A Good Home Ages Gracefully

build the kind of house to which passing years add only mellowness and home-like charm this is a worthy aim for homebuilders. Let your home not be a passing fad of this year or next, but a house your children, and their children, too, can look upon as all a home should be.

To live up to this ideal, your house must be a good one-not necessarily expencive, but soundly built, and in good taste in exterior development and interior finish.

This is the kind of houses we offer you in the Curtis

plan service. More than two hundred house plans, c' three to eight rooms, in various architectural types, are here for your consideration. All can be built of stock materials, including stock sizes and designs of Curtis doors, windows, stairs, trim and permanent furniture. Our Curtis Catalog pictures these woodwork items just as they will look in your home.

We can obtain for you without charge a portfolio of "Better Built Homes" homes that will grow old gracefully. Call or write for
