Messrs.—
R. G. Nicholson, W. D. Maslin,
D. A. Bacchus, Warren Hurlock,
Jess Medders, C. C. Jones,
D. B. Ford, Earle Nicholson,
Dr. H. L. Dodd.

WATER IMPROVEMENTS

Our town authorities have gone about the improvements in the water system in good earnest. The two boards—Messrs. W. S. Carroll, T. S. Bordley and George D. Lofland, town commissioners, and J. D. Bacchus, T. D. Bowers and C. N. Satterfield, of the water board—held a joint meeting on Monday night of this week and confirmed all the recommendations of the Water Board. The improvements called for by this board and recommended by Engineer Quick are already under way, namely:

1. A new artesian well to be bored estimated to a depth of 750 feet which is expected to reach a water bearing stratum of bed rock from which a large quantity of fine water can be obtained. This well is estimated by Mr. Quick to cost about $3,000.

Eminent well borers are now being consulted and a contract is expected in a few days, and the work begun at once.

2. Storage and supply tank on the high ground about the reservoir at the College; 60,000 gallons capacity and 80 ft. high to give pressure in the general domestic service and in case of fire.

3. A new 60 H. P. boiler like the one now in use, simply to guard against a break in the one in use.

Mr. Quick says in his report just made to our Water Board, "You certainly do not need it because of the present good boiler being of insufficient capacity to do the work you will have to do. The only reason for your getting a new boiler would be to insure your always being able to operate in case the present good boiler should require repairs that would take a day or more to make." Mr. Quick further says: "You do not need a large pump. The pump now works ordinarily against a pressure of from 20 to 25 pounds. When I had the high pressure test made on your distribution system last March the pump was operated for an hour and a half against a pressure of about 90 pounds. The present pump is amply sufficient with a few needed repairs." This advise also was accepted by the board and the repairs on the old pump will be made at once.

The new valves at street crossings are being installed as rapidly as our plumbers can do the work. The work has to be done at night and is very tedious and tiresome. Families will notice that the water will be shut off again for a few hours on Monday and Tuesday nights next.

The Commissioners are making great improvements in the water lots which inclose the pumping station and pools, and they propose to meet the demand of the Fire Company as far as possible for new hose and other paraphernalia of the Company.
