Come to the Store

When a man comes to the store to buy his paint, he needs impartial, intelligent and friendly advice. A wrong selection of material is often a serious mistake, and a mistake in paint lasts a good while. We make it our business to know as much as possible about the goods we sell, and our customers are welcome to the benefit of this imformation. Perhaps we can give you some useful hints about color and decoration, as well as some general knowledge on the subject of paint, Our staple stock includes

LEWIS PURE WHITE LEAD

guaranteed by the well-known

DUTCH BOY PAINTER TRADE MARK

It is worth your while to talk it over with us before you buy.

To Amend Oyster Law.

Important suggestions for action by the coming Legislature will be made in the annual report of the Shellfish Commission, which will be out in a few weeks. These suggestions will be substantially as follows:

First—That provision be made for forcibly collecting the rent for the land which the commission leases under the terms of the law.

Second—The reduction of the rentals so that the rate shall be $1 an acre a year for six years.

Third—An extension of the area that may be taken up by any one man from 10 to 30 acres in the tributaries and from 100 to 500 acres in the bay.

Fourth—The removal of all restrictions as to the time and manner in which a planter may take up his oysters on his own leased land.

Fifth—The setting aside of certain parts of the bay where planters may obtain seed oysters.

Sixth—A reduction in the time allowed riparian owners and oystermen to make up their minds as to what lands they want to lease so that the general public may be able to lease at the end of three instead of 10 months after the the grounds are declared ready for lease by the commission.

Seventh—Removal of the prohibition against any but a bona fide resident of the State leasing oyster bottoms, so that after the riparian owners are first satisfied, the oystermen are next satisfied, the general public in Maryland next, then the rest of the land may be leased to anyone who wants it.

Farmers, Attention.

The following letter should be of interest to our farmers and grangers:

Easton, Md., Nov. 16, 1909.

TRANSCRIPT, CHESTERTOWN, MD.—Gentlemen:—As the time is now nearly here for the opening of the State Wheat and Corn Exhibit, we are very desirous that the attention of the farmers of your county should again be called to the necessity of preparing their exhibits of corn and other cereals, as well as hay, and express them, care of Wheat and Corn Show, Fifth Regiment Armory, Baltimore, Md., not later than November 27th. A long list of substantial premiums are offered, and I trust your county will be well represented. Prize list and program will be mailed upon application to W. Oscar Collier, Easton, Md., or Prof. Nicholas Schmitz, College Park, Md. Thanking you for any assistance you may render us, I am

Very truly yours,
W. OSCAR COLLIER,
President of Md. Cereal and Forage Crop Breeders' Association.

OBJECTS AND PRINCIPLES

OF THE

Jr. O. U. A. M.

FIRST—To maintain and promote the interests of Americans and shield them from the depressing effects of unrestricted immigration; to assist them in obtaining employment and to encourage them in business.

SECOND—To provide for the creation of a fund or funds for the payment of benefits in case of sickness, disability or death of its members, to members, their legal dependents or representatives, and to issue certificates of membership for the same.

THIRD—To uphold the American Public School System, to prevent interference therewith, and to encourage the reading of the Holy Bible in the schools thereof.

FOURTH—To promote and maintain a National Orphans' Home.

We recognize the landing upon our shores of the ignorant, the vicious and the lawless of the Old World as a constant menace to our institutions, and believe that it should be viewed with alarm by the loyal and patriotic citizens of the country.

We would place a flag upon and a Bible within every Public School-house of our land, that all might learn these to be a beacon light in every storm which may threaten our destruction.

If the Egg Sac of a Hen is not supplied with pure, rich blood, the Embryotic eggs it contains cannot develop properly. Fairfield's Blood Tonic and Egg Producer purifies the blood and furnishes it with the materials from which eggs are made.

Cows coming off pasture will fail off in milk production unless they are fed Fairfield's Milk Producer regularly. It supplies them with the elements they have been getting from the juicy grasses all Summer, and puts them in trim for Fall and Winter milk production.

You have been experimenting with the old-fashioned "Cure-all" Condition powder long enough. It's time you were using the Modern, sensible and Scientific kind, the Fairfield Blood Tonics. A separate, and Different, Conditioner for each kind of animal. (Ask for Fairfield's Free Book).

Your horses have worked hard this past Summer. Their blood is filled with worn-out Cells and wast material. Build them up; perfect their digestion and purify their blood by the regular use of Fairfield's Blood Tonic and Regulator for Horses Only.

The Egg Factory on your farm will work full time if you feed your hens Fairfield's Egg Producer regularly. It provides them with egg-making materials and makes egg production regular and exceedingly profitable. Costs but a trifle. (Ask for Fairfield's Free Book).

Hog Cholera, Catarrah and all diseases of Swine are prevented by the regular use of Fairfield's Blood Tonic for Hogs Only. It fills the Arteries with pure blood, increases the functional activity of every organ and keeps the bowels in perfect order.

Forced feeding for egg production either causes indigestion or produces too much fat. In either case egg production is hindered. Fairfield's Egg Producer increases egg production in Nature's way by providing the hen with the elements of which eggs are composed.

Dairymen in this section attribute their increased profits this year to their regular use of Fairfield's Blood Tonic and Milk Producer for Cattle Only They have proven that it saves feed, increases and enriches the milk supply and keeps cattle healthy.
