## THE SWISS ARMY.

**Always Ready For War Service at a Moment's Notice.**

The total population of Switzerland is rather less than half the population of London alone, yet the plucky little republic can throw into the field at a moment's notice four completely equipped and trained army corps to Germany's and France's twenty and England's nominal eight. In proportion to her population as compared with Switzerland, England should possess fifty.

Every ablebodied Swiss is, ipso facto, a member of the army from eighteen to forty-four, yet never does one hear the least complaint made by a Swiss of whatever social class at the trifling sacrifice of time that his military duties demand. To watch a Swiss battalion on its way to maneuvers in camp or on its return is to watch as contented, serviceable and cheerful a lot of men as one could wish to meet.

The only serious tax upon the time of the soldiers is the first two months of hard training as a recruit. Afterward sixteen days in camp every other year is all that is required of him. Between whiles he shoots with his comrades—every little village has its shooting range—because he loves it, and devotes a certain amount of time voluntarily to the physical exercises he is taught at school to keep himself fit. On first joining he is carefully examined as regards his suitability for this or that branch of the service and is drafted into that for which he is best fitted, and he invariably takes as great a pride in his regiment, battery or squadron as could any voluntarily enlisted man in our smartest corps at home.

The Swiss army comprises 100 battalions of infantry and twenty-four squadrons of cavalry, with the necessary ordnance and departmental corps, while the artillery includes forty-eight field batteries, ten batteries of position and two excellent mountain batteries.—Pall Mall Gazette.

**First Thermometer.**

The first thermometer was made in 1621 by a Dutch physicist named Cornelius Van Drebbell and consisted of a tube filled with air, closed at its upper end and dipping at its other extremity, which was open, in a bottle of nitric acid diluted with water. As the temperature rose or fell the air in the tube increased or grew less in volume and consequently the liquid descended or rose. This instrument is now known as an air thermometer, but as its measurements were based on no fixed principle it was of little use.

**No Relative of His.**

Duncan, aged two and a half, had been naughty. To punish him his mother tied him in his high chair and kept him there for one hour, by the clock. His father got home before the hour was quite up and asked the youngster why he was tied up.

"Father," replied Duncan, pointing an accusing finger at his mother, "I'm completely surprised at that lady."

**The Greater Offense.**

Professional Hypnotist—Can I get permission to bury old Joe Soaker alive and dig him up after thirty days? Mayor of Lonelyville—No, ding ye! Ye kin bury him alive if ye want to, but if ye ever dig him up ag'in I'll jug ye!—New York Press.

**An Artist.**

She—You said you were going to marry an artist, and now you're engaged to a dentist. Flo—Well, isn't he an artist? He draws from real life.

When a man lays the foundation of his own ruin, others will build on it.—Fielding.

## Foreign and Domestic Dry Goods

The new fall woolens are all here. Artistic care has been used in their selection and you will be sure to find your own particular desire among them.

Our well-known LOW PRICES reign supreme in this department and our constant effort is to give you "better goods for less money" than you can find elsewhere.

### Our Millinery Exhibition

Medium Hats predominate ostrich plume and bird-of-paradise feathers are chief ornaments. But there are small hats a plenty. The fine clipped beaver felt varieties lead ; and they are preferably trimmed with pheasant tails, merle birds, wings and quills. But details are tedious and it is much easier to show you. Do not fail to look at our millinery when in need of your fall hat.

We have fortunately secured the services of Miss M. Kynast, of Baltimore, as trimmer, an artist who stands in the very front ranks of her profession and her work will speak for itself.

# FLUE CURING IMPROVES TOBACCO LIKE ROASTING IMPROVES GREEN COFFEE

## Flue Curing Develops the Stimulating Aroma and Taste Found in Schnapps that Satisfies Tobacco Hunger

There are three ways used by farmers for curing and preparing their tobacco for the market; namely, sun cured, air cured and flue cured. The old and cheap way is called air cured; the later discovery and improved way is called flue cured. In flue-curing the tobacco is taken from the field and suspended over intensely hot flues in houses especially built to retain the heat, and there kept in the proper temperature until this curing process developes in the tobacco the stimulating taste and fragrant aroma found in Schnapps tobacco, just as green coffee is made fragrant and stimulating by the roasting process. Only choice selections of this ripe, juicy flue cured leaf, grown in the famous Piedmont country, where the best tobacco grows, are used in Schnapps and other Reynolds' brands of high grade, flue cured tobaccos.

Hundreds of imitation brands are on sale that *look* like Schnapps; the outside of the imitation plugs of tobacco is flue cured, but the inside is filled with cheap, flimsy, heavily sweetened air cured tobacco; one chew of Schnapps will satisfy tobacco hunger longer than two chews of such tobacco.

Expert tests prove that this flue cured tobacco, grown in the famous Piedmont region, requires and takes less sweetening than any other kind, and has a wholesome, stimulating, satisfying effect on chewers. If the kind of tobacco *you* are chewing don't satisfy, more than the mere habit of expectorating, stop fooling yourself and chew Schnapps tobacco.

Schnapps is like the tobacco chewers formerly bought costing from 75c. to $1.00 per pound; Schnapps is sold at 50c. per pound in 5c. cuts, strictly 10 and 15 cent plugs.

TO THE

# VOTERS OF KENT COUNTY.

As a candidate for the Democratic nomination to the State Senate of Maryland in 1907, I desire a large Democratic majority aspossible for the Hon. Thomas A. Smith for Congress in 1906.

* * *

I have predicted that Kent will give Mr. Smith five-hundred majority, but against such a candidate as William H. Jackson, Mr. Smith should get a thousand majority at least.

* * *

I am prepared to debate before an audience composed of the backbone and voting strength of the Republican party, the colored people of Kent County, the proposition that since the death of Abraham Lincoln to the present day, the Republican party has never made a single sincere effort to protect or foster the interests of the colored race, but has all these years relied on the faithful support of the colored voters to keep that party in power and the Republican party has used and abused the franchise privilege and power resulting therefrom to pass laws of special privilege and have resulted in monstrosities like the Carnegie and Rockefeller accumulations of unearned wealth at the expense of the real producers of this nation's wealth.

* * *

This challenge to debate is especially directed to Mr. Wm H. Jackson personally, or to any Republican leader in Kent County from the party's most successful leader, the Hon. John David Urie, down.

Very respectfully,

CECIL R. ATKINSON,

Box 33, Chestertown, Md.
