A. BARKER'S
DOUBLE ACTING
FORCE AND LIFT PUMP

IS acknowledged to be the most simple in construction, efficient in operation, less liable to get out of order, and more durable than any pump yet invented.
The World's Fair, London, gave Mr. Barker the complimentary medal, and the Pennsylvania State fair, on two occasions, awarded the pump the first premium.
In cases of fire, the Barker Fire Engine Pump has proved itself invaluable. On several occasions persons, by having this pump on their premises, have saved their property from the devouring flames.
The Scientific American, of August 14th, 1852, says: "In our humble judgment Barker's Double acting pump is one of the best improvements which has been made in a great many years, and, in saying this, we express the opinion of many who have used the pump and are now using it. The pump was patented last February, and the claims were broad strong and reliable."
References to the following gentlemen: Samuel Baker, Richard S. Thomas, John McDaniel.
You can see these pumps work at any of the places we have a number engaged to put in.
