Hicks' Forecasts for December.

Reactionary storms will be central on the 2d, 3d and 4th, with the disturbances probably extending over the 6th, the date on which the Moon passes over the celestial equator at its apogee. Squalls of winter rain will be natural on and near the 6th, followed by rising barometer, westerly gales and cold, clearing weather.

A regular storm period extends from the 7th to the 13th, being at its center on the 9th. Let it be remembered that this period is at the annual time of magnetic and electric excess, growing out of the inclination of the Earth's magnetic pole to the Sun's electrical equator. Auroral perturbations, earth currents of natural electricity, through the Earth and along all conducting substances, often interfering with telegraphic operations, reach a maximum activity from about the 5th to the 15th of December. Such disturbances will pass a crisis this month from the 10th to the 15th, notably on the 11th, 12th, 13th and 14th. A marked earthquake period is also central on the 13th, involving the 10th to the 16th. About the 9th, the barometer will show approaching storm conditions in the west, and these conditions will increase as they move eastward, breaking into active storms of wind, rain and snow on the 10th, 11th, 12th and 13th. Prolonged boreal storms with high and perilous gales will be encountered on the Atlantic ocean and coasts, throughout this part of the month.

A reactionary storm period falls centrally on the 15th and 16th, and the general disturbances of the preceding period will, in all probability, continue over into this period.

A regular storm period covers the 18th to the 24th, being central on the 20th. This period is at the central crisis of the winter solstice period. It is also at the centre of the Mercury eqinoctial period. On and next to the 20th, 21st and 22 nd, a very low barometeric area will develop storms of possibly rain and thunder will pass eastwardly over the country.

A reactionary storm period will bring renewed storm conditions on the 26th, 27th and 28th. The new moon on the 27th will excite higher temperature and tendency to low barometer, especially in the southern sections. Storms of rain, snow and boreal winds will pass in regular order over the country, all followed by change to much colder from the northwest.

Susie Brightly—"Anty Drudge, I'm going to tell you a secret, but you mustn't tell mama. Tomorrow's her birthday, and George and I saved our pennies and bought her a box of Fels-Naptha Soap. She'll be awfully pleased with it, because it saves her so much work."

Anty Drudge—"You are a dear, thoughtful little girl, and I know your mother is going to like yours and George's present better than anything else you could have given her."

It's well to be prepared for all kinds of work, and lots of it, these days. If you have Fels-Naptha Soap on hand, you won't have to bother to think whether you are ready to go ahead and wash, scrub or houseclean.

Fels-Naptha does the hard part of your work for you and saves time and strength. It dissolves grease, takes out stains of all kinds—even stubborn blood stains. It works best in cool or lukewarm water.

Full directions are on the Red and Green Wrapper. Better buy Fels-Naptha by the carton or box.
