PUBLISHERS AND EDITORS.

SATURDAY, SEPTEMBER 10, 1910.

THE Governor is having large crowds at the Farmers' meetings. He is trying to bring the farmers in closer touch with the affairs of State and for this deserves commendation.

MAKE the assessment uniform and there will be no ground for complaint. If certain land are worth $25 per acre then other lands are worth $75! Don't put the burden on the poor man.

THE new road engineer for Kent County has but one purpose viz; to keep the roads in good condition at the least possible cost. He is the servant of the tax-payers and should have their active support and encouragement. *Dont hinder, but help.*

THE reception at the Kent County Savings Bank this week proves that the public, without prejudice appreciate a great improvement. The people looked upon the building as an ornament and a credit to the town, besides testifying to the success and safety of the institution.

CAN'T the authorities fix on a better time or place for Kent County's Institute? The weather has been hot, the room poorly ventilated and the teachers might be better prepared in a financial way to bear the expense. Prof. Melvin has done everything possible to cure these objections but the power rests with others.

FOR the first time in a number of years all catch-penny devices, the wheel of fortune and the shell game were refused permission to set up business under any pretense at the Tolchester Fair by the authorities backed by one of Kent's best officials, Andrew Medders. Not only were they refused permission, but they were not allowed to ply their trade even for an hour.

All honor to the sheriff and to the managers of the Fair and to those who have supported and aided the movement to repress these gambling devices. The question comes up, why has the thing not been done before? The answer is that it has been found hard to get someone to take the initiative who was fortified to prove that the devices were in violation of law. Our court judges gave an opinion that such schemes were in violation of law and that they were ready to punish all offenders.

THE REASSESSMENT.

A new assessment of property is always unpopular with a large number of people, for the payment of taxes, however small the amount may be is not agreeable duty, and the public generally is never able to see how any adequate returns are received for the money paid out. As a consequence the usual outcry is heard in regard to the iniquities of a work which has hardly begun. While the outcry is great, it is not so loud as usual, and is confined to comparatively few people—and generally there are people who are now and always have been classed as tax-dodgers—who pay to the State and County as little as possible—and pay that little in proportion to their means, grudgingly, and of necessity—not cheerfully, as well-disposed, public-spirited citizens should.

The increasing expenses of government, state, county and town are necessities of the advancing times. The problem of raising the money to meet these necessities, is one that is causing faithful public financial officials more trouble than anything else, and there seems to be no solution of the problem in sight, save to raise either the taxable basis or the rate of taxation. The public demand for all sorts of improvements is clamorous, quite as great as the clamor against higher taxation, and what may be the outcome, the future alone can tell.
