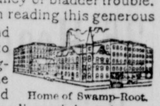
DO YOU GET UP WITH A LAME BACK?

Kidney Trouble Makes You Miserable.

Almost everybody who reads the newspapers is sure to know of the wonderful cures made by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy.

It is the great medical triumph of the nineteenth century; discovered after years of scientific research by Dr. Kilmer, the eminent kidney and bladder specialist, and is wonderfully successful in promptly curing lame back, kidney, bladder, uric acid troubles and Bright's Disease, which is the worst form of kidney trouble.

Dr. Kilmer's Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble it will be found just the remedy you need. It has been tested in so many ways, in hospital work, in private practice, among the helpless too poor to purchase relief and has proved so successful in every case that a special arrangement has been made by which all readers of this paper who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and send your address to Dr. Kilmer & Co., Binghamton, N. Y. The regular fifty cent and dollar sizes are sold by all good druggists.



Home of Swamp-Root.

Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp Root, and the address, Binghampton, N. Y., on every bottle.

PEACH ESTIMATES

Kent And Queen Anne's Fruit Going To Market—Refrigerator Cars Provided.

Within a few days the markets of the north, which up to the present time have been getting peaches from Florida and Georgia, will begin to receive shipments from the Delaware-Maryland Peninsula.

The Pennsylvania Railroad has made a survey of the situation, and estimates the Delaware season's output at 1,779,030 baskets. The peach season is at its height in Georgia. It is estimated that the total output from that State will be 1,000,000 bushels more than for 1907.

The Railroads are now seeking to secure greater distribution of the crops. Through relations largely cultivated by traffic officers of railroads, the shippers are finding it worth while to ship to interior points, such as Utica, Providence, Elmira, Albany, Williamsport, Trenton, Harrisburg, etc., instead of pouring the whole output into New York, Philadelphia or Boston, with the attendant possibility of glutting the market.

The peach crop from the Delaware Peninsula last year amounted to only 186 cars, by reason of adverse conditions. It is expected that this year it will require more than 3500 cars to handle the output. With this idea in mind, the Pennsylvania Railroad is planning to send to the Peninsula during the next six weeks a large number of refrigerator and ventilator cars. These will be stored on side tracks, and be ready for immediate use as the peaches are brought in from the orchards. Trains will then be made up as rapidly as the loaded cars accumulate, and the cars will be rushed to market on passenger train schedules. Thus, peaches picked today in Maryland will be ready for consumption in New York tomorrow.

The grand total aggregates 1,779,030 baskets of peaches and 202,471 baskets of pears. The estimate for the territory covered by the Kent and Queen Anne's railroads is as follows: Queen Anne's and Kent—Golts—peaches, 2,700; pears, 100. Massey—peaches, 50; pears, 500. Millington—peaches, 32,000; pears, 1,900. Sudlersville—peaches, 63,400; pears, 3-,000. Barclay—peaches, 47,300; pears, 2,800. Price—peaches, 40,800; no pears. Ashland—peaches, 5,350; no pears. Centreville—peaches, 500; pears, 2,525.

Baltimore and Delaware Bay—Blacks—peaches, 500; pears, 500. Kennedyville—no peaches; pears, 500. Still Pond—peaches, 4,500; no pears. Worton—peaches, 26,200; pears, 2,750. Chestertown—peaches, 18,000; pears, 13,500.

REMEDY FOR MELON BUGS

A Virginia reader asks Farm and Fireside for a remedy for "citron and melon bugs" which will not injure the vines. Probably our friend grows watermelons, the citron also being a variety or species of watermelon much used for sweet preserves. The "bug" undoubtedly is the yellow-striped cucumber or squash beetle. This does attack watermelons, but seems to prefer squash, muskmelon and cucumber vines in the order as given. Watermelons planted among any of the other vines here mentioned usually escape serious injury caused by these beetles.

I always spray my vines with Bordeaux mixture and arsenite of lime, but at times I have noticed watermelon vines having been killed or much hurt by the application of Bordeaux mixture. Possibly we must make this mixture quite weak in order to be safe for that crop. When we use three pounds of copper sulphite, four pounds of lime and forty or fifty gallons of water (or a smaller amount proportionate rate) we can go ahead without much fear and trembling Then if you use about three pounds arsenite of lime with the fifty gallons of the mixture you will have the remedy you can rely on; or use arsenate of lead alone, dissolving one pound of it in about fifteen gallons of water.

TELEGRAPH CHARGES INCREASED.

Among the ill advised and poorly drawn laws passed by the last legislature, one which went into effect this week at the Chestertown office will be remembered by the public, who always pay the freight. The act referred to is that compelling telegraph companies to incorporate in every message sent to any part of the state the filing time.

Every message containing more than the 10 words for which the company charges 25 cents costs the sender not less than eight cents additional for the filing time. This is at the rate of two cents per word. The words "Time filed 6 a. m.," are charged for and cost eight cents, the letters "a. m." or "p. m." being considered one word. If the fraction of an hour is added say 6.25, then four cents additional, or 12 cents, is charged, 20 and 5 being regarded as two words. This law applies only to messages in the state and not to those sent to and received from other states; hence, a telegram to New York or Washington from Chestertown is less expensive than one sent from Still Pond or Millington.

It is given out that the State Bar Association at its meeting held at the Blue Mountain House recommended the abolishing of the Orphan's Court of the cities and counties. The plan is to put the work now done by the Orphan's Court in the hands of the Circuit Court Judges in the counties. If such a law is made it will perhaps be necessary to create another Judgeship for the First Circuit, so that each county will have a Circuit Judge.

Mr. W. B. Wainwright, formerly District Manager of the Diamond State Telephone Company, with an office in Salisbury, has been appointed Supervisor of the entire Diamond State territory, which is now under the management of the Bell Telephone Company. Mr. Wainwright's office will be at Dover.

SOLILOQUY ON IMMORTALITY.

By Rev. H. K. Miller.

Forty years and can it be
Since last I stood beneath this tree,
Time has flown so rapidly
It scarcely seems that this is me.

I see no change that time has made
Save yearly change of leaves that fade,
Since 'neath the limbs of this old tree
I once did play in childish glee.

Birds of kind if not the same
For other boys are still the game.
Flitting yet in boughs above,
Game and sport that a'l boys love.

Since in childhood's happy days
Romping here in childish plays,
I've grown old in worldly ways
World presents a different phase.

Time to me has swiftly flown.
Changing much, that then was known.
Leaving world to me alone
Effacing most of childhood's home.

Am I the child to man now grown
Reaping now what then was sown,
The muscles same, and the bone
That formed the child in this old home?

Is this the ego—the I of then
A child somewhere in years of ten.
Thinking now of what has been
Growing old like other men?

I am not the same: I cannot be
Then as a child beneath this tree.
Many times a change in me
By atoms placed by one's set free.

Atoms went and Atoms came
Until today I am not the same.
Nature played in me this game
Tho I bear the self same name.

Nature's work did so arrange
In a way that seems strange
Conscious not was I of change
Save in physics and mental range.

Perceived I not that I was moving
Ran I so smooth in nature's grooving.
When to the fact I first awoke
That growing old was no joke!

No nymph need now to me reveral
To make it now to me more real,
That yonder dell and wood and field
Is same I roamed in childish weal.

This spot to me has grown most dear
Because of memories lingering here.
Things to me that seem so queer
From memories scroll I cannot bear.

Heaven and earth shall pass away,
Thus said my Master in His day,
But His word He said would stay
Not even end on judgment day.

His word is spirit thus He said
And by His spirit will raise the dead,
When all things earthly shall have fled
We are spirit still the body dead.

This I think is reason why,
Always conscious are we of I.
Tho the body it may die
Conscious still we are of I.

'Tis the Spirit Jesus gave,
Goes from cradle to the grave,
Then from body it is set free
In Heaven with Him it still may be.

If spirit and flesh here rebel
'Tis sure to make within a hell,
And if of this we don't repent
Nowhere but hell can we be sent.

On God's mercies some presume
That one so good would not thus doom,
Without repentance. He said our lot
To place we go where it is hot.

"A thousand years is a day"
For with the Lord this is the way,
Thus young the spirit will always stay
Nor fade like temples made of clay.

All things here must soon decay
But spirit still somewhere will stay.
Just as young as on the day
In our homes we want to play.

Thus when we the care have run
Ending where we first begun,
When the thread of life is spun
And work on earth shall then be done.

When the magic ring we make
Girdling life with its mistake,
Prove true the adage that is styled
Once a man and twice a child.

When yon sun grows dim with age
And earth's last actor leaves the stage,
To hear the depart, or the well done
By judge of earth in the eon.

WILLIAM J. BRYAN; AGAIN A CANDIDATE.

Born in Salem, Ill, in 1860.

Graduated at Illinois College, Jacksonville, when 21 years old. Graduated in law two years later at Union College, Chicago.

Married Mary Elizabeth Baird in 1884.

Practised law in Jacksonville from 1883 to 1887; then removed to Lincoln, Neb.

Elected to Congress from the First Nebraska district in 1891 over free-silver Republican.

Re-elected at expiration of term.

Delegate to Democratic Convention at Chicago in 1896, and made famous "crown of thorns speech," which won him nomination for Presidency on a free-silver platform. Defeated by McKinley, 271 votes to 176.

Renominated in 1900, again on free-silver platform, and again defeated by McKinley, this time 292 votes to 155.

Made tour of the world in 1906, and received much attention abroad. Was given big reception in New York, and set country by the ears by advocating Government ownership of railroads.

Is author of several books on political subjects, editor of the Commoner, and undoubtedly the most popular lecturer in the country. From these sources he is said to have made a great deal of money.

Lives on his farm at Fairview, near Lincoln, Neb.

VICTIM OF "FLIMFLAM"

Daniel Lawerence, was commited Friday in Baltimore for court on the charge of "flim-flamming" Mrs. Effie McIlhenny, who conducts a jewelery store at 541 North Fremont avenue and a niece of Mr. James W. Lambert, of Chestertown Mrs. McIlhenny declares that Lawerence fleeced her out of $5.

Lawerence, Mrs. McIlhenny testified, purchased a pair of smoked glasses, for which he gave her a $10 bill. A moment later, after he had received the change, he offered coin for the payment of the glasses, declaring that he had overlooked some money in one of his pockets. Miss McIlhenny returned the bill, receiving in exchange, as she thought, the cash she had given him, together with the price of the glasses. After her visitor had gone, Miss McIlhenny said, she had found a shortage of $5.

Lawerence denied that he was the man, claiming it was a case of mistaken identify.

Potash

Makes Two Bundles of Wheat Grow Where but One Bundle Grew Before

Getting a full crop from a fertilizer with too little Potash, is like getting well by the doctor's prescription with its most important drug left out.

Most commercial fertilizers need *more* Potash to get all the crop profit you are entitled to.

Use a brand with at least 6 per cent. of Potash, but if your dealer does not keep it, then mix 15 pounds of Muriate of Potash with each 100 pounds of your fertilizer. That will *raise wheat!* Set clover, too!

The proof will come *next* year in bigger crop, more profit. *Potash is profit.* Buy the Potash first.

Send for pamphlets containing *facts* about soil, crops, manures and fertilizers. Mailed *free.*

Isn't It Awful?

You surely know by this time that a cream separator may even double your dairy profits, and make the work easier, too, Then why not have one?

Just take one good look at these pictures—and then a good look at your wife. The upper picture shows the simple bowl of the Dairy Tubular Separator—washed clean in one to three minutes. The other picture shows the actual insides of one of the many styles of complicated bowls used in all other separators. Which are you going to ask your wife to wash? We'll be pleased to take a Tubular apart for you. Bring your wife to see it.
