The Kent News.

SATURDAY - - - - JULY 5, 1873.

THE Harrisburg *Patriot*, an old and excellent Democratic journal, says of the political situation of the country:

"It is clear that if the Republican party is to be speedily overthrown, if the rings which now control political affairs at Washington are soon to be broken up, the Democratic party must not only preserve its organization, but must declare its principles without equivocation, and with such distinctness that the people cannot misunderstand them, but comprehend them without effort. Self-government for the people of the States, opposition to every form of monopoly, and the overthrow of the corrupt rings which have made the Government of our country a by-word and a reproach among the nations of the earth, will make a platform broad enough to afford standing room for all who are willing to enlist under the banner of reform. Republicans who sincerely desire a change in the administration of the Government will not halt to inquire whether this platform is labeled 'Democratic' or 'Liberal,' or whether it has any name at all. They will imitate the noble example of the Old Line Whigs of 1854, and go where principle leads, well aware that should they find themselves in the Democratic camp, they have been lately in company much less reputable.

THE murder of Samuel J. Jones, on Long Island, is both mysterious and horrible beyond the usual horror of such crimes. Mr. Jones was wealthy, lived alone in a small-storied house, and was a man of culture and ability. He bore a high reputation as a scholar, understanding as he did five languages, and he was often sought for advice in critical cases by those of his neighbors with whom he was familiar. His integrity and morality were generally believed by the Oyster Bay folks to have been unswerving and steadfast. The good repute his memory bears just now at every hand renders it certain that whatever else might have been the motive that actuated his murderers, revenge or hatred had no place in it.—The murder was, apparently, deliberately planned. There were, it is supposed, two parties to it. One lured him away from his house by setting his hedge on fire. The other proceeded to ransack the dwelling. Mr. Jones returning more quickly than they anticipated, they murdered him, as they suppose, and threw his body down the well. They then went back to their work of ransacking, and, having got what they could, were leaving the house, when they heard him trying to lift himself out by means of a bucket rope. When they heard the poor man, they searched about for blocks and stones that a man could hardly lift, and flung them down upon his head and face until they killed him. The murderers have not yet been discovered.

RIGHT OF WOMEN TO VOTE.—Susan B. Anthony has been convicted in the United States Court at Canandaigua, N.Y., under the Act of Congress of 1870, for having voted illegally for Representatives in Congress in November last. The act makes it an offence to vote illegally, and it was charged that the defendant thus voted, she being a woman, and therefore having no right to vote.

The fourteenth amendment to the constitution provides that "no State shall make or enforce any law which shall abridge the privilege or immunities of citizens of the United States."

Miss Anthony being a citizen under that clause, claimed that the State of New York had no right to restrict the elective franchise to male citizens, and that the statue was therefore in conflict with the 14th amendment of the constitution and therefore void.

This view of law was not sustained by the court, who directed the jury to return a verdict of guilty, which was accordingly done. Sentence has been pronounced on the defendant imposing a find of $100, but the Judge took care to say there was no order to detain the convict until the fine is paid.

The case is a test one to obtain a decision of the court upon the right of women to vote, and will probably be carried to the Supreme Court.

CHICAGO AS A GRAIN PORT.—The grain sales of Chicago amount to about $100,000,000 yearly. The money transactions of the Chicago Board of Trade, it is said, are larger than those of any other institution in the United States, with only one exception, and that is the New York clearing house. This will give an idea of the vastness of the grain trade. During the first ten years of the city's settlement the shipments were as follows: 1838, 78 bushels; 1839, 3,678 bushels; 1840, 10,000 bushels; 1841, 40,000 bushels; 1842, 586,907 bushels; 1843, 688,967 bushels; 1844 923,497 bushels; 1845, 1,025,620 bushels; 1846, 1,599,819 bushels; 1847, 2,243,021 bushels. The entire elevator capacity of the city now amounts to 13,000,000 bushels. The handling of grain calls for the strictest business regulations, which have been established by legislation, the carrying out of the laws being intrusted to a board of warehouse and railroad commissioners, and a corps of grain inspectors.

BIRTH AND BAPTISM OF WASHINGTON. A Westmoreland correspondent of the Richmond Whig corrects some erroneous statements that have been recently made in regard to General Washington and other distinguished men who were born in that famous old East Virginia county.—He says that the baptism of Washington and its circumstances do not rest for verification upon the uncertain foundation of tradition. It stands upon record, and upon that best kind of evidence admitted in courts of law—the family Bible. The writer says he had before him an authentic copy of an entry of the birth of Washington in the Bible of his mother, in the following words: "George Washington, son to Augustine and Mary his wife, was born ye 11th day of February, 1732, about 10 in the morning, and was baptized the 3d of April following, Mr. Beverly Whiting and Captain Christopher Brooks, godfathers, and Mrs Mildred Gregory, godmother.

DAMAGES FOR MURDER ON A STREET RAILWAY.—Mrs. Avery D. Putnam, the widow of the victim of the car-hook murderer in New York, has recovered in the Superior Court of that city $5,000 against the Seventh Avenue Railroad Company, for negligence of the car driver and conductor for not putting Foster off the car when requested by Mr. Putnam, which has appealed to the General Term, in which court on Saturday the judgment was affirmed.

THE Lynchburg *Republican* say:—"The present Adminsitration, from its very inception to the present time, has been so marked and characterized by atrocious corruption and dishonesty that even well authenticated reports of the grossest frauds, robberies and embezzlements are received by the people with scarce a word or look of surprise or condemnation."

THE MAMMOTH CAVE.

The Maryland Editorial Excursion during their recent trip visited the celebrated Mammoth Cave of Kentucky, and the following description of it by W. W. Busteed, Esq., of the Centreville *Observer*, will no doubt prove interesting to our readers:

"The day is exceedingly hot, but as we approach the mouth of the cave a gush of cold air dissipates the heat, and we find ourselves soon in an atmosphere which stands at 50 degrees Farenheit both winter and summer. The cave is certainly a great wonder, and to be understood must be visited. It has much the appearance of a great rocky railroad tunnel rudely put together. At times we are in great tunnels over 60 feet high and as many in width, then again passing through narrow passages so contracted that we can scarcely get through at all. Now we pass a small house (and there are several of them here, erected for invalids who used to come here for health, but who invariably died) and now we enter the star chamber. This is magnificent. At the top of the archway the ceiling seems to be made of black rock, with innumerable holes in it, which with the light thrown upon it by our lamps gives a perfect resemblance of a star-light night. Our guide takes our lamps from us at this point, leaving us in darkness so dense that it might have been cut with a sharp knife. He passes away into a cavern around the "star chamber," and as he does so gives us an excellent representation of a cloud passing over the starry firmament over head. The scene is grand beyond description, though not yet completed.—In a moment more our guide appears at the other end of the cavern, and as he approaches the mouth of it gives us a grand panorama of moonlight. The whole thing is superb. We pass on to the dome. This is an immense hollow column of rock, and is looked into only through a small aperture. We visited the river, the bottomless pit, the giant's coffin, and a hundred other places which we have not room to tell about. The cave has over ninety miles of walks in it, and as we were there but two hours, it may be understood that we did not travel much over 85 of them. The cave is perfectly, dry (except at one point near the river,) and persons pass in and out without injury to themselves or their clothing. We were told that an average of about 70,000 persons visit the cave annually. A railroad is now being surveyed from the Junction to the cave, which should have been built years ago."

Mr. Busteed concludes the account of his trip as follows:

"On Wednesday our party left Chicago for home, passing thro' the great States of Illinois, Indiana, Ohio and Pensylvania. The corn and wheat on the whole route was indifferent, and nowhere on the whole trip did we find crops which compare with our own. The best corn we found was in Kentucky and Southern Indiana, and the best wheat in the Shenandoah Valley, Virginia. The country people in the West look poor, live in small houses on small tracts of land, and do their own work. In numerous cases women were seen in the fields and gardens at work. We should not advise our friends to go West to engage in agriculture. The cities and towns, on the other hand, have a lively and progressive appearance, and the wealth of the West seems to concentrate in them."

THE STEAMER TIGRESS.—A representative of the New York Tribune, in conversation with Secretary Robeson of the navy and others on board the Tigress, in which the expedition in search of the Polaris will sail, gathered the following particulars:

The Tigress will be put in dry dock immediately, and so excellent is her condition at present that her equipment will not occupy more than seven days. She has been purchased by the government for $60,000, and her former owners, English merchants, will repurchase her for $40,000 if she returns uninjured from the Polar seas. At 60,000 she is said to be marvelously cheap, as she is probably the very best steamer built for the purpose for which she will be required.—She is only eighteen months old. During this season she was employed in seal hunting in the Polar region, and is admirably adapted to a voyage among the icebergs. It was while thus employed that her officers discovered the unfortunate Polaris crew on the ice floe, rescued the sufferers, and brought them to St. Johns. The Tigress was built and her engines inserted in Quebec. She is 165 feet in lenght, 18 feet breadth of beam, 16 feet depth of hole, draws 13 feet of water, and has a capasity of 463 tons. She is fitted with a compound engine with high pressure 28-inches and low pressure 44-inch cylinders. She has two horizontal tubular boilers, burns about seven tons of coal per day, and her average speed is about seven knots an hour. She is fitted with spare propellers and spare rudder in case of damage by the ice. Her propeller is made to be easily hoisted, and is now with its hoisting apparatus, in good condition. The Tigress is sheathed with iron forward, and is probably as stronge a vessel as ever came into this port. She ordinarilly carries 75 tons of coal in her bunkers, and will carry two hundred tons when she sails in search of the Polaris next week.

THE FRANKING PRIVILEGE.—The Brooklyn (N. Y.) Eagle refers to an intimation in a Washington dispatch to the Baltimore Sun that members of Congress who are reluctant to be divorced from their old deadhead practice, will in some form make an earnest effort to re-enact the franking privilege, and are writing to Washington that their constituents will not be satisfied without the public documents, and they (the members,) are unwilling to pay postage upon them. The Eagle says it would be interesting reading to have the names of those members of Congress who have such a constituency, and to ascertain how few, if any, of their respective constituents have made such complaints, and if these complaining constituents subscribe and pay for one respectable newspaper, or whether they know what the franking privilege is, and to what use they put public documents.

THE Women's Rights Party appear to be making considerable headway in Ohio. A constitutional convention is in session in that State, and has been devoting considerable attention to the enlargement of women's political privileges. It has adopted an amendment to the State constitution which provides that women may be eligible to all appointive offices. They may become school commissioners, superintendents, trustees and directors of charitable institutions, government clerks and fill other similar positions. The convention has also appointed a special committee to consider the question of female suffrage, and a good deal of its time has been spent in the reception of petitions from all parts of the State, asking this extension of the franchise. The indications are that an amendment granting female suffrage will be submitted to a special popular vote.

THE St. Louis *Republican* sagely remarks that "the great need of the South is the overthrow of the Radical party."

THE largest steamer in the world, with the exception of that grand failure, the Great Eastern, will be due in New York harbor in a few days. This is the steamer City of Chester, of the Cunard line.—It is said to be one of the finest specimens of naval architecture ever turned out by any shipbuilder, yet everything is in due proportion, and her bouyancy in all respects is perfect. The vessel is 450 feet long over all, 44 feet in beam, and 36 feet in depth, her tonage being 5,000; nominal horse-power 850, but capable of being worked up to 4,250. The City of Chester is most complete, and is elaborately finished internally.

THE Fredericksburg *Herald* warns Virginians of the evil effects of the new movement in Louisiana. It says: "There is no political right that the negroes of Louisiana do not now enjoy. Beauregard promises more than simply political rights. If his platform does not embrace social equality it certainly has a strong squint that way—and neither Beauregard nor any power finite can break down the ineradicable differences to fellowship which a higher and infallible power has stamped upon and which stands as a huge dividing wall between the races."

GENERAL D. H. HILL says, in the columns of the *Southern Home*: "We have opposed Grantism, not merely because of its hatred to the South, but because it has never failed to support moneyed monopolies, railroad swindles, and all combinations of capital against labor. There has not been a single fraud concocted against the interests of the laboring clases which has not found a friend in the present Administration."

THE requisitions for postal cards up to the present time amount to more than forty-three millions. The manufacturers have been unable to come near supplying this tremendous demand, and over half the orders are still unfilled. The handy little card seems to have filled a popular want, and for the present the Department cannot issue too many of them.

GENERAL WM. O. BUTLER, the Democratic candidate for Vice-President in 1848, on the ticket with General Cass, is still living. He is in his eighty-third year, but a Kentucky journal says he walks at least six miles each day.

AN effort is being made to establish a bank in Cambridge.

A valuable deposit of feldspar rock is reported to exist in Cecil county.

UP TOWN

Dry Goods Store.

THE LATEST STYLES!
THE BEST GOODS!!
And LOW PRICES!!

WM. H. ANTHONY

HAS JUST RETURNED FROM NEW YORK and having taken the Store formerly kept by Mrs. Barrett, has just opened a good assortment of

TO THE PUBLIC.

THE subscriber most respectfully informs the public that he has made arrangements with Dr. Thos. H. Whaland to carry on his

MILL

near Chestertown, for the present year.

His long experience in the business and his reputation as a Miller warrants him in the belief that he can give universal satisfaction.—As soon as practicable he intends to keep on hand a good supply of

CORN MEAL,
WHEAT FLOUR of all Grades,
HORSE FEED, &c., &c.,

which he is determined to sell at reduced prices. He only wants to make the regular toll, and will be compelled to sell for Cash only as his capital is small and he does not intend to keep books.

He will use all means to make the Mill a public convenience as well as a source of profit. A trial is all he asks.

Most respectfully,
SAMUEL A. ANTHONY.

and Zinc,
CHEMICALLY COMBINED.

Mixed Ready for Use,
CAN BE APPLIED BY ANY ONE.
One Gallon covers 20 Square Yards,
Two Coats.

SPECIMENS of different colors may be seen at the Store of Messrs. Stam & Bro.

Read the following Testimonials:

CHESTERTOWN, May 12, 1873.
Mr. C. P. Knight, Baltimore, Md.—I bought your Bradley's Patent Enamel Paint of Messrs. C. F. Stam & Bro., Chestertown, and found it to be all you recommend.
Respectfully, CHAS. G. RICAUD,
School Examiner, Kent Co., Md.

BALTIMORE, Dec. 10th, 1872.
Mr. C. P. KNIGHT—Dear Sir:—It affords me much pleasure to say to you that the Bradley's Patent Enamel Paint far exceeds my expectations in economy, beauty, and I have every reason to believe, in durability.
More than twelve months since I painted the roof of my Hotel (Mansion House) with the Bradley's Patent Enamel Paint, and I was so well pleased with it I determined to paint the outside of the Hotel, and am most happy to say it gives me perfect satisfaction. In conclusion I will say if this testimonial will be any advantage to you, you are at liberty to use it. Yours, most respectfully,
ISAAC ALBERTSON,
Mansion House Hotel, corner Fayette and St. Paul streets, Baltimore.

FROM HON. JOHN WETHERED.

Mr. C. P. Knight:—At the recommendation of a friend, I was induced to apply your patent "Bradley's" paint to my house. I have pleasure in stating that it has proved highly satisfactory, covering more surface than you promised, is more economical, carries better gloss than any other paint and is freer from disagreeable odor. Yours, respectfully,
JOHN WETHERED.

THE PLAINS, Fauquier County, Va., February 6th, 1873.
C. P. KNIGHT—Dear Sir:—The Paint came safely to hand, as ordered, two kegs, five gallons each, and three buckets, one gallon each. As practice was slack I did the job myself.—Two weeks not constant work completed the house two coats, the last coat applied thick, and it is now generally conceded that for "Enamel" like hardness and body and harmony of colors there is not a handsomer job in the place. I saved sixty-five ($65) dollars by the operation, which is an item just now with Southern people." It should be generally adopted in this State; any country lad can apply it. I have never dabbled in such stock as Testimonials, but I feel so forcibly the great adaptability of your "Enamel Paint" to the wants of our people in excellency of material, in beauty of color, and the fact of its being "Ready Mixed," that I give you free permission (if it is desirable to you,) to make what use you think proper of this letter.
Very truly, S. McGILL, M. D.

Pleasantville, Harford Co., Md.
C. P. Knight—Dear Sir:—I am happy to inform you that your Patent Enamel Paint has given entire satisfaction. I prefer it to any paint I have ever seen used, and recommend it for durability and beauty as paramount to any other. Very respectfully,
R. DICKEY, M. D.

Belair, March 3d, 1873.
Mr. C. P. Knight—Dear Sir:—I have been using, since last Spring, Bradley's Patent Enamel Paint, and am happy to say that it gives entire satisfaction wherever I have used it, and to parties to whom I have furnished it for other painters to use. Mr. John I. Street, who I furnished with the paint last Fall, says if his name is of any use you can use it with pleasure in recommending so good a paint. S. H. Montague, Painter, agrees with me as to the durability of your most excellent Paint. I hope that those who have painting to do, will look to their advantage and apply Bradley's Patent Enamel Paint, which is the most durable Paint now in use. It holds its gloss longer than any other Paint that I have ever used.
Yours truly, E. C. GARRETTSON,
Belair, Harford county, Md.

Baltimore, Sept. 30th, 1872.
C. P. KNIGHT, Esq.—Dear Sir:—I have had the Bradley's Patent Enamel Paint, which I purchased from you, used inside and outside both at my dwelling and store for two seasons. It gives me great pleasure to be able to say it comes fully up to your recommendations in facility of use, economy, durability and beauty.
Yours, truly, THOS. J. IRVING,
of T. J. Irving & Co.,
58 West Baltimore St.

Chambersburg, December 10th, 1872.
Mr. C. P. Knight—Dear Sir:
The paints we received from you have been applied to several of our own buildings, and to those of our friends, and have given satisfaction in covering qualities, in gloss and in adaptability to all kinds of surface or material, and we cheerfully recommend it, especially to that class of consumers who have to depend upon unknown parties or painters to mix and furnish materials, wherein we have found the most deception.
Yours, truly,
JACOB STOUFFER & SON.

March 22, 1873—3m.

TO FARMERS!

"EXCELSIOR."
1873 1873

Composed of 800 lbs. of No. 1 Peruvian Guano, and 1200 pounds of Soluble Phosphate of Lime, (bones dissolved in sulphuric acid,) Potash and Soda,

Forming the most concentrated, universal and durable fertilizer ever offered to the farmer—combining all the stimulating qualities of Peruvian Guano, and the ever durable fertilizing properties of Bones. Excelsior is in fine, dry powder, prepared expressly for drilling, and can be applied in any quantity, however small, per acre; and it is the opinion of many close calculating farmers, after FOURTEEN years experience in testing it side by side with other popular fertilizers, that an application of 100 pounds of Excelsior is equal to from 200 to 300 pounds of any other fertilizer or guano offered for sale, therefore is fully 100 to 200 per cent. cheaper.

☞Look out for imitations and counterfeits. The popularity of Excelsior has induced *unscrupulous* parties in this and other cities to copy our trade mark, and resort to other dishonorable means to sell their *worthless* compounds.

☞*Farmers should see that every Bag is branded as above, with ANALYSIS and OUR NAME in RED LETTERS. All others are counterfeits.*

Price $60 Per Ton.

Iron in the Blood

PERUVIAN
AN IRON TONIC
SYRUP

MAKES THE WEAK STRONG.

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and cures "a thousand ills," simply by Toning up, Invigorating and Vitalizing the System. The enriched and vitalized blood permeates every part of the body, repairing damages and waste, searching out morbid secretions, and leaving nothing for disease to feed upon.

This is the secret of the wonderful success of this remedy in curing Dyspepsia, Liver Complaint, Dropsy, Chronic Diarrhœa, Boils, Nervous Affections, Chills and Fevers, Humors, Loss of Constitutional Vigor, Diseases of the Kidneys and Bladder, Female Complaints, *and all diseases originating in a bad state of the blood, or accompanied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not followed by corresponding reaction, but are permanent, infusing strength, vigor, and new life into all parts of the system, and building up an Iron Constitution.*

Thousands have been changed by the use of this remedy, from weak, sickly, suffering creatures, to strong, healthy, and happy men and women; and invalids cannot reasonably hesitate to give it a trial.

See that each bottle has PERUVIAN SYRUP *blown in the glass.*

Pamphlets Free.

A CARD

To my Fellow-Citizens of Kent County:

I am induced by many considerations to announce myself to you as an INDEPENDENT CANDIDATE FOR THE HOUSE OF DELEGATES of Maryland. There is no reason why labor should not be represented in the State Legislature by one of her own sons and not always by a gentleman of property.—I am not ashamed to be the poor man's candidate. I am opposed to all cliques, rings and conventions, by means of which the few rule the many, taking care to provide office and emolument for themselves to the exclusion of the rank and file. I am against all party machinery and trickery, and am not a caucus candidate, but simply ask and hope for the support of all independent men.

I am your ob't servant,
ap12-6m* JAMES M. AYRES.

MANHOOD:
HOW LOST, HOW RESTORED!

JUST PUBLISHED
A NEW EDITION OF
Dr. Culverwell's Celebrated Essay

on the *radical cure* (without medicine) of Spermatorhœa, or Seminal Weakness, Involuntary Seminal Losses, Impotency, Mental and Physical Incapacity, Impediments to Marriage, etc.; also, Consumption, Epilepsy and Fits, induced by self-indulgence or sexual extravagance.

☞Price, in a sealed envelope, only 6 cts.

The celebrated author, in this admirable essay, clearly demonstrates from thirty years' successful practice, that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately and radically.

THIS LECTURE should be in the hands of every youth and every man in the land.

Sent, under seal, in a plain envelope, to any address, postpaid on receipt of six cents, or two postage stamps.

Also, Dr. Culverwell's "Marriage Guide," price 50 cents.

Ayer's
Hair Vigor,

For restoring to Gray Hair its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *It soon restores faded or gray hair to its original color, with the gloss and freshness of youth.* Thin hair is thickened, fallen hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the formation of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre, and a grateful perfume.

Prepared by Dr. J
