Why Women Are Not RICH.

Man is a millionaire many times over in the possession of blood cells. Woman is not quite so rich, for scientists have proven that the normal man has five million—the woman only four and a half million to a cubic millimetre of blood.

A decrease in number of red blood corpuscles and a person "looks pale"—in fact, is anaemic, the blood does not get the right food and probably the stomach is disordered.

Dr. R. V. Pierce found years ago that a glyceric extract of golden seal and Oregon grape roots, queen's root and bloodroot with black cherrybark, would help the assimilation of the food in the stomach, correct liver ills and in Nature's own way increase the red blood corpuscles. This medicine he called Dr. Pierce's Golden Medical Discovery. By assimilating the food eaten the system is nourished and the blood takes on a rich red color. Nervousness is only "the cry of the starved nerves for food," and when the nerves are fed on rich red blood the person looses those irritable feelings, sleeps well at night and is refreshed in the morning.

J. D. LIVELY, ESQ.

"I was attacked with a severe nervous disease, which was caused by a disordered stomach and liver," writes MR. JAS. D. LIVELY, of Washburn, Tenn., Route 2, Box 33. "All my friends thought I would die and the best physicians gave me up. I was advised to try Dr. Pierce's Golden Medical Discovery, and derived much benefit from same. My case had run so long, it had become so chronic that nothing would effect a permanent cure, but Dr. Pierce's medicine has done much for me and I highly recommend it. I heartily advise its use as a spring tonic, and further advise ailing people to take Dr. Pierce's medicines before their diseases have run so long that there is no chance to be cured.

In these days of high cost of living, a medicine that gets a man up out of bed and able to work in a few days is a valuable and welcome remedy. John Heath, Michigan Bar, Cal., had kidney and bladder trouble, was confined to his bed, unable to turn without help. "I commenced using Foley Kidney Pills and can truly say I was relieved at once." His example is worth following. Sold by M. A. Toulson.

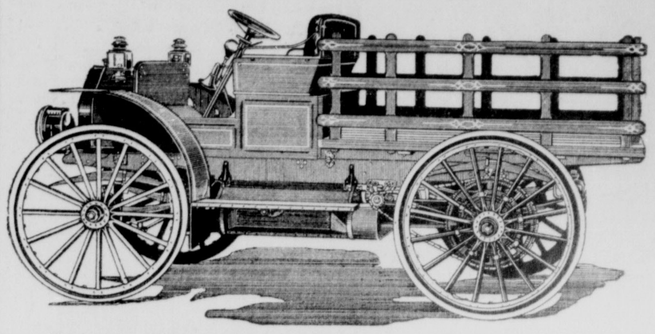
The International Auto Wagon

Or Commercial Car



In use throughout the United States by Farmers, Merchants, Millers, Contractors, Manufacturers, Liverymen and others.

A feature of the International Commercial Car that will appeal to a great many people is the fact that this car can be converted into a vehicle for carrying people. A rear seat and a double top can be added, making a very comfortable vehicle. The space behind the back of the front seat is sufficient so that two seats can be added, making a three-seated rig for liverymen who have traffic of this kind.

The International in the strictest sense of the word is a commercial car—one that can be used every day of the year, through snow and mud, cold weather and hot. The great success this car has attained in the past and the present is the greatest commendation of its usefulness.

The snow storm which tied up traffic in Chicago in February, 1911, did not interfere with the International Commercial Car service. This car was one of the few commercial cars in service in Chicago that was not delayed by the snow. The drivers were not afraid to turn out of street car tracks and into the side streets and places where the snow was deep, for fear they would stall. The car is as efficient in negotiating mud as it is in plowing through snow.

Capacity 1500 to 2000 pounds depending upon conditions of the haul. Speed 15 miles per hour. 20 H. P. Two-Cylinder Engine. Factory output 20 cars per day, which does not meet the present demand. Easily operated and as nearly fool-proof as possible. Solid tires—eliminating tire trouble.

This car will be driven throughout every part of Kent county and will stop at Still Pond, Kennedyville, Locust Grove, Galena, Georgetown, Massey, Millington, Crumpton, Chesterville, Chestertown, Rock Hall, Fairlee, Melitota, Worton, Lynch and Betterton, affording everybody an opportunity to see the car in operation.
