PROSPECTUS OF

The Cosmopolite.

ON the first of January we commenced the publication in the City of Baltimore of a

MONTHLY LITERARY MAGAZINE.

There is no publication of this character now issued South of New York City, and the closing of the war has left a large portion of the people of the country with no literary representative.

The COSMOPOLITE will be devoted to Literature, Art, Review, Scientific Papers and General Reading, and we shall number among its contributors some of the first literary men of the South, with others from the North and from London and Paris.

All matter not original will be carefully selected from the newest and best of the English, French and German publications; and its Editors will spare no effort or expense to make it rank with the *very first* Magazines of the country.

As its name imports, we have established THE COSMOPOLITE upon no sectional basis. We hope to make it the organ of general literature alone, and will be uninfluenced by any party or clique whatever.

It will be mailed to subscribers in any part of the country upon receipt of the following

SUBSCRIPTION:

Single Copies, for one year,	$ 4 00
Five " " " "	18 00
Ten " " " "	33 00

THE COSMOPOLITE will be generally distributed among the Merchants and Planters of the South, and we will add, for their information, a few advertisements, at moderate rates. Liberal deductions will be made to booksellers and news dealers. Address

A CARD

To the Farmers of Kent Co.

A CISTOM has obtained in the Grain trade of Baltimore, from which the farmers have suffered, and to which I as a Grain seller am unwilling longer to submit. It is no uncommon thing for a Commission Merchant to have Grain consigned to him and the first intimation he receives that the Grain is in the market is a return made to him by another Commission Merchant for so many bushels of Grain sold at a price that he does not know whether it is right or not, as he does not see the Grain. I suppose the custom originated in this way:—When samples of Grain are mixed they could not be delivered if sold separately, and in that case the agent having the largest lot has the right to sell; but when Grain is separate this is not necessary, except for the convenience of the Captain. I do not recognize the right of any Captain to hand over to another party without my consent, a sample of Grain to sell that is consigned to me. I prefer to have the control of my own Grain, and the privilege of determining myself, whether or not it is to my interest, or the interest of my customer, to have it sold by another Commission Merchant who has no interest in it.

Farmers who send me their Grain to sell are requested in all cases to direct the Captain to deliver me the sample.

BOOT AND SHOE ESTABLISHMENT,

BOOTS AND SHOES.

In soliciting the patronage of the inhabitants of Baltimore, in the above business, asks to invite their attention to a few plain facts in connection with the art of Boot and Shoe making, and particularly to the fitting of the same. Being fully convinced that the pain and inconvenience under which so many persons suffer arises from unequal pressure on certain portions of the feet, which causes corns, bunnions, and other unnatural formations of the foot, may be removed with due attention to the formation of the boot or shoe.

S. P. RHODES

guarantees

A GOOD AND EASY FIT.

Each article being made under my own superintendence. It is an indisputable fact that corns and bunnions are caused by unequal pressure on the foot; if the boot or shoe, therefore, be not formed according to the position of the foot when the weight of the body presses upon it, there must of necessity, be an unequal pressure, which, with the friction occasioned by walking, irritates and produces those afflictions. Hence, it is from the boots or shoes not fitting the foot properly a defect solely to be attributed to the manufacturer, who may not possess sufficient knowledge of his business, that has caused so many to suffer from the ignorance of the few, both in health and wealth; in the former instance by the pain occasioned by corns, &c., and in the latter by compelling persons to cut their boots and shoes to give ease, or sacrifice such articles before they are half worn out, and inflicting grievous wrong upon the public at large, in regard to that essential point—the properly fitting of the foot.

Boot making ought to be regarded as an important science, although it is generally considered as a very simple business. This arises from the great number of boot and shoe sellers, not manufacturers, many of whom are not in the slighest degree acquainted with the making of either; and many of the articles sold by such persons are frequently made from the one last, as if all person's feet were precisely the same shape, a thing as utterly impossible as it is to see two persons with precisely the same features. The fact, is they are made for sale, and the comfort of the purchaser is not in the slightest degree attended to, while the material is frequently the very worst, the workmanship inferrior, cheapness being the only point considered; but it often turns out the dearest. S. P. Rhodes will not adopt that course, and assures those who favor him with a trial, that the article shall be manufactured of the best material, and best workmanship, and the lowest remunerative prices.

I have now on hand a fine lot of

GENT'S BOOTS, SHOES AND GAITERS.

I take the draft of your foot, so the boot or shoe is shaped to it. Corns cut, and all other imperfections of the feet attended to, without causing the slighest pain.—Persons waited on at their own houses.
