Do You Get Up With a Lame Back?

Kidney Trouble Makes You Miserable.

Almost everyone knows of Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy, because of its remarkable health restoring properties. Swamp-Root fulfills almost every wish in overcoming rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. It corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night.

Swamp-Root is not recommended for everything but if you have kidney, liver or bladder trouble, it will be found just the remedy you need. It has been thoroughly tested in private practice, and has proved so successful that a special arrangement has been made by which all readers of this paper, who have not already tried it, may have a sample bottle sent free by mail, also a book telling more about Swamp-Root, and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and send your address to Dr. Kilmer & Co., Binghamton, N. Y. The regular fifty-cent and one-dollar size bottles are sold by all druggists. Don't make any mistake but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle

Special Sale on
Waists

49c buys a Waist that will not pay for the material that is in it—mannish styles.

65c buys a Waist worth easily $1 anywhere—cool and comfortable for the extreme hot days.

75c buys a Waist that anybody may feel proud to wear—embroidered hooks, like real hand work.

Royal Worcester and Bon Ton
Corsets

The Bon Ton is the "Corset de Luxe" for well groomed women—the recognized standard of corset perfection.

The prettiest woman lacks charm unless she has the wit to be well gowned—that is, neatly, becomingly dressed—and above all, trim of figure.

Royal Worcester Corsets emphasize a naturally good form and create attractive curves where none existed. A superb figure is within every woman's power if she will but wear the Royal Worcester Corsets. Scores of the most exquisite and fashionable new designs now on display at CARMINE'S.

Lawns

Beautiful Patterns to select from. 5c and 10c yard. Look them over.

Grocery
Department

At all times our line is complete with good things to eat—the best the market affords—at prices as low as any one. Come in and look for yourself and be convinced.

NOTICE TO
Parents, Guardians and Others

WASHINGTON COLLEGE

NOTICE has been received by the Orphans' Court that Kent county is entitled to a beneficiary in Washington College, by virtue of the graduation of J. Lewin Burris, of Kent county, Maryland.

It is required that the applicant be at least 15 years of age, that he shall be able to read, write and spell well, and shall have completed English Grammar, History of Maryland and United States, Geography and Arithmetic, so as to devote himself to the collegiate course proper.

In compliance with the law, the Orphans' Court for Kent county hereby gives notice to parents, guardians and others, who are disposed to avail themselves of this notice, that on

Thursday, Aug. 8th, 1912

at 10.30 o'clock A. M., applications will be received by this Court. The applicants for this position must appear in person for examination by the Court. The condition of scholarship requires the successful applicant shall give bond to the Orphans' Court in the penalty of $50.00 to teach for two years in the public schools of the State, if required to do so by the School Commissioners for Kent county.

All applications must be filed on or before the day named with the Register of Wills.

By order of the Court,
JESSE R. COPPER,
Register of Wills

MORE CONVENIENCES FOR THE COUNTRY HOME!

This paper was written by Mrs. Belle Caples Morris, Lecturer of Sassafras Grange, and read at the Pomona Grange at Mr. Harry Grifflith's on July 25th:

The farm home has not kept pace with the farm in the number of its labor saving appliances and conveniences. No farmer of today would try to work with the tools in use fifty years ago but in many country homes of today the tools are as primitive and the conveniences no greater than those our grandmothers had.

Over 500 letters were recently sent out to Missouri farmers wives asking what is their one most serious need and 53 per cent. of them answered, "Running water in the house," and that must stand first among the many improvements needed in the country home. Where there is already a windmill with tank water can be piped to the house with very little additional expense, or a hydraulic ram placed in a running stream will raise water ten feet for every foot of fall in the stream.

The mail order houses sell a pneumatic water supply outfit for from $45 to $60 which will furnish from 100 to 200 gallons a day according to size and may be used in connection with any ordinary pump.

A bathroom ought to be considered a necessity in every home, but in how many country homes as originally built do you find one, and yet a bath room is a greater aid toward right living and high thinking than a parlor carpet, a family carriage or a piano, and would cost no more than any of them.

When Washington wanted to take a bath he had to call on his mother to wash his back, and in many country homes the same method is in vogue today, and yet we pride ourselves on our progressiveness. If you can think of anything more comical and pathetic than a six-foot man trying to double up (like a jack-knife) in a wash tub and having to call on his wife to wash his back, I don't know what it is. If you have no bathroom take a piece off the parlor and make one. I heard recently of a young couple who were having built a bungalow of two rooms in which to start housekeeping and one room was a bathroom, and I applauded their good sense. Every kitchen ought to be provided with a sink which may be bought and installed for from $5 to $10, according to size. This will save the housewife and her helpers many steps.

In many homes the family washing is yet done in the old back-breaking way, which for a few dollars a washing machine may be bought that will wash the clothes whiter than they can possibly be made by the old way. The old tubs might be fitted with spigots for drawing off the water for a few cents of expense and a few minutes time.

A cupboard between the kitchen and dining rooms with an opening into both rooms will be found a saver of steps and time in setting and clearing the table, and is not beyond the ability of the handy man to build.

For $50 to $100 a gasoline engine may be bought that will run the separator or churn, pump the water, turn the washing machine, grind the feed and saw the wood and it might even be rigged so that it would wash the man's back.

The up-to-date housewife of today needs to understand something about chemistry, physics and bacteriology in their application to such subjects as heating, lighting, ventilation and plumbing of the house. She must be an interior decorator, since it falls to her to design, furnish and decorate the house; She must be the purchasing agent, book-keeper and employer of labor for the home She ought also to be a dietician, and understand at least some of the physical and chemical changes which food undergoes She must also be the health officer of the home and once she is aroused on that subject she will find plenty to occupy her attention around the ordinary country home; but that dererves a whole paper to itself.

Now if the housewife must give attention of these things how in the world can she find time for it if her work has to be done with antiquated tools?

For years men have been studying the soil to find how best to keep up its fertility and conserve its moisture; they have figured down to the last cent the most economical way to feed their live stock and increase its good qualities; and it is time they had commenced to think about promoting the welfare and comfort of the women of their households; how to conserve their trength and lighten their burdens. The day has gone by when women are satisfied to be drudges They want a vacuum cleaner and time to attend the Grange and the womans club.

The genuine in a yellow package. Sold by M. A. Toulson.

FARMING NOTES.

A Budget of News from the Fields and Farm—More Potatoes Wanted in the County.

Ramie Ziesal has rented the Spencer Comegys farm at Blacks Station. Mr. Hall, of Queen Anne's, will tenant the Massey farm.

Thos. H. Bryan removes to the Crew farm, near town, Mr. Cleaver going to the Wethered farm now tenanted by Mr. Wooleyhand. Mr. Subers will tenant the Jack Westcott farm in Quaker Neck.

Robert W. Subers from up the county, will tenant Mr. J. D. Urie's farm at Lynch.

L. L. Smith has purchased the Henry Jump farm, in Still Pond Neck, of Lewin W. Wickes, Esq., attorney, price around $10,000. John A. Duyer will tenant this farm next year.

William T. Crow has rented his farm in Morgnec to Mr. James Groves' son for next year. Mr. and Mrs. Rambo, who have tenanted the place, will remove to Worton where they own property.

The Caroline Sun says: From four acres Calvin Haltaman harvested 720 bushels of potatoes, the largest yield yet reported.

Mr. E. A. Corey, the potato King of Kent county, says that where he put the most fertilizer he got the most potatoes, 50 bushels per acre more in some instances.

A number of farmers are greatly pleased with the result of using lime. A line of demarkation may be seen on land where lime was not used.

Eugene H. Grubb, of Denver, Col., has been in New York endeavoring to interest city folks in the scientific production of the potato. Mr. Grubb is an authority on the subject, an enthusiast. He has made a study of the origin of the potato and of its cultivation and he is the author of the book "The Potato," soon to be published. Those who are familiar with the book say that it is the last word on the subject.

Evidently the New York Central Railroad thinks so, for its president, W. C. Brown, has ordered 9000 copies which are to be distributed free to farmers along the New York Central lines. In addition every student at Cornell University is to have a copy of the book which has received the approval of Secretary Wilson of the Agricultural Department.

After beef and wheat the potato is the most important food in this country, as Mr. Grubb points out. As a general proposition 400,000,000 bushels of potatoes would be consumed in this country, if the supply came up to the demand. This year the crop is short 100,000,000 bushels and 25,000,000 bushels of potatoes have been imported.

"What does this mean?" Mr Grubb asked. Then he answered: "The duty on potatoes is 25 cents a bushel. It means that this country is paying $6,000,000 in duty on potatoes—$6,000,000 of which should go to the farmers of this country. The only reason for this is the lack of knowledge on the part of potato growers. Farmers in this country are 50 years behind the times in the matter of seeds and the manner of potato culture. The farmers have not got the scientific knowledge, and the Agricultural Department apparently does not approve of the instructions of scientific methods.

"Take Great Britian for instance. There they grow potatoes according to soil conditions. Here we try to make soil conditions fit the potato. On the other side they grow potatoes in every kind of soil. Here there is no effort to grow potatoes unless on soil peculiarly suitable for the purpose."

Mr. Grubb and Luther Bank will start next November to make a two year trip studying plant life.

The biggest apple crop ever known is said to be in sight for 1912. An agricultural paper learns from apple men who have earned something of a reputation in the predicting of the size of crops that pro[illegible] 50,000,000 barrels of apples will be ma[illegible]d this year, as against 30,000,000 barrels in 1911. In no state where apples are grown is there the prospect of a failure. In New York, Maine, Massachusetts and Michigan the outlook is the best ever known. In Pennsylvania, Maryland, West Virginia better crops are expected than last year. In Arkansas, Missouri, Kansas, and Illinois the yield promises to be larger than for several years past.

THE JOYS OF THE EDITOR.

Most anyone can be an editor. All the editor has to do is to sit at a desk six days out of the week, four weeks of the month, and twelve months out of the year and "edit" such stuff as this:

Mrs. Jones Cactus Creek let a can opener slip last week and cut herself in the pantry." "A mischievous lad of Piketown threw a stone and struck Mr. Pike in the alley last Thursday." "John Doe climbed on the roof of his house last week looking for a leak and fell striking himself on the back porch." "While Harold Green was escorting Miss Violet Wise from the church social last Saturday night a savage dog attacked them and bit Mr. Green several times on the public square." Isaiah Trimer, of Running Creek, was playing with a cat Friday when it scratched him on the veranda." Mr. Fong, while harnessing a broncho last Saturday, was kicked just south of his corn crib."—Exchange.

DE LAVAL CREAM SEPARATORS

The World's Standard

Used Exclusively by 98% of World's Creameries

Ten years ago there were a dozen different makes of creamery or factory separators in use. To-day over 98 per cent of the world's creameries use De Laval separators exclusively.

When it comes to buying a separator why not profit by the experience of the creameryman, which qualifies him to advise you correctly.

He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries use the De Laval exclusively.

There can be no better recommendation for the De Laval than the fact that the men who make the separation of milk a *business* use the De Laval to the practical exclusion of all other makes. They *know* from experience.

Easiest to turn, easiest to wash, skims the cleanest lasts the longest

SOONER OR LATER YOU WILL BUY A DE LAVAL
