of Arts, and normal, leading to the normal diploma, which entitles the holder to teach in any county of the State without examinations. Sub-Freshman and Sub-Normal classes are maintained for the benefit of those who desire a thorough preparation. In the Collegiate Department the elective system enables each student to select the studies suited to his particular needs.

WITH the trip of the pay car on Monday the employes of the P., B. & W. R. R. received their last pay in check form. In the future they will be paid in cash from a steel car containing a regular bank. By the new system the three days that it required to make out the checks will be saved.

On the pay-rolls of the Pennsylvania Railroad are 1350 active employes who have been with the road more than 40 years, beside there are 1013 who have served the company more than 40 years, but have retired and are receiving pensions.

Roads in Two Counties Fixed.—The State Road Commission, after arguments last Wednesday by delegations from St. Mary's and Calvert counties for and against several proposed routes for improved roads, decided to stand by its original selections of routes in these counties. The next meeting of the commission will be held next week when preliminary routes for roads will be located in several counties. On August 4 public hearing similar to that of Wednesday will be given on preliminary routes already selected in Cecil, Kent, Caroline Queen Anne's and Talbot counties. After these public hearings the roads to be improved in those counties will be permanently located. The taxpayers of this county should bear the date in mind and hold a public meeting in the meantime and select a route that will be satisfactory to the majority of taxpayers and not put it off until the route is selected by the commission before they make their "kick," when it will be entirely too late to accomplish anything.

Washington College

CHESTERTOWN, MARYLAND.

127th Session Begins September 16, 1908.

The College offers four courses of study—Classical, Latin-Scientific, Scientific (each leading to the degree of Bachelor of Arts,) and Normal (leading to the Normal Diploma, which entitles the holder to teach in any county of the State without examinations.)

Sub-Freshman and Sub-Normal Classes are maintained for the benefit of those who desire a thorough preparation.

In the Collegiate Department the elective system enables each student to select the studies suited to his particular needs.

Students are provided with good board and comfortable, well-furnished quarters. The buildings are equipped with every modern convenience—steam heat, electric lights, baths.

Were students may pursue their studies in a highly moral community, amid healthful and beautiful surroundings, under careful supervision of health and habits, at very low rates.

A. P. MATTHEWS,

jy18-tf Chestertown

CHILD KILLED BY A REAPER

Machine Driven By Father Passes Over Baby In Wheat—Other Accidents.

Frederick, Md., July 11.—Mr. Henry Deardorff, of near Booneaville, a farmer, living across the Maryland State line in Pennsylvania, drove a reaper over his little child, killing it almost instantly.

The little boy had been playing at the barn while the father was hitching horses to the machine. Unobserved the child crawled into the field and lay down under a tree in the wheat. Thinking the child was still in the barn Mr. Deardorff drove into the field and let down the binder blade. Upon making a second round he came upon its motionless form lying directly in the path of the machine. Finding that the child had been run over he carried its body into the house and summoned a physician. Death ensued in about 10 minutes from concussion of the brain, the sheaf carrier having struck him at the base of the brain.

A most shocking accident occured Monday morning last at the farm of Mr. Charles Smith, about three miles from Salisbury. Mrs. Smith had a large pot of water boiling on an open fire in the yard, when her little daughter, two and a half years old, who was playing around the yard fell into the boiling pot and was frightfully scalded. The parents summoned Dr. Dick who did all in his power to relieve the little sufferer, but the child died on Tuesday.

Farmer Caught in a Steel Trap.

Caught in a steel trap, Hiram Conoway, a farmer near Greenwood, Del., was held for a half day until rescued by his wife. Tuesday he went to a swamp part of the farm to clear off the timber there. In moving around, he was suddenly caught around the leg by jaws of steel. With a jerk he attempted to escape, but fell to the ground, breaking his right arm. He tried to pry himself loose, but with the broken arm he could do nothing, and every movement only brought him more pain. Suffering from his broken arm and the teeth of the trap, which was fastened to a tree, he yelled until he was hoarse, and half conscious he lay there until after dark, when his frightened wife finally found him and dragged him nearly a mile to the home.

SEEKING NEW HOMES.

Messrs. Allie Townsend, Royce Bartlett, Edgar Duke and Horace Powell, all with the exception of Bartlett, residents of Centreville, left town on the train over the Queen Anne's and Kent branch of the Pennsylvania Railroad last Wednesday morning, for Wilmington, Del., from which place, we are informed, they propose to work their way to Seattle, Washington, where the Alaska-Yukon Pacific Exposition will be held next year. It is said it is the desire of the young men to see more of the world.

[Since the above article was put in type two of the fortune seekers have returned home, arriving Thursday night, after having been gone just two days. One of the party who has just returned was not looked for so soon, as he is said to be a first-class pedestrian and has made a number of journeys before. It is not known just how long the rest of the party will remain away, but they are looked for on the arrival of every incoming train. There is no place like home, especially when the vituals are cooked and served like they are in and near Centreville.]—Record.

WM. D. UHLER, road engineer for Caroline county, has been appointed assistant state engineer. The appointment was made by the State Roads Commission in Baltimore on Wednesday, and the salary was fixed at $2,000 per year. Mr. Uhler is recognized as one of the State's best highway engineers.

COMMON SENSE

Leads most intelligent people to use only medicines of known composition. Therefore it is that Dr. Pierce's medicines, the makers of which print every ingredient entering into them upon the bottle wrappers and attest its correctness under oath, are daily growing in favor. The composition of Dr. Pierce's medicines is open to everybody, Dr. Pierce being desirous of having the search light of investigation turned fully upon his formulæ, being confident that the better the composition of these medicines is known the more will their great curative merits be recognized. Being wholly made of the active medicinal principles extracted from native forest roots, by exact processes original with Dr. Pierce, and without the use of a drop of alcohol, triple-refined and chemically pure glycerine being used instead in extracting and preserving the curative virtues residing in the roots employed, these medicines are entirely free from the objection of doing harm by creating an appetite for either alcoholic beverages or habit-forming drugs. Examine the formula on their bottle wrappers—the same as sworn to by Dr. Pierce, and you will find that his "Golden Medical Discovery," the great, blood-purifier, stomach tonic and bowel regulator—the medicine which, while not recommended to cure consumption in its advanced stages (no medicine will do that) yet *does cure* all those catarrhal conditions of head and throat, weak stomach, torpid liver and bronchial troubles, weak lungs and hang-on-coughs, which, if neglected or badly treated lead up to and finally terminate in consumption.

Take the "Golden Medical Discovery" *in time* and it is not likely to disappoint you if only you give it a *thorough* and *fair* trial. Don't expect miracles. It won't do supernatural things. You must exercise your patience and persevere in its use for a reasonable length of time to get its full benefits. The ingredients of which Dr. Pierce's medicines are composed have the unqualified endorsement of scores of medical leaders—better than any amount of lay, or non-professional, testimonials. They are not given away to be experimented with but are sold by all dealers in medicines at reasonable prices.
