In these days when our Government is urging more intense farming and the demand for every farm product has been multiplied many times in the last two or three years it becomes necessary for farmers to utilize every improved method that means increased production with less labor and less cost.

The **FARM TRACTOR** is now as necessary as the horse. It has passed the experimental stage and is dependable. In the near future we expect to give a demonstration of the latest model 10-20 Titan Tractor which has proven to be the size best suited for regular farm purposes. We hope to be ready to give this demonstration during the Fair, but in any event due notice will be given.

Watch for announcement of place and date and don't miss seeing it.
