Health Talk by Dr. Dill, the Chiropractor.

All Bible readers know that they are "fearfully and wonderfully made."

A marvelous doctor from Australia tells us that the bodily machine in which we live is even more marvelous than we know.

This Australian doctor referred to by prominent doctors in this country as "the greatest anatomist and physiologist," shows how diseases can be cured by careful manipulation of verves far remote from the seat of the disease.

Surgery has also found out that by injecting a local anasethetic at the SPINAL root of the nerve that reaches the stomach, all suffering can be eliminated in stomach operations.

Many new things are being learned, all of which will benefit mankind, and the science of Chiropractic stands in the forelight in investigating all new discoveries for the benefit of public health.

Get the Grinding Habit

F a food expert came along and out-Ined a plan to you whereby you could save from 12 to 26 per cent of the food you and your family have been in the habit of eating - if he outlined such a plan which would not necessitate any sacrifice on your part, you'd follow it, wouldn't you?

While we won't attempt to tell you how you and your family can live more cheaply, we will, however, undertake to outline a very simple plan whereby you can save from 12 to 26 per cent of the feed ordinarily eaten by your live stock, involving

no sacrifice to the stock. It is just this - Grind your Feed! Ground feed is readily digested so that the full food value is utilized and converted into beef, butter, horse power or pork. The saving over feeding whole feed, as already indicated, amounts to from 12 to 26 per cent, which represents the proportion of whole feed that passes through the intestinal tract undigested - wasted.

Get the Grinding Habit - and do your grinding with an International Feed Grinder. Made in three different types - grain and shelled corn grinder, corn-on-the-cob grinder, and corn-in-the-husk grinder. We sell them. You know where we are located.
