Avery's—The Tractors That Burn ALL the Kerosene

You want a tractor that burns Kerosene. You don't need to burn high priced gasoline in Avery Tractors, for they are genuine Kerosene burners.

Avery Tractors are the only make of tractors equipped with a double Carburetor and Duplex Gasifier Fuel System, and the only make of tractors that really burn *All* the kerosene.

One Avery owner recently said: "Our engine runs as smoothly on kerosene as on gasoline. We haven't had a bit of trouble with it." Another Avery owner said: There are eleven gas and oil tractors in our county. None of them handle kerosene as well as the Avery." Avery Tractor Owners all over the country are saying the same thing—they have proved by experience that Avery Traotors burn *all* the Kerosene.

Let us demonstrate to you how Avery Tractors do this.

A NERVOUS BREAKDOWN

Miss Kelly Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Newark, N. J.—"For about three years I suffered from nervous breakdown and got so weak I could hardly stand, and had headaches every day. I tried everything I could think of and was under a physician's care for two years. A girl friend had used Lydia E. Pinkham's Vegetable Compound and she told me about it. From the first day I took it I began to feel better and now I am well and able to do most any kind of work. I have been recommending the Compound ever since and give you my permission to publish this letter."—Miss FLO KELLY, 476 So. 14th St., Newark, N. J.

The reason this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, was so successful in Miss Kelly's case was because it went to the root of her trouble, restored her to a normal healthy condition and as a result her nervousness disappeared.

Gilbert Hadaway, of Chester, Pa., spent the week-end at home.

Miss Hilda Coleman, of Baltimore, visited relatives in town Sunday.

Bees As Food Conservers

Bees, nature's sugar manufacterers, are called to serve the country now in its need for sweets as an article of food. The Department of Agriculture has just issued a loud call for a large number of persons to take up the bee culture as an occupation to help out in the food emergency of the world. Hives can be established in waste places, and the most delicious sweets produced without the need of an acre of ground, a plow or hoe, or cane or beet seed. The working bees go out into the gardens and orchards and sip nectar from the beautiful blossoms, put it in their honey sacks, carry it home, and by chemical process unknown to man, transmute it into honey. Men try to help them with substitutes for their nectar, or by providing wax, but the bees resent the proposition as an impertinance, and say frankly they do not want human help in their factory. In the present international and world-wide threat of a sugar famine, a sweet so delicious and so economically manufactured as honey should help amazingly in the settlement of this feature of the food problem.—Christian Herald.

To The American People

There is no foundation for the alleged violations of law attributed to our Company by agents of the Federal Trade Commission and I want to say emphatically that Swift & Company is not a party to any conspiracy to defraud the Government. Nor has Swift & Company been guilty of improperly storing foods or of making false entries or reports.

Conferences of packers, where prices have been discussed, have been held at the urgent request and in the presence of representatives of either the Food Administration or the Council of National Defense. And yet the packers have been accused of committing a felony by acting in collusion on Government bids!

We have done our best, with other packers, large and small, to comply with the directions of the United States Food Administration in all particulars, including the furnishing of food supplies for the U. S. Army and Navy and the Allies, now being handled through the Food Administration.

We will continue to do our utmost, under Government direction, to increase our production and assist the Food Administration. We consider that the opportunity to co-operate whole-heartedly and to our fullest powers with this branch of the Government is our plain and most pressing duty.

The Trade Commission Attorney has, by false inference and misplaced emphasis, given to disconnected portions of the correspondence taken from our private files and read into the Record, a false and sinister meaning with the plain purpose of creating antagonistic public opinion.

The services of the packers of the United States are most urgently needed, and I regret exceedingly that we should at this time have to spend our efforts in defending ourselves against unfounded, unproved, and unfair assertions such as are being daily made public.
