Where There Are Little People to Sew For

The Singer Sewing Machine means all the difference between needle-and-thread drudgery and the most fascinating employment any home-loving woman can engage in.

Between the peerless Singer and the best of the department-store machines there is no more real resemblance than between fine linen and burlap.

Moreover the

Singer Sewing Machine

agency is always as easy to get at as the Post Office.

At Singer stores you can now get Wheeler & Wilson Sewing Machines and Parts.

The Wheeler & Wilson machine, for over 50 years the standard of the rotary-shuttle movement for making the lock stitch, is now sold exclusively at Singer stores.

BY THESE SIGNS YOU MAY KNOW AND WILL FIND SINGER STORES EVERYWHERE

Why the Republican Party Should Not Control Our State Government.

First, because the members of the party do not, it is fair to presume, pay one-third of our State taxes; the Democrats paying the remaining two-thirds are necessarily more interested in the good government of the State, and are logically entitled to be its custodians.

Second, because the Republican party, apart from its negro vote, represents a small minority of our citizens.

Third, that depending upon the colored vote for their strength and even for their life, they are, by reason of such alliance, not entitled to be in charge of the historic old State of Maryland.

Fourth, much as they may demur to the statement, it is nevertheless true, that with the Republican party in power in the State, the vicious element of the negro population becomes more unmanageable, under the impression that they will have immunity from punishment for their conduct, because their own party is in power.

Against these and other reasons which might be given, why the Republican party should not have control of the affairs of our State, the only one we can imagine could be given is, that they are "out and want to get in."

William H. Stewart Formerly of Chestown, Promoted.

William H. Stewart, who until yesterday was superintendent of the Metropolitan Insurance Company in this district, has been made superintendent of agencies for the same company in the southwest territory. His headquarters will be in New York, but the states in which he will have entire supervision of agencies are Iowa, Missouri, Nebrrska, Kansas, Arkansas and Texas.

Mr. Stewart has been in Birmingham more than six years and during this time has made many friends and wonderfully built up the business of his company in Birmingham. He has been with the Metropolitan for eleven years as agent, assistant superintendent and now becomes superintendent of agencies, which is the highest field position in insurance work. He succeeds H. A. Young, who resigns to go to the New York office.

Mr. Stewart has just returned from New York, and his work as superintendent of this district ended yesterday, although he will remain in Birmingham for a week or so before entering upon his new duties. He has numerous friends in this district who will regret to see him leave Birmingham, but who wish him success in his new field.

Hicks' October Forecasts.

"A reactionary storm period will culminate on and touching the 14th and 15th. In fact, the causes are such that threatening conditions, with autumnal rains, may continue from the preceding period, the 7th to 11th, ending in a secondary culmination or crisis on the 14th and 15th to 18th.

"A regular storm period embraces the full moon very close to the celestial equator. This matter of the moon being on the equator at new and full appertains to the equinoctial periods and they correspond this month so closely as to suggest equinoctial phenomena not far from the 7th, as the period 18th to 22d. Seismic disturbances will be quite natural at both periods. This fourth storm period covers the 8th to 22d. Early in the period, in western extremes, falling barometer will announce approaching storm conditions. By the 20th cloudiness and rain will appear, and from Sunday the 20th to Tuesday the 22d, storm areas will make their transit eastwardly across the country. The crisis of the period will fall on the 20th and 21st in all the central parts of the country. Rain and wind, with lightning and thunder, will attend the first stage of these storms, but change to cool, autumnal rain, with snow possible in the north and west, will result on the north and west, flanks of storm areas, all followed by very cool nights and frosts, reaching well to the southward.

"A reactionary storm period is central on the 25th, 26th and 27th. It will bring a period of mistness and thick, prolonged cloudiness that will hardly break away during the remainder of the month.

"A regular storm period begins on the 29th, is central on the 31st, extending to November the 3rd. As October comes to its close the barometer will indicate the approach of positive and general storm conditions from western sections. From about the 31st to November 3d autumnal rains will take up their march from west to east, touching most parts of the country and being followed from the west and north by rising barometer, change to cold, westerly winds, with early snow and sleet over large areas to the northward. The indications are that general autumnal storms and weather will be ushered in about this time, and much inconvenience and loss may be averted, especially to agriculturists and dealers in perishable goods, by a prompt and vigilant roundup of the autumn's work. All the opportunities in October should be wisely and industriously used preparatory against storm and weather in November. We speak from experience in giving this advice and warning.
