KRAUSERS PORTABLE CIDER MILL.

THESE superior Cider Mills can still be furnished, of improved construction and finish Their grinding apparatus is peculiar and give them an advantage over all other mills. By the action of two reciprocating pistons the apple are forced up against the teeth of a rapidly revolving cylander and retained till ground to a fine pulp, which of course yields more juice when subjected to pressure than if the pomace was coarse. The screw press has been greatly improved and strengthened since last year and the whole frame is tightened by strong joint bolts. It is adapted to either hand or horse power and can be worked by hand to the extent of six to eight barrels in a day.
