AGRICULTURAL.

DESTRUCTION OF WHEAT.—By a letter received by a gentleman from Col. G. M. Kinkle, of Buffalo, Iowa, dated October 23d, 1846, we learn of the appearance of a curious insect, which is doing great damage to the wheat. He says, "notwithstanding the luxurious harvest of this season, there is every appearance of a sever pestilence of a curious kind here. About the first of September there was a singular kind of insect made its appearance in most of the farms over the country; its appearance is a small black bug on the surface of the ground and on some farms the surface for some inches deep would seem to be alive with them. Some farmers, who have sandy land, say it seemed as though every grain of sand was becoming alive. In a few days after the first appearance, they climb upon the corn, wheat, or whatever green thing is in their way, and then turn into a small fly, about half the size of a house fly, and suck the substance from the stalk of the grain until it withers away.

Many crops of fine winter wheat, which came up and looked prosperous, have been entirely destroyed by them, so that the farmer has been compelled to sow it over again. The curiosity of it is, no one ever saw such a bug or fly before. It baffles the ingenuity of all to tell what it means. Notwithstanding we have a frost every night and have had some hard freezes, yet as soon as the sun is up and warms them they go to their work of destruction again.

They not only eat the young wheat above ground, but kill it at the roots. If they increase another season as they have this, they will sweep every thing before them."

Agricultural.

We have received of Major John Jones, of New Castle county, Delaware, a pamphlet containing the proceedings of the eleventh annual meeting, at Wilmington, Del., on the 16th and 17th September, 1846 of the New Castle county Agricultural Society and Mechanics Institute, from which we shall publish extracts. Major Jones is said to be one of the best farmers in Delaware and his experience is valuable to others.

We hear nothing about an Exhibition of the Kent co. Md. Agricultural Society, and only occasionally of the Society in "dining out." There is nothing so encouraging as exhibitions and addresses.

Let all the world know that Sellers' Vermifuge is the best in use! Here is the proof.

LICKING STATION, Ky. Dec 17th, 1846.

Mr. R. E. Sellers:—I have the pleasure to inform you that I have used in my practice your celebrated Vermifuge with the most happy results I have formerly used Fahnestock's but being persuaded to try yours, I have found it far superior in every respect, and can say without the fear of contradiction, that your Vermifuge possesses more virtue than any I ever used, and most cordially recommend it to the attention of the public. I will state a case where I gave one vial of your Vermifuge: My brother's child was *pining and wasting to a mere skeleton;* in 30 hours after I gave the Vermifuge, the enormous quantity of *upwards of six hundred worms* were passed. The child that was given up as lost, is now well and as hearty as any in the neighborhood
