A. MATHIOT'S

DOUBLE ACTING

FORCE AND LIFT PUMP

IS acknowledged to be the most simple in construction, efficient in operation, less liable to get out of order, and more durable than any pump yet invented.

The World's Fair, London, gave Mr. Barker the complimentary medal, and the Pennsylvania State fair, on two occasions, awarded the pump the first premium.

In cases of fire, the Barker Fire Engine Pump has proved itself invaluable On several occasions persons, by having this pump on their premises, have saved their property from the devouring flames.

The Scientific American, of August 14th 1852, says: "In our humble judgment Barker's Double acting pump is one of the best improvements which has been made in a great many years, and, in saying this, we express the opinion of many who have used the pump and are now using it. The pump was patented last February, and the claims were broad strong and reliable."

References to the following gentlemen: Samuel Baker, Richard S. Thomas, John McDaniel.

You can see these pumps work at any of the places we have a number engaged to put in.

The undersigned have bought the patent right for Kent county; any gentleman wishing a pump put in can drop a note to

BOOTS & SHOES,

☞ *FOR CASH ONLY!* ☜

I REGRET the necessity which forces me to adopt the cash system; as my capital is in the hands of my customers and I am unable to continue selling on credit, as it will compel me to discontinue accounts with many good and highly favored customers who I would be glad to work for on credit if I was able to do so. I hope this frank explanation will be a ample apology and that my customers who have heretofore failed to pay when I wanted money will relieve me from the very unpleasant task of declining to send out work without the money, by universally paying their bills when their work is done.
