**IT MEANS BIGGER PROFIT FOR YOU!**

**Larro-feed Shows Its Value On The Milk Check**

Yes, Larro may cost you more money per ton—more money per feeding than some dairy feeds, but you must remember that Larro is not made to sell at a price; it has always been offered as a better dairy feed—a feed that would make your cows give you more milk and result in a bigger milk check for you at the end of the month.

Some of the best friends we have today are dairymen who at one time thought they couldn't afford Larro because it cost more money per ton than the feed they were using. Now these same fellows (thousands of them) tell us no feed ever paid them so big a profit as Larro.

They tell us that not only do their cows give more milk but they milk for a much longer period and always seem to be in so much better health than before.

Maybe you are one of those dairymen who have already tried and found out for yourself what a wonderful feed Larro really is. If so, you will surely be glad to tell your farmer friends about it. But if you aren't now using Larro, then we are both missing something.

**Get your supply of Larro today. Let this be the beginning of increased profits for you.**

**Feed Your Cows "PFO" DAIRY RATION**  
For More Milk and Better Health Cows in Good Physical Condition  
Always Give Best Yearly Yield. "PFO" DAIRY RATION will keep your cows in good physical condition with less attention in feeding.

**PALATABILITY**  
No dairy cow ever did well on a feed she did not like. In selecting the ingredients for "PFO" DAIRY RATION we have paid most particular attention to the palatability of the mixture. Cows eat it eagerly and do not "go off feed" readily.

**GUARANTEED ANALYSIS**  
PROTEIN, 20 per cent.; Fat, 3 per cent.;  
Carbohydrates, 60 per cent.; Fibre, 15 per cent.

The above figures are not the real values to the feeder. It is the digestibility that counts and produces and just how much digestible nutrients in a dairy ration is what the feeder who knows his business wants to know. DIGESTIBLE PROTEIN 15 1/2 per cent. FAT and CARBOHYDRATES 60 per cent.
