WELL PAINTED, WELL DRESSED

There is a satisfaction about a well-painted house similiar to what one feels in wearing good clothes. It is like feeling at home in good company.

Quality does it. The best paint materials, properly applied, give the house a distinction that it lacked before. The house is well dressed.

Nor is the distinction temporary. A paint coat of

LEWIS WHITE LEAD

and pure linseed oil looks well after years of wear. The quality lasts. It serves both for looks and protection.

We carry the pure white lead guaranteed by the

DUTCH BOY PAINTER TRADE MARK

besides a full stock of oils, turpentines, varnishes, colors and brushes. Come and see us. It pays to buy the best.

BIG DROVE OF STEERS

Hon. Wm. H. Jackson, of Wicomico, received a big drove of steers Tuesday last from Chicago, which will be stall fed for market next spring. There were 375 young steers in the bunch. They were distributed on two farms, 250 of them being sent to the "Rider" farm and 125 to the "Trader" farm. At his Rock-a-walking farm Mr. Jackson has the largest and finest steer barn in this State. It was built with special care for stock feeding. Every stall has running water and the entire building has concrete floor, with plenty of light and arranged so as to facilitate work in caring for the cattle. This is the largest consignmedt of young steers ever received there for feeding purposes.

ROADS FOR CAROLINE

The Caroline County Commissioners who have been considering the construction of a part of the local section of the system of State highways, have definitely decided to do the work.

County Road Engineer Hibbard A. Paine has had several conferences with Governor Crothers and Chief Engineer Crosby, of the State Roads Commission and the county will build for the State, a macadam road from Watts creek, south of Denton to the Bureau, near Williston. The State highway work has been begun here by the building, by a Pennsylvania contractor, of a section of road extending north from Denton and under the same contract will be constructed a piece of macadam road from Denton to Watt's Creek. State engineers were here last week completing the surveys of the section to be built by the county, and there will be little delay in making the start.

The Commissioners will purchase a steam roller and the State will pay for its use as the work of the construction goes on.

Since the county roads were placed under an engineer in 1904 the county has been accumulating equipment and now owns several fine mule teams, portable stables, wagons and implements. Bills for the use of the equipment, salaries of foremen and labor and materials will be given to the State commission and paid out of the roads appropriation. There will be a timekeeper for the State and another for the county. It is believed that some saving can be effected over contract work, and the same time a capable and experienced road construction corps will be developed, the completion of the count chain of the general State road system hastened and county oads in general will be benefited.
