P. O. S. of A. Going to Rehoboth.—By advertisement elsewhere in this issue of The NEWS will be found an announcement to the effect that Washington Camp, P. O. S. of A., of Church Hill, will run an excursion to Rehoboth Beach on July 21. These excursions have grown in popularity every year and this one promises to be more enjoyable than all former ones. If you are looking for a jolly crowd of folks go on the excursion, we are sure it will prove a most enjoyable occasion.

Horses Killed on Railroad.—Last Friday evening as W. G. Collinson was returning home from Milford, Del., with a two-horse wagon loaded with phosphate and was crossing the M. D. & V. railroad at what is known as Cullentown cut, about a mile north of Milford, the front wheel dropped and let the wagon down on the railroad track. The Rehoboth express was coming, and seeing that he could not get his wagon from the track, Mr. Collinson tried to flag the train, but it was too near and the grade too stiff. The locomotive ran into the team, killing both horses, and mangling one so badly that it took half an hour to get the fragments out of the machinery. The loss to the owner of the team amounted to about $600.

TYPHOID WARNING.

In the monthly bulletins sent to the health officers by the Maryland State Board of Health they are reminded that typhoid fever may now be expected to begin its summer rise. "The bulk of summer typhoid fever," it is stated, "is still due in Maryland in the majority of instances to polluted water." Prompt action on the part of the health officer will prevent a large amount of unnecessary sickness and death.

The investigation of all public water supplies and as many private supplies as possible during the early summer months is recommended. The investigation of water supplies includes, first, the analysis of samples of drinking water; second, careful investigation of the water system, and especially sanitary surveys of the watersheds or catchment basins.

It is recommended that samples from public water supplies classed as "good" should be taken at least twice a year irrespective of season, while water supplies classed as "bad" or "suspected" should be subjected to analysis monthly or at more frequent intervals.

The Board of County Commissioners met as a Board of Health Tuesday and appointed Dr. Frank B. Hines acting health officer in the absence of Dr. Simpers. The Chestertown Water Company reported that they had the water here analyzed every year and that another analysis was being made.

A complaint was received from a Chestertown family that a neighbor had a nuisance outside his very door and steps were taken to remove same.

WILL TEST HOG SERUM

Live-Stock Board to Investigate Immunizing Process.

The Live Stock Sanitary Board proposes to test the serum recommended by the national government which is said to immunize hogs against the cholera and which, if as effective as is claimed, will save the farmers of Maryland millions of dollars.

The serum is produced by the United States Department of Agriculture and has been tried by its officers with splendid results in other portions of the country. This has led Dr. Mackie, the state veterinarian, to believe that it might prove successful in Maryland, and he has arranged to begin the inoculation on a farm in Prince George county, this state, at once.

It was said by the officials of the board that there was but little more hog cholera in the state this year than usual; but the hot season always brings its loss to the farmers from this dread disease. Thousands of hogs die annually from cholera, and should the new serum prove valuable the saving for Maryland hog-raisers will mean much to their prosperity.
