NOW OPEN FOR BUSINESS

Chestertown's new banking institution—**The People's Bank**—on September 1st opened its doors and respectfully and cordially solicits a share of the banking business of the community.

We have purchased this space for a year and will have something to say to the readers of this paper every week which we hope will interest them. We will not publish the same advertisement over and over, but in each issue will have a message for you that we are sure you will find not only of interest, but profitable also.

While we would be pleased to see you all and talk to you, this is, of course, impossible, but we feel that an acquaintance may be established through these advertisements that will bring many of you to the bank during the coming weeks, and if this is accomplished we shall feel that our efforts have not been in vain.

These advertisements, or more properly open letters, to our friends will treat of a wide range of subjects in which you are interested and will give us an opportunity each week to discuss with you matters of highest importance to us both. It shall be our constant study to give the people of the community the best banking facilities obtainable.

MESSRS. EDITORS OF KENT NEWS:

I would like to correct an item published in your last week's issue sent you by someone of the Double Creek Base Ball Club I suppose. Unfortunately for us they got things mixed up. They claimed our pitcher played out, when he had them at his mercy the entire game as the number of hits and strike-outs show. And instead of quiting in the eighth with one man out and a score of two to one, it was the ending of the ninth, two men out and a tie score of two to two, Fox and Edwards knocking a two bagger each to their credit. I merely give this so that credit can be given where credit is due.

Many of the farmers about here are losing their pigs by cholera. For many reasons this is a great damage. Is there not some means whereby this disease can be stamped out? From descriptions given by those who have lost hogs, in some cases at least, it is more than cholera. What part does the State take in reference to contagious diseases among stock?
