GIRL SUFFERED TERRIBLY

At Regular Intervals—Says Lydia E. Pinkham's Vegetable Compound completely cured her.

Adrian, Texas.—"I take pleasure in adding my testimonial to the great list and hope that it will be of interest to suffering women. For four years I suffered untold agonies at regular intervals. Such pains and cramps, severe chills and sickness at stomach, then finally hemorrhages until I would be nearly blind. I had five doctors and none of them could do more than relieve me for a time.

"I saw your advertisement in a paper and decided to try Lydia E. Pinkham's Vegetable Compound. I took seven boxes of it and used two bottles of the Sanative Wash, and I am completely cured of my trouble. When I began taking the Compound I only weighed ninety-six pounds and now I weigh one hundred and twenty-six pounds. If anyone wishes to address me in person I will cheerfully answer all letters, as I cannot speak too highly of the Pinkham remedies."—Miss JESSIE MARSH, Adrian, Texas.

Hundreds of such letters expressing gratitude for the good Lydia E. Pinkham's Vegetable Compound has accomplished are constantly being received, proving the reliability of this grand old remedy.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

POULTRY NOTES.

Written for the KENT NEWS by a Kent County Poultryman.

THE ANCONA

The absolute of the Ancona is not known. Many claim that it was imported into England from Italy as early as 1840. Other authorities class the Ancona as a Spanish breed and claim it is a cross of white-faced Black Spanish upon stock of like form. It is more than probable that both are to an extent correct. The Ancona is the same shape and has the general characteristics as the Leghorn, but is a larger bird. As it was developed in England, it seems pretty certain that like the Minorcas and Blue Andalusians or a sub-variety of a cross of this fowl upon English stock of like form, and they should really be classed with the English breeds.

If all that their admirers said of them were true, they would be the most popular fowl in America, but it is very doubtful if they will ever be bred to a much larger extent than at the present time.

Anconas stand the cold weather well like the Leghorn are non-setters good layers, they lay a white egg of uniform size and color. They are thrifty and energetic and great foragers. The chicks are spry from the very first and mature early, often starting to lay in four and a half months.
