Ever one comes up with a different answer on gas mileage, because everyone drives differently. But nothing can obscure the fact that the 60-horsepower Ford V-8 is setting an entirely new standard of fuel economy. We're getting reports from owners ranging well above 25 miles per gallon—some considerably more than that under favorable circumstances.

And this new V-8 engine has made possible not only big savings in operating costs, but the lowest Ford price in years! If you haven't driven the 1937 Ford V-8 with both the 85 and the 60horsepower engines, you have no idea of the modern values in the low-price field. Come in and bring yourself up to date with a ride.
