HOW TO PRESERVE YOUTH AND BEAUTY.

One great secret of youth and beauty for the young woman or the mother is the proper understanding of her womanly system and well-being. Every woman, young or old, should *know herself* and her physical make up. A good way to arrive at this knowledge is to get a good doctor book, such for instance, as "The People's Common Sense Medical Adviser," by R. V. Pierce, M. D., which can readily be procured by sending thirty-one cents for cloth-bound copy, addressing Dr. Pierce, at Buffalo, N. Y.

The womanly system is a delicate machine which can only be compared to the intricate mechanism of a beautiful watch which will keep in good running order only with good care and the proper oiling at the right time, so that the delicate mechanism may not be *worn out*. Very many times young women get old or *run down* before their time through ignorance and the improper handling of this human mechanism. Mental depression, a confused head, backache, headache, or hot flashes and many symptoms of derangement of the womanly system can be avoided by a proper understanding of what to do, in those trying times that come to all women.

MRS. WILLIAMS.

MRS. G. H. WILLIAMS, of Lynnhaven, Va., wrote: "It is six years since my health gave way. I had female trouble and all the doctors (I employed three) said I would die. I was not able to do my work, had to hire someone all the time. Finally, I read in the papers about Dr. Pierce's Favorite Prescription, and decided to try it. I had not taken but one bottle until I found it had done me good. I took, in all, five bottles of 'Favorite Prescription' and two of 'Golden Medical Discovery,' and now I am able to do all my housework, and have gained fourteen pounds. I advise all women who suffer from female trouble to try your 'Favorite Prescription.' It's the only medicine on earth."

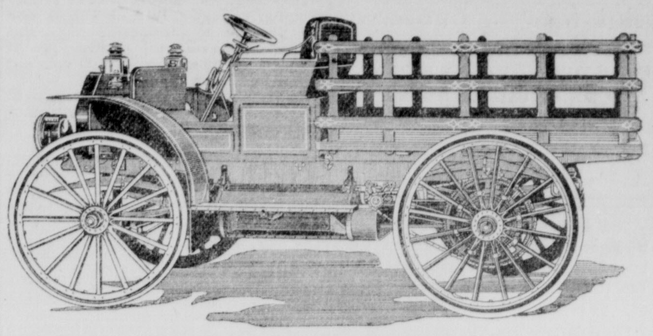
The International Auto Wagon

Or Commercial Car



In use throughout the United States by Farmers, Merchants, Millers, Contractors, Manufacturers, Liverymen and others.

A feature of the International Commercial Car that will appeal to a great many people is the fact that this car can be converted into a vehicle for carrying people. A rear seat and a double top can be added, making a very comfortable vehicle. The space behind the back of the front seat is sufficient so that two seats can be added, making a three-seated rig for liverymen who have traffic of this kind.

The International in the strictest sense of the word is a commercial car—one that can be used every day of the year, through snow and mud, cold weather and hot. The great success this car has attained in the past and the present is the greatest commendation of its usefulness.

The snow storm which tied up traffic in Chicago in February, 1911, did not interfere with the International Commercial Car service. This car was one of the few commercial cars in service in Chicago that was not delayed by the snow. The drivers were not afraid to turn out of street car tracks and into the side streets and places where the snow was deep, for fear they would stall. The car is as efficient in negotiating mud as it is in plowing through snow.

Capacity 1500 to 2000 pounds depending upon conditions of the haul. Speed 15 miles per hour. 20 H. P. Two-Cylinder Engine. Factory output 20 cars per day, which does not meet the present demand. Easily operated and as nearly fool-proof as possible. Solid tires—eliminating tire trouble.

This car will be driven throughout every part of Kent county and will stop at Still Pond, Kennedyville, Locust Grove, Galena, Georgetown, Massey, Millington, Crumpton, Chesterville, Chestertown, Rock Hall, Fairlee, Melitota, Worton, Lynch and Betterton, affording everybody an opportunity to see the car in operation.
